## HOMEASY HE-S2

# HOMEASY HE-S2 Portable Garment Steamer 1500W

Model: HE-S2

### INTRODUCTION

Thank you for choosing the HOMEASY HE-S2 Portable Garment Steamer. This versatile 4-in-1 device offers ironing, sterilization, cleaning, and humidification functions. With 1500W of power, it heats up in approximately 25 seconds, quickly penetrating fabrics to remove wrinkles from various clothing types. Its portable design eliminates the need for an ironing board, making it ideal for both home use and travel.

This updated version features enhanced power and an easily removable water tank, delivering a powerful and consistent steam output of 25 grams per minute to tackle even the most stubborn wrinkles. The exclusive plate design incorporates 7 air guide grooves to prevent air reflux and water droplet formation, ensuring a smooth steaming experience.

### IMPORTANT SAFETY INSTRUCTIONS

- **Caution:** The metal panel and the area above the steam button near the heating unit become very hot during operation. Avoid direct contact to prevent burns.
- Always use **distilled water** in the water tank. Using tap water can lead to mineral buildup, potentially damaging the steamer and affecting its performance.
- Ensure the steamer is unplugged before filling or emptying the water tank, and before cleaning.
- Do not immerse the steamer in water or other liquids.
- Keep the steamer out of reach of children and pets.
- Never direct steam at people or animals.
- If the power cord is damaged, it must be replaced by the manufacturer, its service agent, or similarly qualified persons to avoid a hazard.

### PRODUCT OVERVIEW

Familiarize yourself with the components of your HOMEASY HE-S2 Portable Garment Steamer.

**Image:** Key components of the HOMEASY HE-S2 Steamer.

- **Steam Head:** Features 7 air guide grooves for efficient steam distribution and to prevent water droplets.
- **Detachable Brush:** An accessory for use on various fabrics.
- **Steam Trigger:** Activates steam release.
- **Water Tank Button:** Used to release the water tank.
- **280ml Visible Water Tank:** Transparent tank for easy monitoring of water level.
- **Take-off Button:** For easy removal of the water tank.
- **Water Tank Fixing Buckle:** Secures the water tank in place.
- **Water Tank Pop-up Design:** Facilitates easy removal and reattachment of the tank.
- **Water Filling Nozzle:** Opening for refilling the water tank.

**Image:** Contents included with the HOMEASY HE-S2 Steamer.

## SETUP

---

Follow these steps to prepare your steamer for use:

# Product Installation

## Step 1

Pull the water tank out by pressing the button above the tank.

## Step 2

Pour water into the tank (No more than the highest water level).

## Step 3

Plug in power and turn on the power button, the indicator light is red, please wait for about 25s.

## Step 4

When indicator light turns green, the preheating is finished. Press the steam switch to use it.

Image: Product Installation Steps.

1. **Step 1: Remove Water Tank.** Press the button above the tank and pull the water tank out from the main unit.
2. **Step 2: Fill Water Tank.** Open the water filling nozzle and pour distilled water into the tank. Do not exceed the maximum water level indicated. Close the nozzle securely and reattach the water tank to the steamer until it clicks into place.
3. **Step 3: Power On.** Plug the steamer into a suitable power outlet (240V). Press the power button. The indicator light will turn red, signifying that the unit is preheating. Wait approximately 25 seconds until the indicator light turns green, indicating it is ready for use.
4. **Step 4: Begin Steaming.** Once the light is green, press the steam switch to release steam.

## OPERATING INSTRUCTIONS

The HOMEASY HE-S2 steamer is designed for efficient wrinkle removal and fabric care. For best results, ensure the metal panel of the steam head is in contact with the garment.

### Steaming Techniques

## Hang Ironing

## Flat Ironing

**Image:** Hang Ironing and Flat Ironing methods.

- **Hang Ironing:** Hang your garment on a hanger. Hold the steamer vertically, ensuring the steam head is in contact with the fabric. Move the steamer slowly downwards over the wrinkles.
- **Flat Ironing:** Lay your garment flat on a heat-resistant surface. Hold the steamer horizontally, pressing the steam head gently against the fabric. Move the steamer across the garment to remove wrinkles.

### General Tips

- For optimal results, ensure the metal panel of the steam head is in contact with the garment.
- The steamer produces 25 grams of powerful and uniform steam per minute, effectively eliminating tough wrinkles.
- The 7 air guide grooves on the steam head are designed to prevent air reflux and the formation of water beads, ensuring dry and effective steaming.
- After steaming, allow the garment to cool and dry for a few minutes before wearing or storing.

### MAINTENANCE

---

Proper maintenance ensures the longevity and optimal performance of your steamer.

- **Water Tank:** Always use distilled water to prevent mineral buildup. After each use, empty any remaining

water from the tank.

- **Cleaning:** Ensure the steamer is unplugged and completely cool before cleaning. Wipe the exterior with a soft, damp cloth. Do not use abrasive cleaners or solvents.
- **Storage:** Store the steamer in a cool, dry place. Ensure the water tank is empty before storage. The compact design allows for easy storage in drawers or luggage.

## TROUBLESHOOTING

If you encounter any issues with your steamer, refer to the following common problems and solutions:

| Problem                                                    | Possible Cause                                                              | Solution                                                                                                                                                                                          |
|------------------------------------------------------------|-----------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Steamer is not producing steam.                            | No water in the tank, or not preheated.                                     | Ensure the water tank is filled with distilled water. Wait for the indicator light to turn green before pressing the steam trigger.                                                               |
| Water droplets are ejected with steam, or clothes get wet. | Steamer not fully preheated, or steam head not in full contact with fabric. | Allow the steamer to fully preheat until the indicator light is green. Ensure the metal panel of the steam head is hot enough and in firm contact with the garment to prevent steam condensation. |
| Steamer is not turning on.                                 | Not plugged in correctly, or power outlet issue.                            | Check that the power cord is securely plugged into a working outlet. Test the outlet with another appliance.                                                                                      |
| Reduced steam output.                                      | Mineral buildup (if tap water used).                                        | Always use distilled water. If buildup is suspected, consult customer support for descaling instructions.                                                                                         |

## SPECIFICATIONS
