1. INTRODUCTION

This manual provides essential instructions for the safe and efficient operation, maintenance, and troubleshooting of your AMZCHEF SJ-036 Cold Press Slow Juicer. Please read this manual thoroughly before first use and retain it for future reference.

Image 1.1: The AMZCHEF SJ-036 Cold Press Slow Juicer, showcasing its sleek design and two collection cups for juice and pulp.

2. IMPORTANT SAFETY INSTRUCTIONS

- Always ensure the juicer is turned off and unplugged before assembly, disassembly, or cleaning.
- Do not immerse the motor base in water or other liquids.
- Keep hands and utensils out of the feed chute during operation to prevent injury. Use the provided food pusher.

- The juicer features a smart safety lock; it will not operate if the lid is not properly closed and locked.
- Do not operate the juicer if any parts are damaged. Contact customer support for assistance.
- Keep out of reach of children.

3. PRODUCT COMPONENTS

Familiarize yourself with the parts of your AMZCHEF juicer:

- Motor Base: Contains the 250W motor and control knob.
- Juicing Chamber: The main body where fruits and vegetables are processed.
- Lid with 5.3-inch Wide Feed Chute: Accommodates whole ingredients. Features a safety lock.
- Auger: The masticating screw that crushes ingredients.
- Triple Filter System: Consists of 2mm, 0.8mm, and 0.5mm mesh for enhanced juice purity.
- Pulp Outlet: Discharges dry pulp.
- Juice Outlet with Anti-Drip Tab: Dispenses juice into the collection cup.
- Juice Collection Cup: For collecting extracted juice.
- Pulp Collection Cup: For collecting discarded pulp.
- Cleaning Brush: For easy cleaning of components.

4. ASSEMBLY AND SETUP

Follow these steps to assemble your juicer before first use:

1. Place the juicing chamber onto the motor base, aligning the locking markers. Twist until it clicks into place.
2. Insert the auger into the juicing chamber.
3. Place the triple filter system around the auger.
4. Attach the lid, ensuring the safety lock is engaged. The juicer will not operate if the lid is not securely fastened.
5. Position the juice collection cup under the juice outlet and the pulp collection cup under the pulp outlet.

Video 4.1: Visual guide on assembling the AMZCHEF 5.3" Juicer Machine for whole fruits and vegetables.

5. OPERATING INSTRUCTIONS

5.1 Ingredient Preparation

- Wash all fruits and vegetables thoroughly.
- The 5.3-inch wide feed chute accommodates whole fruits and vegetables, reducing the need for pre-cutting. However, for very fibrous or large items, cutting into smaller pieces may improve efficiency and

prevent blockages.

- Remove hard pits from fruits (e.g., peaches, plums) and tough skins (e.g., pineapple, citrus) before juicing.

5.2 Juicing Process

1. Ensure the juicer is properly assembled and the collection cups are in place.
2. Plug in the juicer.
3. Turn the control knob to the 'ON' position. The juicer will begin operating with its 60 RPM fine grinding process.
4. Slowly feed ingredients into the wide feed chute. The automatic juicing mechanism will process them.
5. Observe the juice flowing into the juice cup and pulp into the pulp cup.
6. Once juicing is complete, turn the control knob to the 'OFF' position.

Image 5.1: The juicer in operation, demonstrating the wide feed chute and automatic juicing process.

5.3 Anti-Drip Function

The juice outlet is equipped with an anti-drip tab. Push the tab down to close the outlet and prevent drips between batches or when removing the juice cup. Lift the tab to allow juice to flow.

Image 5.2: Close-up of the juicer's anti-drip function, showing the tab in the closed position.

5.4 Making Nut Milk

The juicer can also be used to make nut milk:

1. Soak and wash nuts for 6 hours or more.
2. Turn on the machine after mixing the nuts with water.

3. Add the nuts in small amounts with a spoon into the feed chute.

Step 1: Soak and wash the nuts for 6 hours or more.

Step 2: Turn on the machine after mixing the nuts with the water and add the ingredients in small amounts with a spoon.

Then you've got your delicious nut milk!

Image 5.3: Step-by-step visual guide for preparing nut milk using the juicer.

6. MAINTENANCE AND CLEANING

Regular cleaning ensures the longevity and hygiene of your juicer. All removable parts are dishwasher safe.

1. Turn off the machine and unplug it from the power outlet.
2. Before disassembling, apply the reverse function (REV position) for 3-5 seconds to free the auger and clear any remaining pulp.
3. Fully open the lid and lock it in place.
4. Disassemble the juicing chamber, auger, and filter system.
5. Rinse all removable parts under running water. Use the provided cleaning brush to remove any stubborn pulp from the filter mesh.
6. Wash the parts with warm, soapy water. All removable parts are dishwasher safe.
7. Wipe the motor base with a damp cloth. Never immerse the motor base in water.
8. Allow all parts to dry completely before reassembling or storing.

Video 6.1: Detailed instructions on how to clean the AMZCHEF 1902B Juicer (similar model for cleaning guidance).

7. TROUBLESHOOTING GUIDE

If you encounter any issues, refer to the following common solutions:

- **Juicer does not turn on:** Ensure the locking markers are aligned when installing the cup and the lid is tightly closed. The safety lock prevents operation if not correctly assembled.
- **Blockages during juicing:** Switch to the 'REV' (Reverse) position for 3-5 seconds to dislodge ingredients. Then switch back to 'ON'.
- **Difficulty disassembling:** Apply the reverse function (REV) for 3-5 seconds to free the auger before attempting to disassemble.
- **Low juice yield or wet pulp:** Ensure ingredients are fresh. For fibrous ingredients, cut into smaller pieces. The triple filter system is designed for high yield, but excessive pulp buildup can reduce

efficiency. Clean the filter regularly.

If the issue persists, please contact AMZCHEF customer support for further assistance.

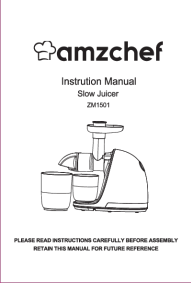

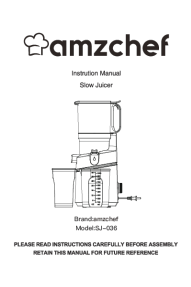

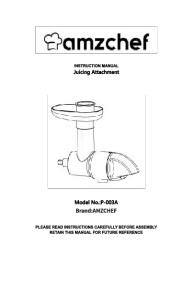

8. PRODUCT SPECIFICATIONS

Feature	Specification
Brand	AMZCHEF
Model Name	SJ-036 Juicers
Color	Beige
Product Dimensions	8.2"D x 7.9"W x 13.39"H
Item Weight	10.33 pounds
Maximum Power	250 Watts
Power Source	AC
Voltage	120 Volts (AC)
Number of Speeds	2 (ON, REV)
Blade Material	Plastic
Material	Plastic
Special Features	250W High Power & Low Noise Motor, 5.3-inch Feed Chute, Easy to Clean & Assemble, High Juice Yield, Self Feeding Cold Press, Triple Filter System
Recommended Uses	Fruits, Vegetables, Nuts, Seeds
Product Care Instructions	Hand Wash Only (Removable parts are dishwasher safe)

9. WARRANTY AND SUPPORT

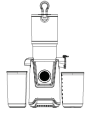

Most AMZCHEF products are guaranteed for one year. For warranty claims, technical support, or any inquiries, please refer to the contact information provided with your purchase or visit the official AMZCHEF website.
