## Safety Information

The safe operation of the Drift Trike is paramount. Always adhere to the following safety guidelines:

- Always wear a helmet and appropriate safety gear (knee pads, elbow pads) when riding.
- Ensure all bolts and fasteners are securely tightened before each use.
- Ride in safe, open areas away from traffic, pedestrians, and other hazards.
- Avoid riding on steep inclines, uneven surfaces, or near water.
- Adult supervision is recommended for all riders, especially for younger children.
- Do not exceed the maximum rider weight of 150 lbs.
- The product includes a safety flag for increased visibility. Ensure it is properly attached before riding.

**Important:** Ride at your own risk. Failure to follow safety instructions may result in injury.

## Package Contents

---

Verify that all components are present before beginning assembly:

- Drift Trike Frame (main body)
- Front Wheel Assembly
- Rear Drift Wheels (2)
- Seat
- Handlebars
- Pedals
- Safety Flag
- Assembly Tools
- Instruction Manual

## Setup and Assembly

---

Assembly typically takes approximately 15 minutes. All necessary tools are supplied.

1. **Attach Handlebars:** Secure the handlebars to the front fork stem using the provided bolts and tools. Ensure they are centered and tightened firmly.
2. **Install Front Wheel:** Attach the 16-inch front wheel to the fork. Ensure the V-brake mechanism is correctly aligned and functional.
3. **Mount Pedals:** Screw the pedals into the crank arms. Note that pedals are typically marked 'L' for left and 'R' for right, and thread in opposite directions (left pedal counter-clockwise, right pedal clockwise).
4. **Attach Seat:** Slide the adjustable bucket seat onto the frame and secure it at the desired length for the rider.
5. **Install Rear Drift Wheels:** Attach the two slick drift wheels to the rear axle.
6. **Affix Safety Flag:** Insert the safety flag into its designated slot on the rear of the trike for enhanced visibility.
7. **Final Check:** Before first use, double-check all connections, bolts, and moving parts to ensure they are secure and functioning correctly.

## Operating Instructions

Familiarize yourself with the trike's controls and features before riding.

- **Riding Position:** Adjust the seat so the rider can comfortably reach the pedals and handlebars.
- **Pedaling:** Propel the trike forward by pedaling the front wheel.
- **Steering:** Steer by turning the handlebars, which feature 120mm textured grips for control.
- **Braking:** The trike is equipped with an improved V-brake system. Squeeze the brake lever on the handlebar to reduce speed or stop. Practice braking at low speeds to understand its responsiveness.
- **Drifting:** The rear slick drift wheels are designed for controlled sliding. To initiate a drift, apply the brake lightly while turning, or shift your weight. Practice in a safe, open area.

No official product videos from the seller were found with relevant content for operation instructions.

## Maintenance

Regular maintenance ensures the longevity and safe operation of your Drift Trike.

- **Cleaning:** Wipe down the trike with a damp cloth after use. Avoid harsh chemicals.
- **Tire Inspection:** Regularly check the front tire for wear and proper inflation. The rear drift wheels are designed to wear over time and are replaceable.
- **Brake Check:** Ensure the V-brake is functioning correctly and the cable is not frayed or loose. Adjust as needed.
- **Fastener Check:** Periodically inspect all bolts, nuts, and connections for tightness. Tighten any loose fasteners.
- **Storage:** Store the trike in a dry, covered area to protect it from elements.

Madd Gear offers consumable replacement parts, such as drift wheels, to keep your trike in optimal condition.

## Troubleshooting

This section addresses common issues you might encounter.

- **Loose Parts:** If any part feels loose, stop using the trike immediately and re-tighten all fasteners according to the assembly instructions.
- **Brake Not Responsive:** Check the brake cable for proper tension and ensure the brake pads are making full contact with the wheel rim. Adjust the cable tension if necessary.
- **Difficulty Drifting:** Ensure you are on a suitable smooth surface. The rear wheels are designed for drifting, but technique and surface conditions play a role.
- **Unusual Noises:** Inspect all moving parts for obstructions or wear. Lubricate moving components if squeaking occurs.

For issues not covered here, please contact Madd Gear customer support.
