NEBO IP6308

iProtec PRO800 Black 800 Lumen Flashlight User Manual

Model: IP6308

1. Introduction

Thank you for purchasing the iProtec PRO800 Black 800 Lumen Flashlight. This high-power LED flashlight is designed for durability and versatility, featuring OC technology and innovative Flex-Power, allowing it to be powered by 3, 6, or 9 AA batteries. This manual provides detailed instructions for the safe and efficient use of your PRO800 flashlight.

2. Safety Information

- **Battery Safety:** Always use the correct type and size of batteries as specified. Ensure batteries are inserted with correct polarity (+ and -). Do not mix old and new batteries, or different types of batteries. Remove batteries if the flashlight will not be used for an extended period.
- **Light Exposure:** Do not shine the flashlight directly into eyes, as the intense light can cause temporary vision impairment or damage.
- **Heat:** The flashlight may become warm during prolonged use. This is normal. Avoid touching the head of the flashlight if it becomes excessively hot.
- **Water Resistance:** While durable, this flashlight is not designed for submersion. Avoid exposing it to excessive moisture or water.
- **Children:** Keep out of reach of children.

3. Package Contents

Please verify that all items are present in your package:

- iProtec PRO800 Flashlight (1 unit)
- AA Batteries (9 included)

4. Setup

4.1 Battery Installation

1. Unscrew the tail cap of the flashlight by turning it counter-clockwise.

2. Insert 3, 6, or 9 AA batteries into the battery compartment, ensuring correct polarity (+ and -) as indicated inside the flashlight. The PRO800 features Flex-Power technology, allowing operation with varying numbers of AA batteries.
3. Screw the tail cap back on clockwise until it is securely tightened.

Figure 1: iProtec PRO800 Flashlight. This image displays the flashlight's overall design, including its textured grip and the iProtec logo.

Figure 2: iProtec PRO800 Flashlight (Vertical View). This image provides a vertical perspective of the flashlight, emphasizing its robust construction and the design of the head and tail cap.

5. Operating Instructions

5.1 Power On/Off

The PRO800 flashlight is operated by a glow-in-the-dark button located on the rear tail cap.

- To turn the flashlight **ON**, press the tail cap button firmly until it clicks.
- To turn the flashlight **OFF**, press the tail cap button firmly again until it clicks.

5.2 Operating Modes

The PRO800 features 4 operating modes. To cycle through the modes, lightly press the tail cap button (without clicking it off) while the flashlight is on.

Mode	Lumen Output	Run Time	Beam Distance
High	800 lumens	8 hours	240 meters
Low	(Not specified, but lower than High)	23 hours	140 meters
Strobe	(Not specified, but 800 lumens peak)	72 hours	240 meters
Off	0 lumens	N/A	N/A

Note: Lumen output for Low and Strobe modes are not explicitly stated in the product description, but run times and beam distances are provided.

6. Maintenance

- **Cleaning:** Wipe the flashlight with a soft, damp cloth. Do not use abrasive cleaners or solvents.
- **Battery Replacement:** Replace batteries when the light output diminishes significantly. Always replace all batteries at the same time.
- **O-Rings:** Periodically inspect the O-rings for wear and tear. A thin layer of silicone grease can be applied to maintain water resistance.
- **Storage:** Store the flashlight in a cool, dry place. Remove batteries if storing for extended periods to prevent leakage.

7. Troubleshooting

Problem	Possible Cause	Solution
Flashlight does not turn on.	Dead or incorrectly inserted batteries.	Check battery polarity. Replace with fresh batteries.
Light is dim or flickers.	Low battery power. Loose tail cap.	Replace batteries. Ensure tail cap is fully tightened.
Cannot cycle through modes.	Incorrect button press.	Ensure you are lightly pressing the tail cap button without fully clicking it off.

8. Specifications

Feature	Detail
Model	IP6308
Brand	NEBO
Manufacturer	iProtec
Light Source	LED
