Sendowtek LMH-PW009

Sendowtek 5-Port 50W USB Charger Docking Station User Manual

Model: LMH-PW009

PRODUCT OVERVIEW

The Sendowtek 5-Port 50W USB Charger Docking Station is designed to efficiently charge multiple devices simultaneously while keeping your space organized. It features five USB ports, including a Quick Charge 3.0 port, to provide fast and safe charging for a variety of electronic devices.

PACKAGE CONTENTS

- Sendowtek 5-Port 50W USB Charger Docking Station (Model: LMH-PW009)
- Power Cable
- Detachable Baffles (Clear plastic dividers)
- Small Screwdriver and Screws (for optional phone stand installation)
- USB Charging Cables (various types, typically including Lightning and Micro USB)

SETUP INSTRUCTIONS

1. **Unpack the Device:** Carefully remove all components from the packaging.
2. **Connect Power:** Insert the provided power cable into the power input port on the back of the charging station. Plug the other end into a standard wall outlet (AC110-240V/50-60Hz).
3. **Install Detachable Baffles:** Insert the clear plastic baffles into the designated slots on the charging station. These dividers help organize your devices. You can arrange them to suit your specific devices.
4. **Install Optional Phone Stand:** If desired, use the included small screws and screwdriver to secure the tall phone stand into its designated position on the base. This provides a stable upright charging position for a smartphone.

5. **Connect Charging Cables:** Route your device-specific USB charging cables from the USB ports on the side and underneath the station through the cable management channels. Connect the appropriate end of each cable to your devices.

DETACHABLE BAFFLE

Design your own combination

OPERATING INSTRUCTIONS

The Sendowtek 5-Port 50W USB Charger Docking Station is designed for simple plug-and-play operation.

- **Connecting Devices:** Once the charging station is powered on, connect your devices (smartphones, tablets, smartwatches, etc.) to the appropriate USB charging cables.
- **Charging Process:** The station will automatically detect your device and deliver the optimal charging current. The 50W 10A output allows for simultaneous full-speed charging of up to five devices.
- **Quick Charge 3.0:** Utilize the dedicated QC3.0 port for compatible devices to achieve up to 80% faster charging compared to conventional chargers.
- **Integrated Safety Features:** The charging station incorporates Smart IC technology and protects against overcharge, short-circuit, and over-voltage, ensuring safe and efficient power delivery.
- **Automatic Shut-off:** The station is designed to stop charging once devices are fully charged, preventing

overcharge and conserving energy.

Quick Charge 3.0 Tech

Charges compatible devices 80% faster than conventional chargers.

MAINTENANCE

To ensure the longevity and optimal performance of your Sendowtek charging station, follow these simple maintenance guidelines:

- **Cleaning:** Disconnect the power cable before cleaning. Use a soft, dry cloth to wipe down the exterior of the charging station. Avoid using abrasive cleaners or solvents, as they may damage the surface.
- **Cable Management:** Periodically check the charging cables for any signs of wear or damage. Ensure cables are not excessively coiled or bent, which can lead to fraying or reduced performance.
- **Baffle Care:** The clear plastic baffles are detachable. Handle them with care during removal and reinstallation to prevent breakage. Clean them gently with a soft cloth.
- **Ventilation:** Ensure the charging station is placed in a well-ventilated area to prevent overheating. Do not cover the unit during operation.

TROUBLESHOOTING

If you encounter issues with your Sendowtek charging station, please refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Device not charging.	Loose cable connection, faulty cable, power issue, incompatible device.	Ensure all cables are securely connected to both the station and the device. Try a different USB port on the station. Test the device and cable with another charger to rule out a faulty cable or device. Verify the power cable is firmly plugged into the wall outlet and the station.
Slow charging speed.	Device not Quick Charge compatible, using a non-QC port, high power demand from multiple devices.	Ensure your device supports Quick Charge 3.0 for optimal speed and is connected to the QC3.0 port. Reduce the number of devices charging simultaneously if experiencing significant slowdowns.
Station feels warm.	Normal operation, poor ventilation, excessive load.	A slight warmth during charging is normal. Ensure the station is in a well-ventilated area and not covered. If excessively hot, disconnect devices and power, allow to cool, then resume with fewer devices.

SPECIFICATIONS

Feature	Detail
Brand	Sendowtek
Model Number	LMH-PW009
Product Dimensions	7.28 x 4.13 x 4.33 inches
Item Weight	1.15 pounds
Total USB Ports	5
Wattage	50 watts
Input Voltage	AC110-240V
Output	USB DC5V/8A (QC3.0: DC 3.6-6.5V/3A, 6.5-9V/2A, 9-12V/1.5A)
Connectivity Technology	USB
Special Features	Lightweight Design, Smart IC, Overcharge Protection, Short-circuit Protection, Over-voltage Protection

Feature	Detail
Compatible Devices	Cellular Phones, Tablets, Smartwatches (check specific model compatibility), Bluetooth Speakers, Power Banks, Cameras, Kindles, etc.

WARRANTY AND SUPPORT

Sendowtek products are manufactured to the highest quality standards. For warranty information, technical support, or customer service inquiries, please contact Sendowtek directly through their official website or the retailer where the product was purchased.

Please retain your proof of purchase for warranty claims.
