Bose Bass Module 700 Instruction Manual

Model: Bass Module 700

1. INTRODUCTION

The Bose Bass Module 700 is a premium wireless subwoofer designed to enhance your home audio experience by delivering deep, rich bass. It is engineered to pair seamlessly with compatible Bose soundbars, providing a dynamic range of low notes for music, movies, and television. Featuring QuietPort technology, it ensures clear audio without distortion, even at high volumes. Its elegant design with a glass-top finish complements any home theater setup.

2. SAFETY INFORMATION

Please read and follow all safety instructions before operating this product to prevent injury or damage.

- **Power Source:** Use only the power supply provided by Bose. Ensure the voltage matches your local power supply.
- **Ventilation:** Do not block any ventilation openings. Maintain adequate space around the module for proper airflow.

3. PACKAGE CONTENTS

Verify that all items are present in your package:

- Bose Bass Module 700
- Power Cord
- Instruction Manual (this document)

4. SETUP

Follow these steps to set up your Bose Bass Module 700 and connect it to your compatible Bose soundbar.

4.1 Placement

For optimal performance, place the Bass Module 700 on the same wall as your soundbar, or along any wall in the front third of the room. Ensure it is within 30 feet (9 meters) of your soundbar for wireless connectivity. Avoid placing it directly against a wall or in a corner, as this can sometimes lead to excessive bass.

4.2 Connecting to Power

1. Locate the power input on the back of the Bass Module 700.
2. Connect the power cord firmly into the power input.
3. Plug the other end of the power cord into a live AC power outlet.

4.3 Wireless Pairing with Soundbar

The Bass Module 700 is designed to wirelessly pair with compatible Bose soundbars (e.g., Bose Soundbar 700,

Soundbar 500, SoundTouch 300). The pairing process typically occurs automatically when both devices are powered on and within range. If automatic pairing does not occur, refer to your soundbar's instruction manual for specific pairing steps, usually involving the Bose Music app.

- Ensure your Bose soundbar is powered on and connected to the Bose Music app.
- Once the Bass Module 700 is powered on, it will attempt to connect wirelessly to the nearest compatible Bose soundbar.
- A solid white light on the Bass Module 700 indicates a successful connection.

5. OPERATING

Once connected, the Bose Bass Module 700 operates in conjunction with your soundbar. There are no direct controls on the bass module itself; all adjustments are made through the Bose Music app or your soundbar's remote control.

5.1 Adjusting Bass Levels

You can adjust the bass intensity to your preference using the Bose Music app. This allows you to fine-tune the audio output for different content types (music, movies, dialogue) and room acoustics.

- Open the Bose Music app on your smartphone or tablet.
- Select your connected soundbar.
- Navigate to the audio settings or bass control section to adjust the bass level.

6. MAINTENANCE

Proper care and maintenance will ensure the longevity and optimal performance of your Bass Module 700.

6.1 Cleaning

- Unplug the power cord before cleaning.
- Use a soft, dry cloth to clean the surfaces of the module.
- Do not use any sprays near the product or allow liquids to spill into any openings.
- For the glass top, a slightly damp cloth followed by a dry cloth can be used to remove fingerprints or smudges.

6.2 Storage

If storing the Bass Module 700 for an extended period, ensure it is unplugged and stored in a cool, dry place, away from direct sunlight and extreme temperatures.

7. TROUBLESHOOTING

If you encounter issues with your Bass Module 700, try the following solutions:

Problem	Possible Cause / Solution
---------	---------------------------

Problem	Possible Cause / Solution
No sound from bass module	• Ensure the power cord is securely plugged into the module and a live outlet. • Verify the module is wirelessly paired with your soundbar (solid white light). • Check the bass level settings in the Bose Music app. • Restart both the soundbar and the bass module by unplugging them for 30 seconds and plugging them back in.
Distorted or unclear bass	• Adjust the bass level in the Bose Music app. • Ensure the module is not placed too close to a wall or corner, which can cause excessive resonance. • Check for any obstructions around the module's port.
Module not pairing wirelessly	• Ensure the module is within 30 feet (9 meters) of the soundbar. • Confirm your soundbar is compatible with the Bass Module 700. • Follow the specific pairing instructions in your soundbar's manual or the Bose Music app. • Temporarily move other wireless devices away from the soundbar and bass module to reduce interference.
