5. OPERATING INSTRUCTIONS

The eclife vanity is designed for ease of use and durability.

- **Faucet Operation:** The included faucet features a single handle for controlling both water temperature and flow. Lift the handle to turn on the water and adjust left or right for desired temperature. Push down to turn off.
- **Soft-Closing Doors and Drawers:** The cabinet doors and drawers are equipped with soft-closing mechanisms. This feature allows them to close gently and quietly, preventing slamming and extending product life. Simply push the door or drawer lightly to engage the soft-close function.
- **Storage Access:** Utilize the two drawers for smaller items and the two-door cabinet for larger bathroom essentials.

6. MAINTENANCE

Proper care and maintenance will ensure the longevity and appearance of your vanity.

- **Cleaning the Cabinet:** Wipe the cabinet surfaces with a soft, damp cloth. Avoid abrasive cleaners or harsh chemicals that could damage the finish.
- **Cleaning the Sink:** The glass vessel sink is scratch and stain-resistant. Clean with mild soap and water, then rinse thoroughly. For stubborn spots, use a non-abrasive glass cleaner.
- **Faucet Care:** Clean the faucet with a soft cloth and mild soap. Do not use abrasive cleaners, steel wool, or harsh chemicals, as these can scratch the finish.
- **Water Spills:** Promptly wipe up any water spills on the cabinet or floor to prevent water damage.
- **Hinge Adjustment:** If doors become misaligned, refer to the hinge adjustment video (Video 4.2) or the detailed instructions in your manual.

7. TROUBLESHOOTING

If you encounter any issues with your eclife vanity, please refer to the following common solutions:

- **Loose Connections:** If the cabinet feels wobbly, check all cam lock connections and screws to ensure they are tightened securely.
- **Drawer/Door Misalignment:** Adjust the hinges (refer to Video 4.2) for doors or re-align drawer slides if drawers are not closing smoothly or are uneven.
- **Leaking Faucet/Drain:** Ensure all plumbing connections are properly tightened and sealed with plumber's tape or sealant as appropriate. If the issue persists, consult a professional plumber.
- **Water Flow Issues:** Check the faucet aerator for clogs and clean if necessary.
