

GENBOLT GB209X/GB209H3-Z

GENBOLT GB209X/GB209H3-Z Outdoor Wireless WiFi Surveillance Camera User Manual

Models: GB209X, GB209H3-Z

1. INTRODUCTION

Welcome to the GENBOLT GB209X/GB209H3-Z Outdoor Wireless WiFi Surveillance Camera user manual. This guide provides detailed instructions for setting up, operating, maintaining, and troubleshooting your new security camera. Please read this manual carefully before installation and use to ensure proper functionality and safety.

The GENBOLT GB209X/GB209H3-Z camera features a 110° ultra-wide-angle lens, dual-band 2.4/5GHz WiFi connectivity with 2T2R MIMO antennas for enhanced signal stability, Power over Ethernet (POE) capability, active floodlight defense, AI humanoid detection, and color night vision. It is designed to provide reliable outdoor surveillance for your home or business.

2. PRODUCT OVERVIEW

2.1 Package Contents

- GENBOLT GB209X/GB209H3-Z Camera
- Power Adapter (DC12V/2A, 100 inches cable)
- Mounting Screws and Anchors
- User Manual (this document)
- Ethernet Cable (for initial setup or POE connection)

2.2 Key Features

- **110° Ultra Wide Angle:** Provides extensive coverage, reducing the need for multiple cameras.
- **Dual-Band WiFi (2.4/5GHz):** Supports both frequency bands with 2T2R MIMO antennas for stronger, more stable network signals.
- **Active Lighting Defense:** Features a customizable alarm and super bright white LEDs that activate upon motion detection to deter intruders.
- **Color Night Vision:** Automatically switches to color night vision in low-light conditions using integrated floodlights.
- **AI Humanoid Motion Detection:** Advanced detection reduces false alarms from environmental factors

like rain, snow, or moving foliage. Customizable detection zones are supported.

- **24/7 Recording & Compatibility:** Supports TF card (32/64/128GB, FAT32) with intelligent loop recording and audio. Compatible with smartphones, tablets, and PCs.
- **Power over Ethernet (POE):** Offers flexible installation options for both wired and wireless network connections.
- **Two-Way Audio:** Allows for real-time communication through the camera.

3. SETUP

3.1 Initial Power On

Connect the provided DC12V/2A power adapter to the camera and plug it into a power outlet. The camera will power on and initiate its self-test sequence.

3.2 App Installation

Download the official GENBOLT app from your smartphone's app store (iOS App Store or Google Play Store). Follow the on-screen instructions to create an account and log in.

3.3 Network Connection

Wireless (WiFi) Setup:

1. Open the GENBOLT app and tap 'Add Device'.
2. Select the option for WiFi camera setup.
3. Follow the app's prompts to connect the camera to your 2.4GHz or 5GHz WiFi network. Ensure your phone is connected to the same WiFi network during setup.

Wired (POE) Setup:

1. Connect an Ethernet cable from your POE-enabled router or switch to the camera's Ethernet port.
2. The camera will automatically establish a wired network connection.
3. Open the GENBOLT app and tap 'Add Device'. The app should detect the camera on your local network.

3.4 Mounting the Camera

Choose a secure outdoor location with a clear view of the area you wish to monitor. Use the provided mounting screws and anchors to securely attach the camera to a wall or ceiling. Adjust the camera's angle for optimal coverage.

4. OPERATING INSTRUCTIONS

4.1 Live View and Playback

Access the GENBOLT app to view the live feed from your camera. You can also review recorded footage stored on the TF card or cloud service (if subscribed).

4.2 Motion Detection and Alerts

The camera features AI humanoid detection to minimize false alarms. You can:

- Set up 1 to 4 specific detection zones within the camera's view.
- Adjust motion sensitivity.
- Receive instant alerts on your mobile phone via push notifications or email.

Image: Alert Notifications. This image illustrates different notification methods for motion detection, including app notifications, email, FTP, and RTSP.

4.3 Active Alarm and Floodlight Defense

Configure the camera to activate its built-in floodlights and an audible alarm when motion is detected. This feature can be scheduled or triggered by specific events.

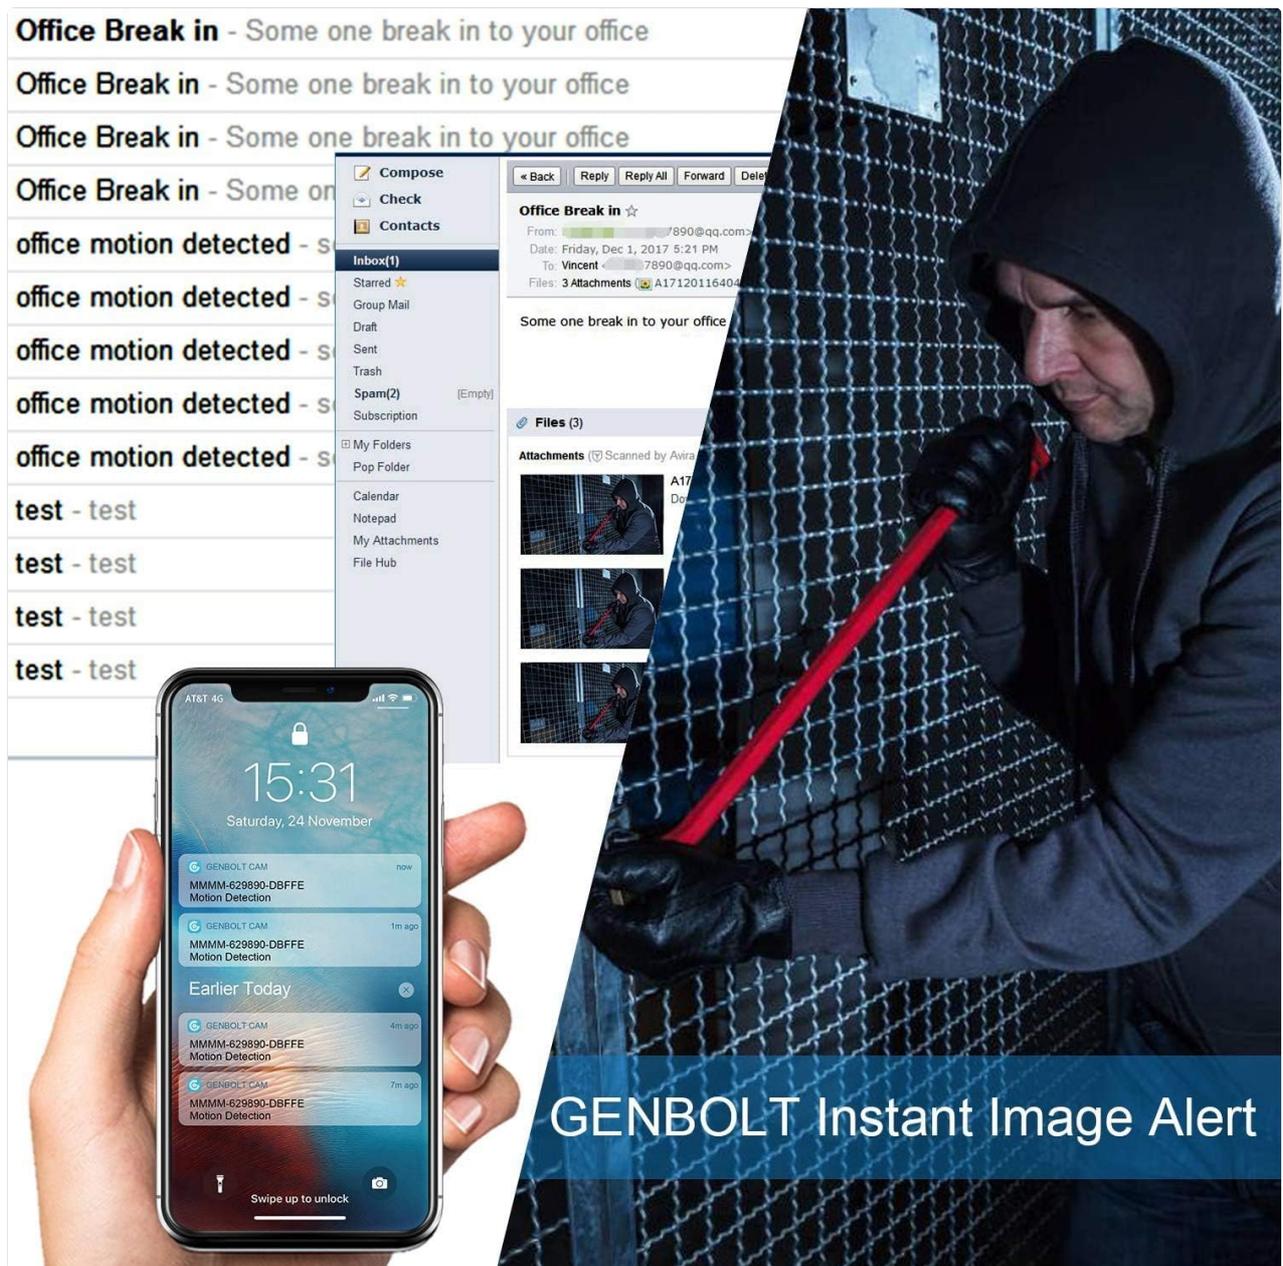

Image: Active Lighting Defense. A GENBOLT camera illuminates an intruder with its floodlight, accompanied by a warning message.

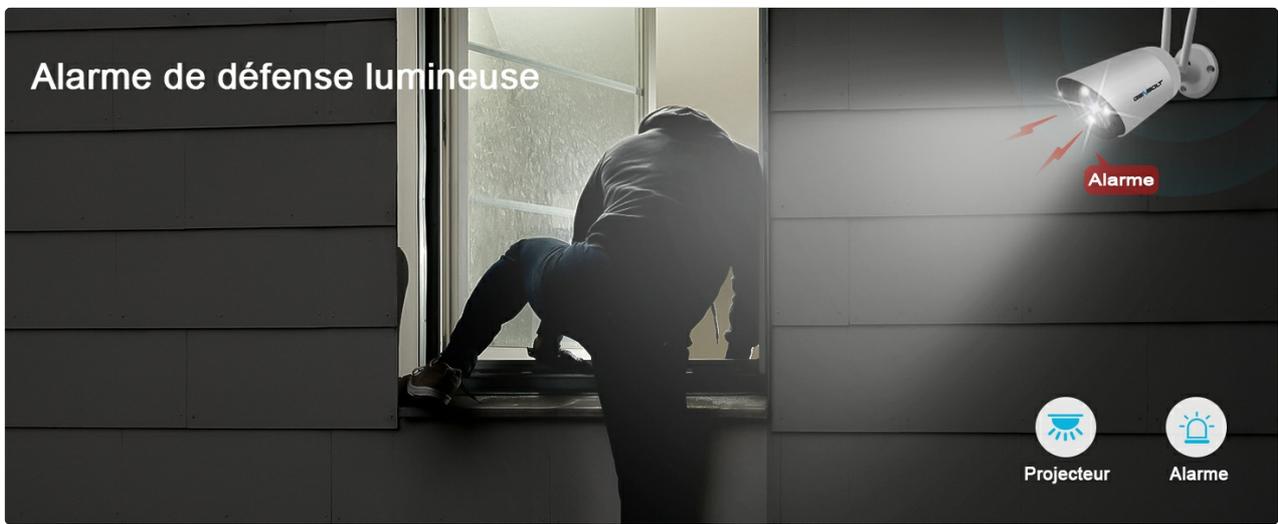

Image: Light Defense Alarm. An intruder is shown climbing through a window, with the camera's floodlight and alarm activated.

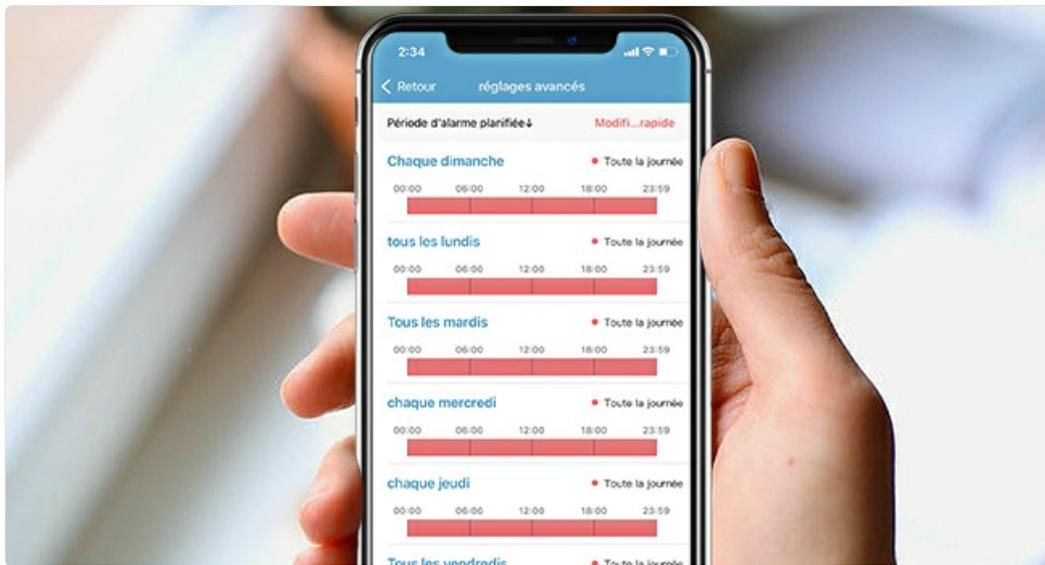

Image: Alarm Schedule. A smartphone displays a customizable alarm schedule, allowing users to set specific times for alarm activation.

4.4 Night Vision Modes

The camera supports multiple night vision modes:

- **Infrared Night Vision:** Standard black and white night vision.
- **Color Night Vision:** Utilizes built-in floodlights to provide full-color images in low light.
- **Auto Mode:** Automatically switches between day, infrared, and color night vision based on ambient light conditions.

5. MAINTENANCE

- **Cleaning:** Regularly clean the camera lens with a soft, dry cloth to ensure clear image quality. Avoid abrasive cleaners.
- **Firmware Updates:** Check the GENBOLT app periodically for available firmware updates. Keeping your camera's firmware up-to-date ensures optimal performance and security.
- **SD Card Management:** If using a TF card for local storage, format it regularly through the app to maintain performance and prevent data corruption. Replace the card if it shows signs of wear or malfunction.
- **Power Connection:** Ensure the power adapter and cable connections are secure and free from damage.

6. TROUBLESHOOTING

Issue	Possible Solution
Camera not connecting to WiFi	Ensure the camera is within range of your router. Verify WiFi password. Try connecting to both 2.4GHz and 5GHz bands if your router supports it. Restart the camera and router.
Frequent disconnections	Check WiFi signal strength in the camera's location. Reduce interference from other devices. Ensure 2T2R MIMO antennas are properly positioned. Consider using a wired (POE) connection if possible.
Poor image quality	Clean the camera lens. Ensure sufficient lighting for optimal day vision. Check network bandwidth for streaming issues.
False motion alarms	Adjust motion detection sensitivity in the app. Define specific detection zones to exclude areas with frequent non-human movement (e.g., trees, pets). Ensure AI humanoid detection is enabled.
No night vision	Check if night vision mode is set to 'Auto' or 'Color Night Vision' in the app. Ensure the floodlights are not obstructed.

Issue	Possible Solution
SD card not recording	Ensure the SD card is correctly inserted and formatted (FAT32). Check if the card is full; enable loop recording or replace the card. Verify recording settings in the app.

7. SPECIFICATIONS

Feature	Detail
Model Numbers	GB209X, GB209H3-Z
Material	Metal
Voltage	12 Volts
Power Consumption	4 Watts
Dimensions (L x W x H)	15 x 5 x 8 cm
Weight	500 grams
Night Vision Range	Up to 100 inches (approx. 2.5 meters)
Effective Video Resolution	1080 Pixels
Connectivity Technology	Power over Ethernet, Wi-Fi (2.4/5GHz)
Special Features	110° Ultra Wide Angle, 2.4/5GHz Wi-Fi, 24/7 All-Weather, Dual 2T2R MIMO Antennas, POE Technology, AI Humanoid Detection, Color Night Vision, Active Floodlight Defense, Two-Way Audio
Recommended Use	Outdoor Security
Included Components	Surveillance camera, synopsis (manual)

8. WARRANTY AND SUPPORT

GENBOLT provides the following support for your product:

- **30-Day Exchange Policy:** For product exchanges.
- **1-Year Limited Warranty:** Covers manufacturing defects and malfunctions under normal use.
- **Free Local Support:** Available Monday to Friday, 7 AM to 10:30 AM (PST).
