Tevlaphee Universal Steering Wheel Brake Lock Instruction Manual

Model: LA80010

Brand: Tevlaphee

1. INTRODUCTION AND OVERVIEW

The Tevlaphee Universal Steering Wheel Brake Lock is a robust anti-theft device designed to secure your vehicle by locking the steering wheel to the brake or clutch pedal. Constructed from high-quality aluminum alloy and steel, this device offers enhanced durability and resistance against various forms of attack, including cutting, knocking, corrosion, cracking, prying, sawing, hammering, and Freon attacks. Its multi-functional design also incorporates a window-breaking tool for emergency situations, providing dual security benefits. This manual provides detailed instructions for the proper installation, operation, and maintenance of your Tevlaphee Steering Wheel Brake Lock to ensure optimal performance and security.

2. PRODUCT FEATURES

- **Enhanced Durability:** Made from excellent aluminum alloy and steel, designed to prevent cutting, anti-knocking, anti-corrosion, anti-cracking, and resist pry, saw, hammer, and Freon attacks.
- **Emergency Tool:** The multi-functional design allows the lock to be used as a window-breaking tool in emergencies.
- **Advanced Locking Mechanism:** Features a double lock cylinder for increased strength and a lower aperture ratio, making it highly resistant to picking and violent opening.
- **Steering Wheel Protection:** Includes 2 adhesive tapes to apply to the U-shaped part of the lock hook, preventing marks or scratches on your steering wheel.
- **Robust Hook Design:** The exterior of the brake hook is covered with plastic rubber, while the interior is solid steel, enhancing anti-saw capabilities.
- **Universal and Adjustable Fit:** The three-section telescopic hydraulic brake lock can be compressed

and adjusted to fit various vehicles. It is suitable for cars, trucks, vans, and SUVs, accommodating distances from the steering wheel to the brake pedal within 22.8-33.5 inches.

- **Easy to Use:** Designed for quick and straightforward installation and removal, providing double protection for your vehicle in seconds.

3. PACKAGE CONTENTS

Upon opening your Tevalphee Universal Steering Wheel Brake Lock package, you should find the following items:

- 1 x Tevalphee Steering Wheel Brake Lock Unit
- 3 x Keys
- 2 x Wear Tapes (Adhesive Strips)
- 1 x Instruction Manual (this document)

4. SETUP AND INSTALLATION

Follow these steps to properly install your Tevalphee Steering Wheel Brake Lock:

1. **Prepare the Lock:** Insert one of the provided keys into the lock cylinder and turn it to unlock the device. Extend the lock to its proper length. Ensure the blue hook part is fully pulled out before extending the main rod.

2. **Attach to Pedal:** Position the lower hook of the lock to securely grip the brake or clutch pedal of your vehicle.
3. **Attach to Steering Wheel:** Extend the upper part of the lock and place the other hook securely onto the steering wheel. Ensure it is firmly attached and does not slip.
4. **Secure the Lock:** Once both hooks are in place, remove the key. The lock will automatically tighten, securing the device firmly between the steering wheel and the pedal.

Note: Before first use, consider applying the included adhesive tapes to the U-shaped part of the lock hooks to prevent any potential marks or scratches on your steering wheel.

5. OPERATING INSTRUCTIONS

To operate your Tevlaphee Steering Wheel Brake Lock:

- **To Lock:** Follow the "Setup and Installation" steps outlined above. Ensure the lock is fully extended and securely fastened to both the steering wheel and the pedal before removing the key. The lock will automatically engage and secure the device.
- **To Unlock:** Insert the key into the lock cylinder and turn it. This will release the locking mechanism, allowing you to remove the device from your steering wheel and pedal.

The lock is designed for quick deployment and removal, making it convenient for daily use while providing a strong visual and physical deterrent against theft.

6. MAINTENANCE

To ensure the longevity and optimal performance of your Tevlaphee Steering Wheel Brake Lock, consider the following maintenance tips:

- **Cleaning:** Wipe the lock periodically with a soft, damp cloth to remove dust and grime. Avoid using harsh chemicals or abrasive cleaners, which could damage the finish.
- **Lubrication:** If the locking mechanism or telescopic rod becomes stiff, apply a small amount of graphite lubricant or a silicone-based spray to the moving parts. Do not use oil-based lubricants as they can attract dirt.
- **Adhesive Tapes:** Regularly check the adhesive tapes on the hooks. If they show signs of wear or detachment, replace them with new ones to continue protecting your steering wheel.
- **Storage:** When not in use, store the lock in a clean, dry place. Its retractable design allows for compact storage, such as under a seat or in the trunk.

7. TROUBLESHOOTING

If you encounter any issues with your Tevlaphee Steering Wheel Brake Lock, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Lock appears too short or won't extend fully.	The blue hook end may not be fully pulled out before extending the main rod.	Ensure the blue hook part is fully extended from its housing before attempting to stretch the main telescopic rod.
Key is difficult to insert or turn.	New lock mechanism may be stiff, or dust/debris in the keyhole.	For new locks, continued use will typically loosen the mechanism. For older locks, apply a small amount of graphite lubricant into the keyhole. Ensure the key is inserted correctly.
Lock feels loose after installation.	Not fully tightened or incorrect positioning.	Ensure the lock is fully extended and the hooks are firmly gripping the steering wheel and pedal. Remove the key to allow the internal mechanism to fully engage and tighten.

8. SPECIFICATIONS

Attribute	Detail
Brand	Tevlaphee
Model Name	Steering Wheel Lock
Item Model Number	LA80010
Special Feature	Anti-theft, Double Protection
Lock Type	Key Lock
Material	Alloy Steel
Item Dimensions (L x W x H)	13.78 x 1.3 x 2.36 inches
Adjustable Length (Max)	33.5 inches
Item Weight	3.9 Pounds
Color	Silver
Finish Type	Polished
Included Components	Lock*1, Key*3, Wear tape*2, Instruction Manual*1
Recommended Uses For Product	Interior Accessories
Control Method	Touch (Manual)
