## INTRODUCTION

Thank you for choosing the Saeyang Marathon Handy 700 Electric Nail File. This professional-grade machine is designed for efficient and precise manicure and pedicure applications, suitable for both salon professionals and aspiring technicians. Please read this manual thoroughly before operating the device to ensure safe and optimal performance.

The Marathon Handy 700 offers advanced features such as a powerful 50,000 RPM motor, 100W drilling power, and a convenient foot pedal for hands-free operation. Its hermetically sealed handpiece design ensures reduced noise during use, providing a more comfortable experience for both the operator and clients.

### Control Panel Overview

Figure 4: Detailed view of the control panel, showing the digital display, speed control dial, and function buttons.

- **Power Switch:** Located on the front right side of the unit. Flip to ON (green light) to power on the device.
- **Digital Display:** Shows the current rotation speed (RPM).
- **Speed Control Dial:** Rotate clockwise to increase speed, counter-clockwise to decrease.
- **FWD/REV Button:** Toggles the rotation direction of the handpiece (Forward/Reverse).
- **HAND/FOOT Button:** Switches between hand control (speed adjusted by dial) and foot pedal control.
- **AUTO CRUISE Button:** Activates the Auto-Cruise function, maintaining a set speed without continuous pedal pressure.

## Basic Operation

1. **Power On:** Turn on the main power switch. The digital display will light up.
2. **Insert Bit:** Ensure the handpiece is locked before inserting or removing a bit. Insert the desired nail bit firmly into the chuck of the handpiece. Twist to secure if applicable.
3. **Select Control Mode:**
  - **Hand Mode:** Press the HAND/FOOT button until "HAND" is indicated (or corresponding icon). Adjust speed using the Speed Control Dial.
  - **Foot Mode:** Press the HAND/FOOT button until "FOOT" is indicated (or corresponding icon). Speed will be controlled by the foot pedal.
4. **Adjust Speed:**
  - In Hand Mode, rotate the Speed Control Dial to achieve the desired RPM (up to 50,000 RPM).
  - In Foot Mode, press the foot pedal to increase speed. The Auto-Cruise function can be used to maintain a set speed.
5. **Change Rotation Direction:** Press the FWD/REV button to switch between forward and reverse rotation as needed for different applications.
6. **Begin Work:** Carefully apply the rotating bit to the nail surface.
7. **Power Off:** After use, turn the Speed Control Dial to minimum, then flip the main power switch to OFF. Disconnect

from power outlet if storing for extended periods.

## MAINTENANCE

Regular maintenance ensures the longevity and optimal performance of your Saeyang Marathon Handy 700.

### Cleaning

- **Control Unit:** Wipe the exterior of the control unit with a soft, dry cloth. Do not use abrasive cleaners or solvents.
- **Handpiece:** After each use, clean the handpiece exterior. Periodically, clean the chuck area to remove dust and debris. Refer to the handpiece-specific manual for detailed cleaning instructions if available.
- **Bits:** Clean and sterilize nail bits according to standard hygiene practices after each client.

### Storage

- Store the device in a cool, dry place, away from direct sunlight and moisture.
- Always place the handpiece in its stand when not in use to prevent damage.

### Service

The Saeyang Marathon Handy 700 is designed for easy repair and maintenance. For any issues beyond basic cleaning, it is recommended to contact authorized service centers or the manufacturer for professional assistance. Do not attempt to open the main control unit or handpiece for internal repairs, as this may void your warranty and cause further damage.

## TROUBLESHOOTING

Problem	Possible Cause	Solution
Unit does not power on.	Power cord not securely plugged in. Power outlet not functioning. Main power switch is OFF.	Check power cord connections at both ends. Test the outlet with another device. Ensure the main power switch is in the ON position.
Handpiece not rotating.	Handpiece cable not connected properly. Speed dial set to minimum. Incorrect control mode selected (Hand/Foot). Foot pedal not pressed (if in Foot mode).	Check handpiece cable connection to the control unit. Increase speed using the dial or foot pedal. Verify the HAND/FOOT button setting. Press the foot pedal if in Foot mode.

Problem	Possible Cause	Solution
Excessive noise or vibration from handpiece.	Bit not inserted correctly or damaged.	Re-insert bit firmly or replace with a new one.
	Handpiece chuck needs cleaning.	Clean the handpiece chuck area.
	Internal issue with handpiece.	Contact customer support for service.
Speed inconsistent or fluctuating.	Loose connection.	Check all cable connections.
	Overload.	Reduce pressure on the handpiece.
	Internal control unit issue.	Contact customer support for service.

If the problem persists after attempting these solutions, please contact customer support.
