AGARO Imperial

AGARO Imperial Slow Juicer User Manual

Professional Cold Press Whole Slow Juicer

1. INTRODUCTION

This manual provides comprehensive instructions for the safe and efficient operation, maintenance, and troubleshooting of your AGARO Imperial Slow Juicer. Please read this manual thoroughly before first use and retain it for future reference.

The AGARO Imperial Slow Juicer is designed for extracting juice from various fruits and vegetables using a cold press process, which helps in retaining maximum nutrients and flavor. It features a powerful 240 Watts motor and comes with multiple strainers for different juicing needs.

2. IMPORTANT SAFETY INSTRUCTIONS

Always follow basic safety precautions when using electrical appliances to reduce the risk of fire, electric shock, and injury.

- Read all instructions before operating the juicer.
- Do not immerse the motor base in water or other liquids.
- Ensure the appliance is properly assembled before use.
- Keep hands and utensils away from moving parts during operation.
- Always unplug the juicer from the power outlet when not in use, before assembling or disassembling parts, and before cleaning.
- Do not operate any appliance with a damaged cord or plug, or after the appliance malfunctions or has been dropped or damaged in any manner.
- This appliance is for household use only.
- Do not use attachments not recommended or sold by the manufacturer.

3. PRODUCT COMPONENTS

Familiarize yourself with the parts of your AGARO Imperial Slow Juicer:

- **Pusher:** Used to guide food into the feeder chute.
- **Feeder Chute:** Wide opening for inserting fruits and vegetables.
- **Grinder (Auger):** Squeezes produce to extract juice.
- **Filter Support:** Holds the filter securely in place.
- **Filter/Strainer:** Separates juice from pulp. Includes Smoothie, Juice, and Sorbet strainers.
- **Main Body:** Contains the motor and control panel. Made of ABS plastic.
- **BPA Free Container:** The main juicing chamber.
- **Juice Container:** Collects extracted juice.
- **Pulp Container:** Collects separated pulp.

4. SETUP AND ASSEMBLY

Before first use, wash all detachable parts (except the motor base) with warm soapy water, rinse thoroughly, and dry. Ensure all parts are completely dry before assembly.

4.1 Assembly Steps:

1. Place the main body on a stable, flat surface.
2. Insert the BPA free container onto the main body, aligning the arrows or marks, and twist until it locks into place.
3. Place the desired filter/strainer into the filter support, then insert this assembly into the BPA free container.
4. Insert the grinder (auger) into the center of the filter/strainer.
5. Attach the feeder chute assembly onto the top of the BPA free container, aligning it correctly and twisting to secure.
6. Position the juice container under the juice spout and the pulp container under the pulp outlet.

7. Ensure all parts are securely locked before plugging in the appliance.

Figure 4.1: The AGARO Imperial Slow Juicer fully assembled and ready for use, showing the main unit, juice container, and pulp container.

5. OPERATING INSTRUCTIONS

5.1 Preparing Ingredients:

- Wash all fruits and vegetables thoroughly.
- For whole fruits like apples and oranges, the 74mm feeding tube allows direct insertion. For other produce, cut into pieces that fit comfortably into the feeder chute.
- Remove hard pits from fruits (e.g., peaches, plums, cherries) and tough seeds (e.g., mangoes).
- Peel citrus fruits before juicing.

5.2 Juicing Process:

1. Ensure the juicer is properly assembled and plugged into a suitable power outlet.

2. Turn the juicer ON using the control switch.
3. Slowly feed the prepared ingredients into the feeder chute. Use the pusher only if necessary to gently guide the food down. Do not force ingredients.
4. The juicer will automatically separate the juice into the juice container and the pulp into the pulp container.
5. When finished, turn the juicer OFF and unplug it from the power outlet.

5.3 Reverse Function:

If ingredients get jammed or the juicer stops during operation, press and hold the 'REV' (Reverse) switch for a few seconds. This will reverse the auger's rotation to clear the blockage. Release the switch to return to normal operation. If the jam persists, turn off the juicer, unplug it, disassemble, and clear the blockage manually.

Figure 5.2: Illustration of pressing the 'REV' button to activate the reverse function, which helps prevent jams during juicing.

6. CLEANING AND MAINTENANCE

Regular cleaning ensures optimal performance and extends the lifespan of your juicer. Always unplug the juicer before cleaning.

6.1 Pre-Cleaning:

For quick pre-cleaning between different types of produce, or to loosen residue, fill the chamber with water and allow the juicer to run for approximately 1 minute. This helps flush out remaining pulp.

6.2 Thorough Cleaning:

1. Disassemble all detachable parts: feeder chute, auger, filter, filter support, BPA free container, juice container, and pulp container.
2. Rinse all parts under running water to remove large pulp residues.
3. Use the provided cleaning brush to thoroughly clean the filter/strainer, as fine mesh can retain pulp.
4. Wash all detachable parts with warm soapy water. All detachable parts are dishwasher safe.
5. Rinse thoroughly and allow all parts to air dry completely before reassembling or storing.
6. Wipe the motor base with a damp cloth. Never immerse the motor base in water.

75 mm wide mouth suitable for whole apple, orange, etc

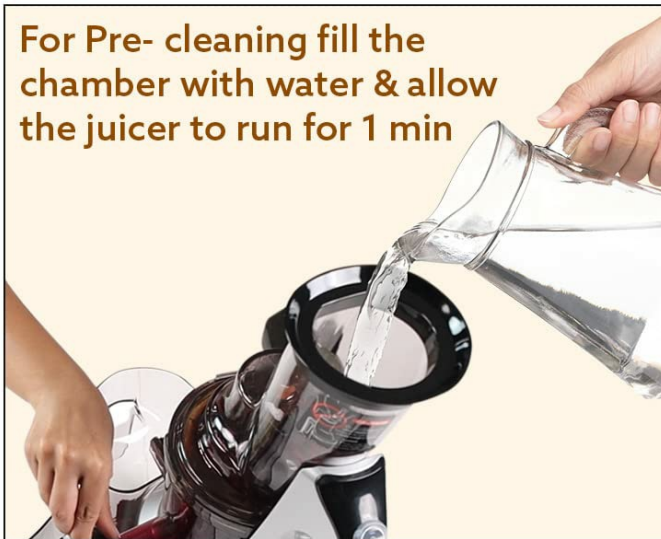

Drip free smart cap to prevent mess on the counter top

Press the 'REV' switch for reverse function to prevent jam

For through cleaning, the filter part needs to be cleaned with a brush

For Pre- cleaning fill the chamber with water & allow the juicer to run for 1 min

7. TROUBLESHOOTING

Problem	Possible Cause	Solution
Juicer does not turn on.	Not plugged in; parts not assembled correctly; power outage.	Ensure plug is securely in outlet; reassemble parts, ensuring they are locked; check power supply.
Juicer stops during operation or jams.	Too much produce fed at once; hard ingredients causing blockage.	Press the 'REV' button to clear blockage. If persistent, turn off, unplug, disassemble, and clear manually. Feed ingredients slowly.
Low juice yield or wet pulp.	Incorrect strainer used; produce not fresh; filter clogged.	Ensure appropriate strainer is used for desired consistency. Use fresh produce. Clean filter thoroughly.

Problem	Possible Cause	Solution
Excessive noise or vibration.	Parts not assembled correctly; juicer on uneven surface.	Reassemble all parts, ensuring they are securely locked. Place juicer on a stable, flat surface.

8. PRODUCT SPECIFICATIONS

- **Brand:** AGARO
- **Model:** Imperial (Item model number: 33293)
- **Power:** 240 Watts AC Motor, 100% Copper Motor
- **Technology:** Cold Press (65 RPM)
- **Feeding Tube:** Large 74mm (3 inches) wide
- **Material:** 100% BPA Free Highest Food Grade Plastic jar, Stainless Steel finish
- **Included Components:** 2 Jars, 3 Strainers (Smoothie, Juice, Sorbet)
- **Product Dimensions:** 15D x 117W x 31H Centimeters
- **Item Weight:** 8 kg 500 g
- **Country of Origin:** China
- **Care Instructions:** Dishwasher Safe (detachable parts)

9. WARRANTY AND SUPPORT

The AGARO Imperial Slow Juicer comes with a **1-year warranty** on the product and a **5-year warranty** on the motor from the date of purchase. Please retain your purchase receipt as proof of warranty.

For warranty claims, technical support, or service inquiries, please contact AGARO customer service. Contact details can typically be found on the product packaging or the official AGARO website.
