## SETUP AND ASSEMBLY

The Habitdesign Athena desk is designed for easy home assembly. It is supplied as a kit with all necessary hardware and instructions. We recommend two people for assembly due to the weight and size of some components.

### Required Tools (Not Included):

- Phillips head screwdriver (manual or electric)
- Hammer (for dowels, if applicable)

### Assembly Steps:

1. **Unpack Components:** Carefully unpack all parts and hardware. Verify that all components listed in the included

parts list are present and undamaged.

2. **Identify Reversible Side:** Determine whether you want the storage unit (drawers and door) on the left or right side of the desk. This decision should be made before starting assembly as it affects the orientation of certain parts.
3. **Assemble Main Desk Frame:** Attach the desk legs to the main tabletop. Ensure all screws are tightened securely.
4. **Construct Storage Unit:** Assemble the frame for the two drawers and one door. Install the metal drawer slides and door hinges according to the diagrams.
5. **Attach Storage Unit to Desk:** Securely fasten the assembled storage unit to the underside of the main tabletop.
6. **Install Drawers and Door:** Insert the assembled drawers into their slides and attach the door to its hinges. Adjust hinges as needed for proper alignment.
7. **Final Check:** Ensure all connections are tight and the desk is stable. Place the desk in its desired location, ensuring it is level.
