## ASSEMBLY INSTRUCTIONS (SETUP)

---

This model kit is designed for snap-fit assembly, requiring no glue or specialized tools. Follow the numbered steps provided in the included pictorial instructions. Carefully detach each part from its runner using a hobby nipper or by gently twisting. Ensure parts are oriented correctly before snapping them together.

1. **Prepare Parts:** Identify the necessary parts for each step from the plastic runners.
2. **Detaching Parts:** Gently twist or use a hobby nipper to remove parts from the runners. Avoid pulling forcefully to prevent damage.
3. **Assemble Body Sections:** Begin by assembling the main body, head, and tail sections as indicated in the pictorial guide.
4. **Attach Wings:** Connect the wing components to the main body. Pay attention to the mechanism that allows wing flapping.
5. **Apply Stickers:** Use the provided stickers for detailed markings as shown in the instructions. Use tweezers for precise placement.
6. **Assemble Display Stand:** Construct the clear display stand and attach Lugia to it.

## OPERATION

Once assembled, your Lugia model features a movable neck mechanism that allows its wings to flap. To activate this feature, gently move the neck of the Lugia figure. This action will cause the wings to move, simulating flight or a "powerful hurricane" effect.

- **Wing Flapping:** Gently manipulate Lugia's neck to engage the wing movement mechanism.

- **Display Stand:** Utilize the included display stand for stable presentation of your model.

## MAINTENANCE

---

To ensure the longevity and appearance of your Lugia model kit, follow these maintenance guidelines:

- **Cleaning:** Dust the model regularly with a soft, dry brush or a microfiber cloth. Avoid using harsh chemicals or abrasive materials.
- **Storage:** Store the model in a cool, dry place away from direct sunlight to prevent discoloration or material degradation.
- **Handling:** Handle the model by its base or sturdy parts to avoid stressing delicate joints or small components.

## TROUBLESHOOTING

---

If you encounter any issues during or after assembly, consider the following:

- **Loose Parts:** If a part feels loose, gently press it firmly into place. For persistent looseness, a small amount of hobby cement (not included) can be used, but this is generally not required for snap-fit kits.
- **Difficulty Assembling:** Ensure you are following the pictorial instructions precisely. Some parts may require a specific orientation or a bit more pressure to snap into place. Do not force parts if they do not fit; re-check the instructions.
- **Display Stand Instability:** Ensure all parts of the display stand are securely connected. If the model feels unstable on the stand, verify that Lugia is correctly attached to the stand's peg.
