

## MERCUSYS MS105G

# MERCUSYS MS105G 5-Port Gigabit Desktop Switch User Manual

Model: MS105G

## 1. INTRODUCTION

---

This manual provides instructions for the MERCUSYS MS105G 5-Port Gigabit Desktop Switch. The MS105G is designed to expand your wired network capacity, offering five 10/100/1000 Mbps auto-negotiation RJ45 ports. It is a plug-and-play device, requiring no configuration, making it ideal for home and small office network expansion.

## 2. PACKAGE CONTENTS

---

Verify the following items are included in your package:

- MERCUSYS MS105G 5-Port Gigabit Desktop Switch
- Power Adapter
- Quick Installation Guide

# Expand Ethernet Network with Gigabit Ports

UP TO  
**10X**  
FASTER

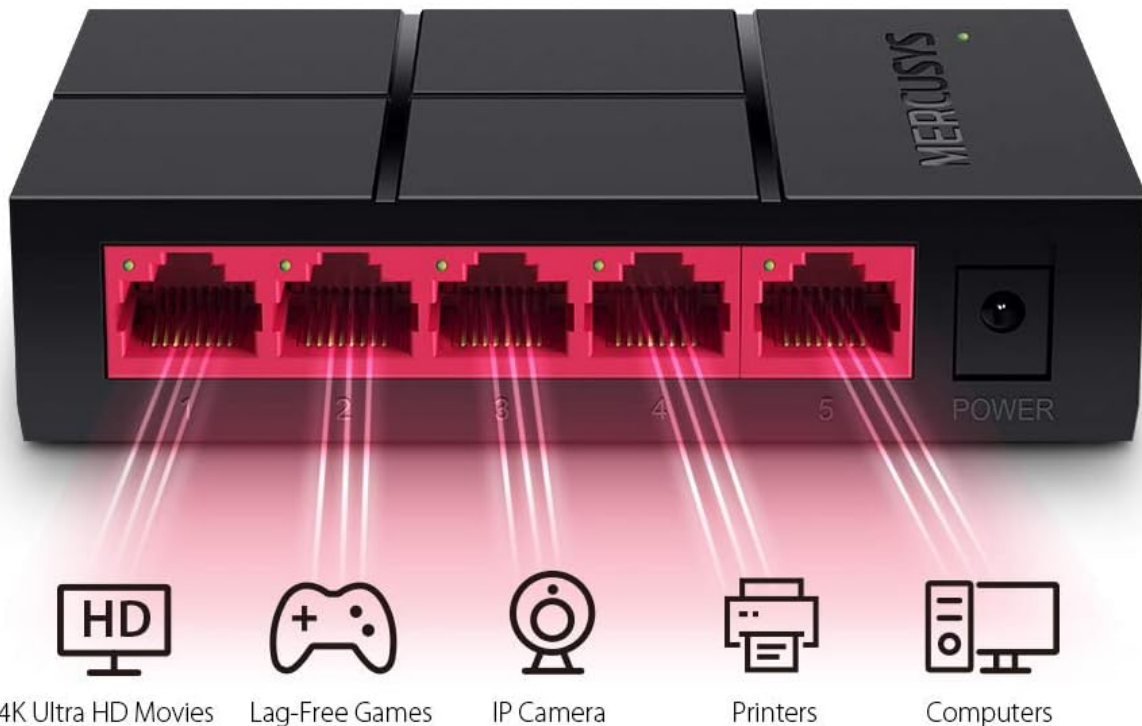

Image: The MERCUSYS MS105G switch, power adapter, and quick installation guide as found in the product packaging.

## 3. PRODUCT OVERVIEW

### 3.1 Front Panel

The front panel of the MS105G features five RJ45 ports and LED indicators for status monitoring.

Image: Front view of the MERCUSYS MS105G switch, showing the five RJ45 ports and the power input.

- **RJ45 Ports (1-5):** These ports support 10/100/1000 Mbps Ethernet connections. They automatically detect the speed of the connected device and adjust accordingly.
- **LED Indicators:** Each port has an associated LED. A solid green light indicates a stable link at 1000 Mbps. A solid orange light indicates a stable link at 10/100 Mbps. A blinking light indicates data activity.

### 3.2 Rear Panel

The rear panel typically contains the power input port.

- **Power Port:** Connect the provided power adapter here.

## 4. SETUP

---

The MS105G switch is designed for simple plug-and-play installation. Follow these steps to set up your device:

1. **Power Off Devices:** Disconnect the power from your router, modem, and any devices you plan to connect to the switch.
2. **Connect the Switch:**
  - Connect your modem or router to any of the RJ45 ports on the MS105G using an Ethernet cable.
  - Connect your network devices (e.g., computers, smart TVs, game consoles, network printers) to the remaining RJ45 ports on the MS105G using Ethernet cables.
3. **Connect Power:** Connect the provided power adapter to the power port on the MS105G, then plug the adapter into a standard electrical outlet.
4. **Power On Devices:** Power on your modem, then your router, and finally your connected network devices.

The switch will automatically detect and configure the connections. The corresponding LED indicators for active ports will illuminate.

## Plug and Play

Just connect the switch to your TV or computer via an Ethernet cable to immediately expand your wired network

Image: Diagram illustrating the plug-and-play setup of the MERCUSYS MS105G switch, connecting it to an internet source and a computer.

## 5. OPERATING INSTRUCTIONS

The MERCUSYS MS105G is a non-managed switch, meaning it operates automatically without requiring any user configuration. Once connected as described in the Setup section, it will begin forwarding data between connected devices.

- **Automatic Negotiation:** Each port automatically detects the speed (10/100/1000 Mbps) and duplex mode (Half/Full Duplex) of the connected device.
- **Auto MDI/MDIX:** The switch automatically detects if a straight-through or crossover cable is needed, eliminating the need for specific cable types.
- **LED Indicators:** Observe the LED indicators on the front panel to confirm link status and activity for each port.

## 6. MAINTENANCE

To ensure optimal performance and longevity of your MS105G switch, consider the following maintenance

guidelines:

- **Placement:** Place the switch in a cool, dry location away from direct sunlight, heat sources, and excessive moisture. Ensure adequate ventilation around the device.
- **Cleaning:** Use a soft, dry cloth to clean the exterior of the switch. Do not use liquid or aerosol cleaners.
- **Cable Management:** Keep Ethernet cables neatly organized to prevent tangles and accidental disconnections.
- **Power Supply:** Use only the power adapter provided with the device.

## 7. TROUBLESHOOTING

---

If you encounter issues with your MS105G switch, refer to the following common troubleshooting steps:

- **No Power:**
  - Ensure the power adapter is securely connected to the switch and a working electrical outlet.
  - Verify the power outlet is functional by plugging in another device.
- **No Link/Activity on a Port:**
  - Check that the Ethernet cable is securely connected to both the switch port and the connected device.
  - Try a different Ethernet cable to rule out a faulty cable.
  - Ensure the connected device is powered on and its network adapter is functioning correctly.
  - Try connecting the device to a different port on the switch.
- **Slow Network Speed:**
  - Ensure all connected devices and cables support Gigabit Ethernet (Cat5e or Cat6 cables are recommended for Gigabit speeds).
  - Check the LED indicator for the port; a green light indicates a Gigabit connection, while an orange light indicates 10/100 Mbps.
  - Restart your modem, router, and the switch.

If problems persist, consult the MERCUSYS support website for further assistance.

## 8. SPECIFICATIONS

---

| Feature                | Description                                                       |

MERCUSYS

MERCUSYS TECHNOLOGIES CO., LTD.  
3rd Floor, Building P1-B, No. 23, Gaoxin 4th Road, South Hi-Tech Park,  
Nanshan, Shenzhen, P.R. China

PSTI STATEMENT OF COMPLIANCE

Manufacturer: Name: MERCUSYS TECHNOLOGIES CO., LTD.  
Address: 3rd Floor, Building P1-B, No. 23, Gaoxin 4th Road, South Hi-Tech Park,  
Nanshan, Shenzhen, P.R. China

Via, MERCUSYS TECHNOLOGIES CO., LTD. hereby declares that under its own  
responsibility, our devices fully comply with the applicable security requirements in  
Schedule 1 of The Product Security and Information Management (Security  
Requirements for Internet Connected Products) Regulations 2023.

Schedule 1 specifies security requirements that relate to manufacturers of relevant  
connectable products which includes the MERCUSYS brand and its subsidiaries. This  
includes the following:

1. Password is unique per device or defined by the user of the device, and the password  
which is unique per device is generated by using a security mechanism that reduces the  
risk of automated attack against a class or type of device.
2. Users can report vulnerabilities to MERCUSYS via  
<https://www.mercusys.com/na/security-advisory/>. Furthermore, users will receive  
acknowledgment of the receipt of a security issue report and status updates until the  
reported security issue is resolved.
3. MERCUSYS will provide security updates for our products during the pre-defined  
support period. The defined support period will end 3 years after the product's end of the  
date. Up-to-date information concerning the defined support periods for the entire  
MERCUSYS product range are listed below.

| Products            | Model/Name           | Defined<br>Period    | Support |
|---------------------|----------------------|----------------------|---------|

MERCUSYS

5-Port 2.5G Multi-Gigabit Desktop Switch Model: MS105GS-M2

Dataset

5-Port 2.5G Multi-Gigabit Desktop Switch Model: MS105GS-M2

Highlights

- 5x 2.5-Gigabit ports unlock the highest performance of your Multi-Gig bandwidth and devices, providing up to 25 Gbps of switching capacity.
- Provides secure fast connections to 25G NAS, 2.5G Server, gaming consoles, 5G Wi-Fi (IEEE 802.11be), etc.
- Easily upgrade to 2.5 Gbps without the need to upgrade to Cat6 wiring, reducing wiring costs and hassle.
- Built-in 4 Gigabits frame transmission and processing ability, and support for PoE.
- Easily ready for new design enterprise applications, ideal for more versatile environments.
- Supports easy plug-and-play setup, no configuration required.
- Easy installation, no configuration required.

MERCUSYS

MERCUSYS TECHNOLOGIES CO., LTD.  
3rd Floor, Building R1-B, No. 23, Gaoxin 4th Road, South Hi-Tech Park,  
Nanshan, Shenzhen, P.R. China

PSTI STATEMENT OF COMPLIANCE

Manufacturer:

Name: MERCUSYS TECHNOLOGIES CO., LTD.  
Address: 3rd Floor, Building R1-B, No. 23, Gaoxin 4th Road, South Hi-Tech Park,  
Nanshan, Shenzhen, P.R. China

We, MERCUSYS TECHNOLOGIES CO., LTD. hereby declare that under our own responsibility, our devices fully comply with the applicable security requirements in Schedule 1 of The Product Security and Telecommunications Infrastructure (Security Requirements for Relevant Connectable Products) Regulations 2023.

Schedule 1 specifies security requirements that relate to manufacturers of relevant connectable products which includes the MERCUSYS brand and its subsidiaries. This includes the following:

1. Password is unique per device or defined by the user of the device, and the password which is unique per device is generated by using a security mechanism that reduces the risk of automated attack against a class or type of device.
2. Users can report vulnerabilities to MERCUSYS via <https://www.mercusys.com.cn/forsecurity/advisory/>. Furthermore, users will receive acknowledgment of the receipt of a security issue report and status updates until the reported security issue is resolved.
3. MERCUSYS will provide security updates for our products during the pre-defined support period. The defined support period will end 3 years after the product's end-of-life date. Up-to-date information concerning the defined support periods for the entire MERCUSYS product range are listed below.

Products:

| Product/Model Name  | Model Number                | Defined Period        | Support |
|---------------------|-----------------------------|-----------------------|---------|
| 5-Port 2.5G Wi-Fi   |                             |                       |         |
