TEMPO STYLE F-TU061

TEMPO STYLE Toscana Plus Mspa Tuscany Hot Tub User Manual

Model: F-TU061 (6-Person)

1. INTRODUCTION

Welcome to the user manual for your TEMPO STYLE Toscana Plus Mspa Tuscany rigid hot tub. This portable spa is designed to provide a unique hydromassage experience for up to 6 people. Its contemporary design features durable PVC wood-effect panels and offers easy installation for enhanced portability. This manual provides essential information for the safe and efficient setup, operation, and maintenance of your hot tub.

2. SAFETY GUIDELINES

Please read all safety instructions carefully before installing and using your hot tub. Failure to follow these instructions could result in injury or damage to the product.

- Always supervise children in and around the hot tub.
- Do not use the hot tub if you are pregnant, have a heart condition, or other serious medical conditions, without consulting a physician.
- Avoid using electrical appliances near the hot tub.
- Ensure the hot tub is placed on a flat, stable, and level surface capable of supporting its full weight when filled with water and occupants.
- Do not operate the hot tub if the water temperature exceeds 40°C (104°F).
- Keep chemicals out of reach of children and follow manufacturer's instructions for water treatment.
- Always disconnect power before performing any maintenance or cleaning.

3. SETUP INSTRUCTIONS

3.1 Unpacking

- Carefully remove all components from the packaging.

- Verify that all parts listed in the 'What's in the Box' section are present.

3.2 Placement

- Choose a suitable location for your hot tub. The surface must be flat, level, and strong enough to support the weight of the filled spa (approximately 1200 kg plus occupants).
- Ensure there is adequate drainage and access to a power outlet.
- Place the upgraded heat preservation foam mat (9 pieces) on the chosen surface before assembling the spa.

3.3 Assembly

1. Assemble the PVC wood-effect panels to form the octagonal structure. These panels are designed for easy interlocking without special tools.
2. Insert the robust inner liner into the assembled structure, ensuring it fits snugly against the walls.
3. Connect the hot tub to the external control unit using the provided hoses.
4. Inflate the inflatable bladder (thermal cushion air chamber) using the internal motor. No external compressor is required.
5. Fill the hot tub with water to the recommended level.
6. Install the filter cartridges into their designated housing.

4. OPERATING YOUR HOT TUB

4.1 Control Panel Overview

The external control unit features a digital display and buttons for managing all hot tub functions.

Image: Close-up of the digital control panel, showing buttons for heater, bubbles, ozone, filter, timer, and temperature adjustment.

- **Heater Button:** Activates or deactivates the water heating function.
- **Bubble Button:** Controls the hydromassage (air jets) with 3 adjustable speeds.
- **Filter Button:** Manages the water filtration system.
- **Ozone Button:** Activates the ozone therapy function for water purification.
- **Temperature Adjustment (+/-):** Sets the desired water temperature, up to 42°C.
- **Timer Button:** Programs the operating time for various functions.

4.2 Heating the Water

Press the 'Heater' button on the control panel. Use the '+' and '-' buttons to set your desired water temperature. The hot tub can heat water up to 42°C (107.6°F). Heating time will vary based on initial water temperature and ambient conditions.

4.3 Activating Hydromassage (Bubbles)

Press the 'Bubble' button to activate the air jets. You can cycle through three different hydromassage speeds by pressing the button repeatedly to find your preferred intensity.

4.4 Water Filtration

The filtration system operates automatically to keep the water clean. You can manually activate or deactivate it using the 'Filter' button. Regular filtration is crucial for water hygiene.

4.5 Ozone Therapy

The integrated ozone generator assists in water purification. Activate this function using the 'Ozone' button on the control panel. Ozone therapy helps reduce the need for chemical sanitizers.

5. MAINTENANCE AND CARE

5.1 Water Chemistry

Maintain proper water chemistry by regularly testing pH levels and sanitizer levels. Follow guidelines for adding appropriate spa chemicals to ensure safe and clean water.

5.2 Filter Cartridge Cleaning and Replacement

- Clean the filter cartridges weekly by rinsing them with a garden hose.
- Replace filter cartridges every 1-2 months, or more frequently depending on usage and water quality.

5.3 Draining and Cleaning

Drain and clean your hot tub every 1-3 months. Use a mild, non-abrasive cleaner specifically designed for hot tubs. Rinse thoroughly before refilling.

5.4 Winterization (Anti-freeze Function)

The hot tub features an anti-freeze function to protect components in cold weather. For prolonged periods of non-use in freezing temperatures, it is recommended to fully drain the hot tub and store it indoors if possible. If left outdoors, ensure the anti-freeze function is active and consider additional insulation.

6. TROUBLESHOOTING GUIDE

Refer to this section for common issues and their potential solutions.

Problem	Possible Cause	Solution
Hot tub not heating	Heater not activated; low water level; dirty filter; ambient temperature too low.	Ensure heater is on; check water level; clean/replace filter; allow more time for heating.
No bubbles/weak hydromassage	Bubble function off; air blower issue.	Activate bubble function; check for obstructions in air jets.
Water cloudy/unclean	Dirty filter; improper water chemistry; insufficient filtration time.	Clean/replace filter; test and adjust water chemistry; increase filtration time.
Error code on display	Specific system malfunction.	Refer to the full owner's manual for specific error code definitions and solutions, or contact customer support.

7. PRODUCT SPECIFICATIONS

Feature	Specification
Model Number	F-TU061
Dimensions (L x W x H)	193 x 193 x 73 cm (76 x 76 x 29 inches)
Net Weight	41 kg (90.4 lbs)
Water Capacity	1200 Litres (317 US Gallons)
Seating Capacity	6 Adults
Air Jets	138
Control System	220 - 240V / 50Hz
Heater Power	1500W
Massage Air Blower	720W (3 Levels: 300W, 500W, 720W)
Filter Pump	1800 L/Hr
Integrated Ozone Generator	5.5W
Ozone Output	30 - 50 mg/hour
Material	Polychlorure de vinyle (PVC)
Color	Grey

8. WARRANTY AND CUSTOMER SUPPORT

Your TEMPO STYLE Toscana Plus Mspa Tuscany hot tub comes with a manufacturer's warranty. Please refer to the warranty card included in your product packaging for specific terms, conditions, and duration. For technical assistance, troubleshooting beyond this guide, or warranty claims, please contact TEMPO STYLE customer support. Contact information can typically be found on the manufacturer's website or in the full owner's manual provided with your purchase.
