Aesfee AF-809RB

Aesfee AF-809 Series Rotary Electric Shaver Replacement Blades User Manual

Model: AF-809RB

INTRODUCTION

This manual provides essential instructions for the proper installation, use, and maintenance of your Aesfee AF-809 Series Rotary Electric Shaver Replacement Blades. Adhering to these guidelines will ensure optimal performance and longevity of your product.

These replacement heads are specifically designed for Aesfee AF-809 series rotary electric shavers, offering a comfortable and thorough shaving experience with their high-performance 3D floating cutter heads, ultra-thin double-track net, and self-sharpening steel blades.

COMPATIBILITY

These replacement shaver heads are exclusively designed for the **Aesfee AF-809 Series Rotary Electric Shavers**. Ensure your shaver model is compatible before installation.

KEY FEATURES

- **Double-Track Net Design:** High-performance 3D floating cutter heads with an ultra-thin double-track net for a close and comfortable shave.
- **Self-Sharpening Blades:** Equipped with self-sharpening steel blades for consistent cutting efficiency over time.
- **Premium Materials:** Crafted from precision stainless steel for durability and effective cutting.
- **Easy Replacement:** Designed for straightforward replacement, allowing users to easily refresh their shaver's performance.
- **Washable Design:** The entire head assembly is washable for easy and hygienic cleaning.

SETUP: BLADE REPLACEMENT

Follow these steps to replace the shaver blades:

1. **Power Off:** Ensure your Aesfee AF-809 series electric shaver is turned off and unplugged from any power source.
2. **Remove Old Head:** Carefully detach the existing shaver head assembly from the shaver body. Refer to your shaver's original manual for specific instructions on head removal if needed.
3. **Install New Head:** Align the new replacement head assembly (Model AF-809RB) with the shaver body. Gently press it into place until you hear a click, indicating it is securely fastened.
4. **Verify Secure Fit:** After installation, ensure that the entire shaving head assembly and the shaver body are completely and securely riveted together. A loose connection can lead to damage or improper function.

Image 2: Individual Aesfee Rotary Shaver Blade and Cutter. This image displays a single rotary blade and its corresponding cutter, highlighting the precision design of the cutting components.

OPERATING INSTRUCTIONS

Once the replacement blades are securely installed, your shaver is ready for use. The high-performance 3D floating cutter heads with their ultra-thin double-track net and self-sharpening steel blades are designed to provide a comfortable and thorough shaving experience.

- **Shaving Technique:** For best results, move the shaver in small, circular motions over your skin.
- **Skin Preparation:** Shave on clean, dry skin for optimal performance.

MAINTENANCE AND CLEANING

Regular cleaning and maintenance are crucial for maintaining the performance and hygiene of your shaver blades.

1. **Daily Cleaning:** After each shave, detach the shaver head and rinse it thoroughly under running water. The entire head assembly is washable.
2. **Drying:** Allow the shaver head to air dry completely before reattaching it to the shaver body or storing it.

3. **Replacement Recommendation:** For maximum shaving performance and hygiene, it is recommended to replace the shaving unit (blades and head assembly) every **12 months**.

TROUBLESHOOTING AND SAFETY WARNINGS

- **Damaged Head:** If you find that the shaver head is damaged (e.g., cracked, bent blades), **do not use it**. Immediately replace it with a new, undamaged head assembly to prevent injury or further damage to the shaver.
- **Loose Connection:** Always ensure that the shaving head and shaver body are securely fixed after replacement. A loose connection can affect shaving performance and potentially cause damage.
- **Regular Replacement:** To maintain optimal performance and hygiene, adhere to the recommended 12-month replacement schedule for the shaving unit.
