DELUX M618PLUS RGB

DELUX M618PLUS RGB Ergonomic Vertical Mouse User Manual

Brand: DELUX

1. INTRODUCTION

This manual provides comprehensive instructions for the DELUX M618PLUS RGB Ergonomic Vertical Mouse. Designed for right-handed users, this wired optical mouse features an ergonomic vertical design to promote a natural hand posture, reducing wrist strain. It includes customizable RGB lighting, 6 programmable buttons, and adjustable DPI settings up to 4000 DPI (expandable to 12800 DPI via software). A removable wrist rest enhances comfort during extended use. Please read this manual thoroughly before using the product.

The DELUX M618PLUS RGB mouse is equipped with the following components:

- **Left Button:** Standard left-click function.
- **Scroll Wheel:** For vertical scrolling and middle-click functionality.
- **Right Button:** Standard right-click function.
- **Forward Button:** Navigates forward in web browsers or file explorers.
- **Backward Button:** Navigates backward in web browsers or file explorers.
- **DPI Shift Button:** Adjusts the mouse sensitivity (DPI).
- **Removable Wrist Rest:** Provides additional support for the wrist, detachable for user preference.
- **RGB Lighting:** Customizable lighting effects.

4. SETUP INSTRUCTIONS

The DELUX M618PLUS RGB mouse is a wired device, ensuring a stable and reliable connection.

1. **Connect the Mouse:** Insert the USB connector of the mouse into an available USB port on your computer.
2. **Driver Installation (Automatic):** For most operating systems (Windows XP, Vista, 7, 8, 10), the mouse will be recognized automatically, and standard drivers will be installed.
3. **Optional Software Installation:** To unlock full customization options, including programmable buttons, advanced RGB effects, and DPI settings up to 12800, download and install the official DELUX driver software. Refer to the DELUX official website for the latest driver.

5. OPERATING INSTRUCTIONS

5.1 Ergonomic Hand Position

The vertical design of the M618PLUS RGB mouse encourages a natural handshake grip, aligning your wrist and forearm in a more neutral position. This design aims to reduce muscle strain and discomfort associated with traditional mouse use.

PRISE TRADITIONNELLE

Une posture inconfortable provoque une compression des nerfs et des douleurs dans la main.

POIGNÉE DE MAIN NATURELLE

Réduit efficacement le syndrome du canal carpien

Image: A visual comparison illustrating the difference in wrist and forearm posture between using a traditional mouse (left, showing wrist pronation) and the DELUX ergonomic vertical mouse (right, showing a natural handshake grip).

New users may require an adaptation period, typically around one week, to become accustomed to the vertical orientation.

5.2 DPI Adjustment

The mouse features 5 adjustable DPI levels: 800, 1200, 1600, 2400, and 4000 DPI. You can cycle through these settings using the dedicated DPI Shift button located on the side of the mouse. This allows you to quickly adjust cursor speed and precision to suit different tasks.

For advanced users, installing the DELUX driver software enables DPI adjustment up to 12800 DPI, providing even finer control.

5.3 RGB Lighting Control

The M618PLUS RGB mouse features dynamic RGB chasing lighting. To turn the lights on or off, locate the switch at the bottom of the mouse. Further customization of lighting effects can be achieved through the DELUX driver software.

5.4 Programmable Buttons and Software

All 6 buttons on the mouse are programmable using the DELUX driver software. This allows you to assign custom functions, define lighting effect modes, and create macros for enhanced productivity or gaming. Once configured, settings are stored in the mouse's memory.

6. MAINTENANCE AND CARE

To ensure the longevity and optimal performance of your DELUX M618PLUS RGB mouse, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to wipe the surface of the mouse. For stubborn dirt, a slightly damp cloth can be used, but ensure no liquid enters the mouse. Avoid abrasive cleaners or solvents.
- **Sensor Care:** Keep the optical sensor on the underside of the mouse clean and free from dust or debris to maintain tracking precision.
- **Cable Management:** Avoid sharp bends or excessive pulling on the USB cable to prevent damage.
- **Storage:** When not in use for extended periods, store the mouse in a clean, dry environment.

7. TROUBLESHOOTING

If you encounter issues with your DELUX M618PLUS RGB mouse, refer to the following common problems and solutions:

| Problem | Possible Cause | Solution |
|---|--|--|
| Mouse not responding. | Loose USB connection, faulty USB port, driver issue. | Ensure the USB cable is securely plugged in. Try a different USB port. Restart your computer. Reinstall the mouse driver if necessary. |
| Cursor movement is erratic or imprecise. | Dirty optical sensor, unsuitable surface, incorrect DPI setting. | Clean the optical sensor. Use the mouse on a clean, non-reflective surface (e.g., a mouse pad). Adjust the DPI setting using the DPI shift button. |
| RGB lighting is off. | RGB switch is off. | Check the RGB on/off switch located at the bottom of the mouse. |
| Difficulty adapting to the vertical design. | New ergonomic form factor. | An adaptation period of at least one week is common for new users. Continue using the mouse to allow your hand and wrist to adjust. |
| Removable wrist rest detaches easily. | Normal design, or potential wear. | Ensure it is properly attached. If it consistently detaches and causes inconvenience, consider using a small amount of adhesive if permanent attachment is desired. |
| Side buttons not working on Mac. | Driver incompatibility with macOS. | The DELUX driver software is not compatible with macOS. While the basic mouse functions (left/right click, scroll) work on Mac, the side buttons are not available for customization or use. |

8. SPECIFICATIONS
