Installation Instructions

Follow these steps to install or replace your GLACIER FRESH water filter. No tools are typically required for installation.

1. **Locate the Filter:** The water filter is usually located in the lower right section of your Samsung refrigerator.
2. **Unlock the Old Filter:** Gently turn the old filter counter-clockwise to the "unlock" position. Some force may be required if the filter is tightly secured.
3. **Remove the Old Filter:** Pull the old filter straight out. Be prepared for a small amount of water to drip.
4. **Prepare the New Filter:** Remove the protective cap from the new GLACIER FRESH filter.
5. **Insert the New Filter:** Align the new filter with the filter housing and push it firmly into place.
6. **Lock the New Filter:** Turn the new filter clockwise until it locks securely into position. The arrow on the filter should align with the lock indicator.
7. **Flush the System:** After installation, dispense approximately 2-3 gallons of water through the refrigerator's dispenser to flush out any air and carbon fines. This ensures optimal performance and taste.
8. **Reset Filter Indicator:** Refer to your refrigerator's manual for specific instructions on how to reset the filter indicator light. This usually involves pressing and holding the "Water" or "Filter Reset" button for 3-5 seconds.

Operating Instructions

Once installed, the filter operates automatically as water is dispensed from your refrigerator. Ensure the filter is securely locked to prevent leaks and maintain proper water flow.
For optimal performance, always flush the system with 2-3 gallons of water after installing a new filter. This removes any trapped air and loose carbon particles, ensuring clear, fresh-tasting water.

Maintenance

To maximize contaminant reduction and ensure the best water quality, replace your GLACIER FRESH water filter every **6 months** or after filtering **300 gallons** of water, whichever comes first.

Troubleshooting

- **Slow Water Flow:** This often indicates a clogged filter. Replace the filter if it's past its recommended lifespan. Ensure the new filter is correctly installed and fully locked.
- **Cloudy Water or Unusual Taste/Odor:** This can occur immediately after installation due to air or carbon fines.

Flush the system with 2-3 gallons of water. If the issue persists, ensure the filter is properly seated and consider replacing it if it's old.

- **Leaks:** Ensure the filter is fully inserted and rotated to the locked position. Check the O-rings on the filter for any damage.
- **Filter Indicator Light Remains On:** After replacing the filter, you must manually reset the filter indicator light on your refrigerator. Consult your refrigerator's user manual for specific instructions.
