

MANHATTAN 179317

Manhattan Stereo Headset User Manual

Model: 179317

INTRODUCTION

Thank you for purchasing the Manhattan Stereo Headset. This lightweight over-ear headset is designed for comfortable communication, gaming, and multimedia use, featuring a built-in adjustable microphone and two 3.5 mm plugs for audio and microphone connections. Please read this manual carefully to ensure proper setup and operation.

PACKAGE CONTENTS

- Manhattan Stereo Headset (Model: 179317)
- Integrated 6 ft. (1.8 m) connecting cable with dual 3.5 mm plugs

FEATURES

- **Comfortable Communication:** Adjustable headband and cushioned over-ear speakers for a comfortable fit.
- **Adjustable Microphone:** Boom-style microphone that stays in place.
- **Superfast Setup:** Two 3.5 mm plugs (one for audio, one for mic) for immediate use.
- **Extended Cable:** Long 6 ft. (1.8 m) cable for ample movement.
- **Lightweight Design:** Weighs less than a quarter of a pound to prevent neck strain.

- **Noise Reduction:** Over-ear cushions help block outside noise.
- **In-line Controls:** Volume control on the cable.

SETUP

1. **Identify Audio Ports:** Locate the 3.5 mm audio output (usually green or with a headphone icon) and microphone input (usually pink or with a microphone icon) ports on your computer, laptop, or compatible device.
2. **Connect Audio Plug:** Insert the green 3.5 mm plug from the headset cable into your device's audio output port.
3. **Connect Microphone Plug:** Insert the pink 3.5 mm plug from the headset cable into your device's microphone input port.
4. **Adjust Headset Fit:** Place the headset over your ears. Adjust the headband by sliding the earcups up or down until they fit comfortably and securely. The over-ear cushions should fully cover your ears.
5. **Position Microphone:** Adjust the flexible boom microphone to a position near your mouth for optimal voice pickup.

Figure 2: Close-up view of the dual 3.5mm audio and microphone plugs, along with the in-line volume control on the headset cable.

OPERATING INSTRUCTIONS

Audio Playback

- Once connected, your device should automatically detect the headset.
- Play audio from your device (music, video, game). Sound should now be routed through the headset.
- Use the in-line volume control wheel on the headset cable to adjust the listening volume.
- You may also need to adjust the volume settings within your device's operating system.

Microphone Usage

- For voice communication (e.g., video calls, online gaming), ensure the microphone is positioned correctly near your mouth.
- Most applications will automatically use the connected microphone. You may need to select the "Microphone (Manhattan Headset)" or similar option in your application's audio settings.
- To mute the microphone, use the mute switch located on the in-line control unit.
- Adjust microphone input levels through your device's sound settings.

MAINTENANCE AND CARE

- **Cleaning:** Use a soft, dry cloth to clean the headset. Do not use abrasive cleaners or solvents.
- **Storage:** Store the headset in a cool, dry place when not in use. Avoid extreme temperatures.
- **Cable Care:** Do not pull on the cable to disconnect the plugs. Always grasp the plug itself. Avoid sharp bends or kinks in the cable.
- **Handling:** Handle the headset gently. Avoid dropping or subjecting it to strong impacts.

TROUBLESHOOTING

Problem	Possible Cause	Solution
No sound from headset	Incorrect plug connection	Ensure green plug is fully inserted into audio output.
	Volume too low	Increase volume using in-line control and device settings.
	Incorrect audio output selected	Verify headset is selected as default audio output in device settings.
	Faulty audio port	Test with another audio port or device.
Microphone not working	Incorrect plug connection	Ensure pink plug is fully inserted into microphone input.
	Microphone muted	Check if the in-line mute switch is off.
	Incorrect microphone input selected	Verify headset mic is selected as default input in device settings.
	Microphone level too low	Increase microphone input level in device settings.
Sound distortion or static	Faulty microphone port	Test with another microphone port or device.
	Loose connection	Reseat both 3.5 mm plugs firmly.
	Interference	Move away from other electronic devices that might cause interference.
	Damaged cable/headset	Inspect cable for damage. If damaged, contact support.
