

Hot Spring 71325-2 Pack

Hot Spring Spas Jetsetter Freshwater Ag+ Continuous Silver Ion Cleaner

USER MANUAL

1. Product Overview

The Hot Spring Spas Jetsetter Freshwater Ag+ Continuous Silver Ion Cleaner is designed to keep your spa water clean and crystal clear. This product utilizes metallic silver ions to continuously sanitize your spa water, reducing the need for traditional chemical sanitizers.

This package includes two (2) units of the Freshwater Mineral Spa Sanitizer, each formulated to treat up to 500 gallons of spa water.

This image displays two retail boxes of the Hot Spring Freshwater Mineral Spa Sanitizer. Each box features the product name, 'FreshWater® Mineral Spa Sanitizer', and states its purpose: 'Keeps spa water clean and crystal clear!'. Key information such as active ingredients (Metallic Silver** 0.92%), other ingredients (99.08%), net contents (98 grams or 0.22 lbs.), and spa capacity (Up to 500 gallons) are visible. Important safety warnings, 'KEEP OUT OF REACH OF CHILDREN CAUTION', along with EPA registration and establishment numbers, are also prominently displayed. The 'Nature2 Mineral Sanitize for Spas' logo is at the bottom of each box.

2. Safety Information

KEEP OUT OF REACH OF CHILDREN

CAUTION: See back panel for additional precautionary statements.

This product contains metallic silver. Avoid contact with eyes, skin, and clothing. In case of contact, rinse thoroughly with water. If irritation persists, seek medical attention. Do not ingest. If swallowed, call a poison control center or doctor immediately.

Store in a cool, dry place, away from direct sunlight and incompatible materials. Keep container tightly closed when not in use.

3. Setup and Installation

The Freshwater Ag+ Continuous Silver Ion Cleaner is designed for easy installation into compatible Hot Spring, Tiger River, Hotspot, Solana, and Limelight hot tubs. Specific installation instructions may vary slightly depending on your spa model. Always refer to your spa's owner's manual for precise guidance on where to insert the silver ion cartridge.

1. Ensure your spa is clean and balanced according to your spa manufacturer's recommendations before installing the new cartridge.
2. Locate the designated filter or cartridge housing within your spa.
3. Carefully unpackage the Freshwater Ag+ Continuous Silver Ion Cleaner.
4. Insert the cartridge into the designated housing. Ensure it is securely seated.
5. Once installed, the silver ions will begin to release into the spa water, providing continuous sanitization.

4. Operating Instructions

The Freshwater Ag+ Continuous Silver Ion Cleaner works passively to maintain water quality. It continuously releases silver ions into the spa water, which act as a natural sanitizer to inhibit bacterial growth and keep the water clear.

- **Water Testing:** Regularly test your spa water for pH, alkalinity, and calcium hardness. Maintain these levels within the recommended ranges for optimal performance of the silver ion cleaner and overall water balance.
- **Supplemental Sanitizer:** While the silver ion cleaner provides continuous sanitization, it is often recommended to use a small amount of a supplemental sanitizer (e.g., chlorine or bromine) as a shock treatment, especially after heavy use or if water appears cloudy. Consult your spa dealer for specific recommendations.
- **Filtration:** Ensure your spa's filtration system is operating correctly and that filters are cleaned regularly to support water clarity.

5. Maintenance

The Freshwater Ag+ Continuous Silver Ion Cleaner is designed for a specific lifespan, typically around four months, depending on spa usage and water chemistry. After this period, the effectiveness of the silver ions will diminish, and the cartridge should be replaced.

- **Replacement:** Replace the silver ion cartridge approximately every four months, or as indicated by your spa's maintenance schedule or water quality.
- **Disposal:** Dispose of used cartridges according to local regulations for household waste.
- **Spa Cleaning:** Continue with regular spa cleaning routines, including filter cleaning and periodic draining and refilling of the spa, as recommended by your spa manufacturer.

6. Troubleshooting

If you experience issues with water quality while using the Freshwater Ag+ Continuous Silver Ion Cleaner, consider the following:

- **Cloudy Water:**
 - Check and balance your water chemistry (pH, alkalinity, calcium hardness).

- Ensure your spa filters are clean and the filtration system is running adequately.
- Perform a shock treatment with a compatible supplemental sanitizer.
- Verify the silver ion cartridge is not expired and is properly installed.

• **Algae Growth:**

- Increase circulation and filtration time.
- Perform a shock treatment.
- Ensure the cartridge is not expired.

• **Odor:**

- Perform a shock treatment.
- Check for proper water balance.
- Consider draining and refilling the spa if the odor persists.

For persistent issues, consult your authorized Hot Spring Spas dealer.

7. Specifications

Attribute	Detail
Brand	Hot Spring
Model	Jetsetter Freshwater Ag+ Continuous Silver Ion Cleaner (71325-2 Pack)
Item Form	Tablet / Cartridge
Product Benefits	Kills Bacteria, Prevents Stains
Active Ingredients	Metallic Silver** (0.92%)
Other Ingredients	99.08%
Net Contents (per unit)	98 grams (0.22 lbs.)
Number of Items	2 (Pack)
Spa Capacity	Up to 500 gallons (per unit)
UPC	600291238122
EPA Reg. No.	67712-15-73081
EPA Est. No.	91258-MEX-1
Manufacturer	Watkins Wellness
Item Weight (total)	15 ounces

8. Warranty and Support

Specific warranty information for the Hot Spring Spas Jetsetter Freshwater Ag+ Continuous Silver Ion Cleaner is typically provided at the point of purchase or can be obtained from your authorized Hot Spring Spas dealer. This product is generally considered a consumable item with a limited lifespan.

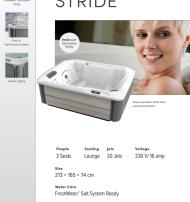

For technical support, product inquiries, or to purchase replacement cartridges, please contact your local authorized Hot Spring Spas dealer or visit the official Hot Spring Spas website.
