## Hot Spring 71325-2

# Limelight Flair Freshwater Ag+ Continuous Silver Ion Cleaner User Manual

Model: 71325-2

## 1. INTRODUCTION

---

This manual provides essential information for the proper use, installation, and maintenance of your Limelight Flair Freshwater Ag+ Continuous Silver Ion Cleaner. This product is designed to help keep your spa water clean and crystal clear by continuously releasing silver ions into the water.

### **Important Safety Information:**

**KEEP OUT OF REACH OF CHILDREN**

### **CAUTION**

Refer to the product packaging for additional precautionary statements and detailed active ingredient information.

**Figure 1:** Product packaging for the Limelight Flair Freshwater Ag+ Continuous Silver Ion Cleaner, showing two units. The packaging highlights 'FreshWater Mineral Spa Sanitizer' and states it 'Keeps spa water clean and crystal clear!'. It also lists active ingredients (Metallic Silver 0.92%) and other ingredients (99.08%), with a total of 100.00% from Silver Nitrate. Warnings include 'KEEP OUT OF REACH OF CHILDREN CAUTION' and references to EPA registration and establishment numbers, net contents (98 grams or 0.22 lbs), and spa capacity (Up to 500 gallons). The Nature2 Mineral Sanitize for Spas logo is visible at the bottom.

## 2. SETUP AND INSTALLATION

The Limelight Flair Freshwater Ag+ Continuous Silver Ion Cleaner is designed for use with Hot Spring, Tiger River, Hotspot, Solana, and Limelight hot tubs. Installation typically involves placing the cartridge into a designated filter compartment or a specific housing within your hot tub's filtration system.

1. **Consult your hot tub's owner's manual:** Before installation, refer to your specific hot tub model's instruction manual for precise guidance on where and how to install mineral sanitizers.

2. **Prepare the hot tub:** Ensure the hot tub is clean and balanced according to standard water chemistry guidelines before installing the new cleaner.
3. **Install the cartridge:** Carefully unpackage the silver ion cleaner cartridge. Locate the designated compartment in your hot tub, typically near the filter. Insert the cartridge as directed by your hot tub's manufacturer.
4. **Initial operation:** Once installed, ensure your hot tub's filtration system is running to allow water to flow through the cartridge and activate the silver ion release.

This product is effective for spas with a capacity of up to 500 gallons.

### 3. OPERATING INSTRUCTIONS

---

The Limelight Flair Freshwater Ag+ Continuous Silver Ion Cleaner works continuously to sanitize your spa water. Once installed, it requires minimal ongoing attention for its primary function.

- **Continuous Action:** The silver ions are released gradually into the water, providing a continuous sanitizing effect. This helps to keep the spa water clean and crystal clear.
- **Water Chemistry:** While this product aids in sanitation, it is still essential to regularly test and balance your spa water's pH, alkalinity, and calcium hardness levels.
- **Supplemental Sanitizer:** Depending on usage and bather load, a small amount of an approved supplemental sanitizer (e.g., chlorine or bromine) may still be required to maintain optimal water quality. Follow your hot tub manufacturer's recommendations.
- **Filtration:** Ensure your hot tub's filtration system operates for the recommended daily cycles to allow proper water circulation through the silver ion cleaner.

### 4. MAINTENANCE

---

Regular maintenance of your hot tub and the silver ion cleaner ensures optimal performance and longevity.

- **Cartridge Replacement:** The silver ion cleaner cartridge has a limited lifespan. Typically, these cartridges need to be replaced every four months or as recommended by your hot tub manufacturer or the product's specific instructions. Mark your calendar for replacement dates.
- **Filter Cleaning:** Regularly clean your hot tub filters to ensure proper water flow and filtration, which is crucial for the silver ion cleaner's effectiveness.
- **Water Draining and Refilling:** Periodically drain and refill your hot tub as recommended by your hot tub manufacturer, usually every 3-4 months, to maintain overall water quality.
- **Storage:** Store unused cartridges in their original packaging in a cool, dry place away from direct sunlight and chemicals.

### 5. TROUBLESHOOTING

---

If you encounter issues with your spa water quality, consider the following common troubleshooting steps:

- **Cloudy Water:**
  - Check and balance water chemistry (pH, alkalinity, calcium hardness).
  - Ensure filters are clean and not clogged.
  - Verify the silver ion cleaner cartridge is not expired and is properly installed.
  - Increase filtration cycles.
  - Consider shocking the water with an approved spa shock product.
- **Algae Growth:**

- Ensure adequate levels of supplemental sanitizer (chlorine/bromine) are present.
- Check for proper water circulation.
- Shock the spa water.

• **Unusual Odor:**

- Test and adjust water chemistry.
- Clean filters thoroughly.
- Consider draining and refilling the spa.

For persistent issues, consult your hot tub dealer or a qualified spa technician.

## 6. SPECIFICATIONS

<b>Product Name</b>	Limelight Flair Freshwater Ag+ Continuous Silver Ion Cleaner
<b>Model Number</b>	71325-2
<b>Brand</b>	Hot Spring
<b>Manufacturer</b>	Watkins Wellness
<b>ASIN</b>	B07RWGC8DC
