

Intermatic ET2145CP

Intermatic ET2145CP Electronic Timer Instruction Manual

Model: ET2145CP

1. INTRODUCTION

This manual provides comprehensive instructions for the installation, operation, and maintenance of your Intermatic ET2145CP Electronic Timer. This device is designed for 24-hour and 365-day operation, capable of handling up to 30 Amps at 120 to 277Vac. Please read this manual thoroughly before installation and use to ensure safe and proper functionality.

2. IMPORTANT SAFETY INFORMATION

WARNING: Risk of Fire or Electric Shock

- Disconnect power at the circuit breaker(s) or disconnect switch(es) before installing or servicing.
- More than one circuit breaker or disconnect switch may be required to de-energize the equipment before servicing.
- Installation and/or wiring must be in accordance with national and local electrical code requirements.
- Use **COPPER** conductors ONLY.
- Do **NOT** remove the insulator covering the terminals.

Figure 1: Front view of the Intermatic ET2145CP Electronic Timer, showing the digital display, control buttons (MODE, ENTER/NEXT, ON/OFF, CLEAR MEM, CLEAR ENTRY), and safety warning labels in multiple languages. The terminal block is visible at the bottom, covered by an insulator.

3. PRODUCT OVERVIEW

The Intermatic ET2145CP Electronic Timer features a clear digital display and intuitive controls for programming. Key components include:

- **Digital Display:** Shows current time, date, and programming information.
- **MODE Button:** Used to cycle through different programming modes (e.g., time setting, event programming).
- **ENTER/NEXT Button:** Confirms selections and advances to the next setting.
- **ON/OFF Buttons:** Used for manual override or to set ON/OFF times for programmed events.
- **CLEAR MEM Button:** Clears all programmed events or settings.
- **CLEAR ENTRY Button:** Clears the current entry during programming.
- **Up/Down Arrows:** Adjust values (time, date, event numbers).
- **Terminal Block:** For electrical wiring connections.

4. INSTALLATION INSTRUCTIONS

Follow these steps for proper installation of the Intermatic ET2145CP Electronic Timer:

1. **Power Disconnection:** Before beginning any work, ensure all power to the circuit is disconnected at the main circuit breaker or disconnect switch. Verify with a voltage tester.
2. **Access Wiring Terminals:** To access the wiring terminals, lift the plastic insulator covering the terminals. You may need to remove a screw and swing the insulator aside.
3. **Wiring Connections:** Connect the electrical wiring to the appropriate terminals. Ensure all connections are secure and comply with local and national electrical codes. Use only copper conductors.
4. **Secure Insulator:** Once wiring is complete, replace the plastic insulator covering the terminals and secure it with the screw (if applicable).
5. **Restore Power:** After ensuring all connections are correct and secure, restore power to the circuit.

5. OPERATING INSTRUCTIONS

5.1. Initial Setup: Setting Time and Date

1. Press the **MODE** button until the time/date setting option appears on the display.
2. Use the **Up/Down Arrows** to adjust the current hour. Press **ENTER/NEXT** to confirm.
3. Repeat for minutes, AM/PM (if applicable), year, month, and day.
4. Press **MODE** to exit the setting menu.

5.2. Programming ON/OFF Events

The timer supports multiple ON/OFF events. Refer to the display for available program slots.

1. Press the **MODE** button until 'PROGRAM' or 'EVENT' mode is displayed.
2. Use the **Up/Down Arrows** to select an event number (e.g., 1 ON, 1 OFF). Press **ENTER/NEXT**.
3. Set the desired ON time using the **Up/Down Arrows** and **ENTER/NEXT**.
4. Set the desired OFF time using the **Up/Down Arrows** and **ENTER/NEXT**.
5. Select the days of the week for this event to be active (e.g., Mon-Fri, Daily, Weekends). Press **ENTER/NEXT**.
6. Repeat for additional events as needed.
7. Press **MODE** to exit programming.

5.3. Manual Override

To temporarily override the programmed schedule:

- Press one of the **ON/OFF** buttons to manually switch the output ON or OFF.
- The timer will typically revert to its programmed schedule at the next scheduled event.

5.4. Clearing Memory

To clear all programmed events or reset the timer:

- Press and hold the **CLEAR MEM** button for a few seconds until the display confirms memory clear.
- Alternatively, use the **CLEAR ENTRY** button to clear individual entries during programming.

6. MAINTENANCE

The Intermatic ET2145CP Electronic Timer requires minimal maintenance. Ensure the unit is kept clean and free from dust and debris. Do not attempt to open the casing or repair the internal components, as there are no user-serviceable parts inside. For cleaning, use a soft, dry cloth. Avoid abrasive cleaners or solvents.

7. TROUBLESHOOTING

If you encounter issues with your timer, consider the following common troubleshooting steps:

- **No Display/No Power:** Check the circuit breaker or fuse supplying power to the timer. Ensure all wiring connections are secure.
- **Timer Not Switching:** Verify that the programmed events are correctly set and enabled. Check if the manual override is active.
- **Incorrect Time/Date:** Re-enter the correct time and date as per Section 5.1.
- **Erratic Behavior:** A power surge or interruption might cause erratic behavior. Try resetting the timer by pressing the **CLEAR MEM** button (this will erase all programs, requiring re-programming).

If problems persist after attempting these steps, contact Intermatic customer support for assistance.

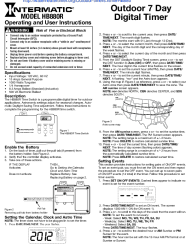

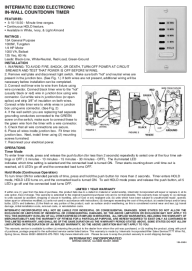

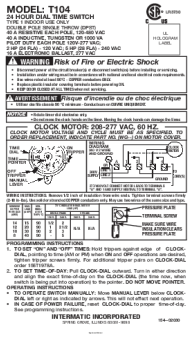

8. TECHNICAL SPECIFICATIONS

Specification	Value
Item Model Number	ET2145CP
Brand	Intermatic
Operation Mode	24 Hr. / 365 Days
Amps	30
Voltage	120 to 277Vac
Material	Plastic
Product Dimensions	4"D x 6.5"W x 10"H
Item Weight	2.25 Pounds
Manufacturer	Intermatic

9. WARRANTY AND CUSTOMER SUPPORT

For information regarding the product warranty, please refer to the warranty card included with your purchase or visit the official Intermatic website. For technical assistance, troubleshooting, or to inquire about replacement parts, please contact Intermatic customer support directly. Contact details can typically be found on the manufacturer's website or product packaging.

ET Basic+ Series
Electronic Controls

Features

- Available in 1 SPST, 1 SPST, 2 and 4 Circuit Models
- Available in 30-hour, 7-Day, and 7-Day Alternating On/Off (On/Off) Schedules
- Options include Type 1 Indoor, Type 3R Outdoor Metal, or Type 3R Indoor/Outdoor Plastic Enclosures
- Multi-volt operation from 120-277 VAC, 60 Hz, with auto-voltage selection
- Finger-safe terminals
- 2 and 4 Circuit models have configurable memory (P.L. No. 58A)
- All On and all Off Fixed time events
- 100-hour battery with scheduling capabilities
- 100-hour backup for elimination need for battery
- Optional Energy Saving mode of operation to maximize On/Off Schedules into a 2-hour countdown timer
- Works with Zero-Cross Technology to extend the life of the control
- Automatic recovery of circuits after power outage
- 10 A of Electronic SubstantLED per output
- USB port to easily copy and paste schedules from one control to another or simply backup schedules

Basic Plus Series

ET2000 Series
500VAC ELECTRONIC TIME SWITCHES

The ET2000 Series offers an easy-to-use interface, with all settings displayed on the large, backlit LCD screen. It is easy to program, and the controls are designed to be reliable, durable, and long-lasting. It is available in 1, 2, 3, 4, and 5 circuit models, and is designed to be used in a variety of applications. The controls are designed to be used in a variety of applications, and are designed to be used in a variety of applications.
