KES A4126A

KES Glass Shelves for Bathroom Instruction Manual

Model: A4126A

PRODUCT OVERVIEW

The KES Glass Shelves are designed to provide stable and rust-resistant storage solutions for your bathroom, kitchen, or living room. Made with an aluminum frame and 8MM extra-thick tempered glass, these shelves offer durability and safety.

Key Features:

- **Upgraded Brackets:** Enhanced stability for a snug fit against the wall, supporting up to 11 lbs (5 kg).
- **Rust-Proof Construction:** Aluminum frame and 304 stainless steel screws ensure resistance to rust, ideal for humid environments.
- **Extra-Thick Tempered Glass (8mm):** Safe and kid-friendly, designed to crumble into small granular chunks if broken, reducing injury risk.
- **Space-Saving Design:** Compact depth of 4.72 inches provides ample storage without occupying excessive space.
- **Complete Hardware Included:** Comes with all necessary screws, anchors, and detailed installation instructions.

PART LIST

Before beginning installation, please ensure all components listed below are present in your package. If any parts are missing or damaged, contact customer support for assistance.

Item No.	Component	Quantity
1	Guardrail	2
2	Tempered Glass	2
3	Short Mounting Plate	4
4	Bracket	4
5	Hardware Pack (screws, anchors)	2
6	Installation Instructions	1

INSTALLATION GUIDE

Follow these steps carefully for a secure and stable installation. It is recommended to have a level, drill, hammer, Philips screwdriver, and pencil ready.

Step 1: Assemble the Shelf Frame

Attach the guardrails to the short mounting plates and brackets. Ensure the pieces are aligned correctly and screws are flush. While assembling, the unit may feel flimsy, but it will become sturdy once mounted to the wall.

Upgraded Brackets

- Fit tightly on the wall
- More stable

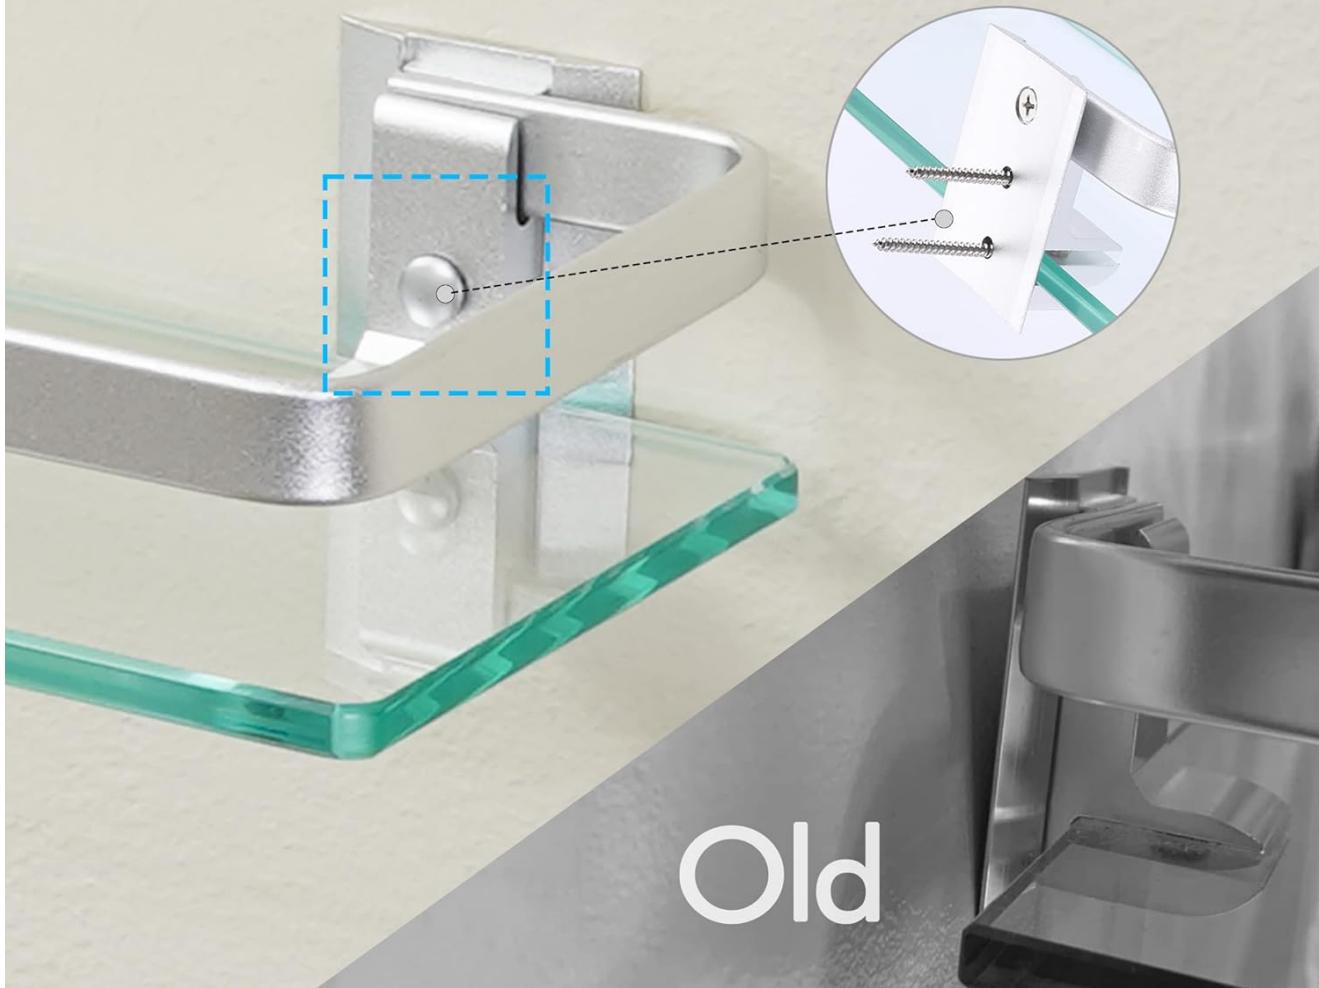

Image: Illustration of the upgraded bracket design for enhanced stability.

Step 2: Mark Drilling Locations

Hold the assembled shelf against the desired wall location. Use a level to ensure it is perfectly horizontal. Mark the drilling points for the wall mounts with a pencil. For optimal results, use a real level rather than a phone application.

Step 3: Drill Holes and Insert Anchors

Drill holes at the marked locations. A drill bit size of 11/64 inches is often recommended for the provided anchors. Gently tap the drywall anchors into the drilled holes with a hammer until they are flush with the wall surface.

Step 4: Mount the Shelf

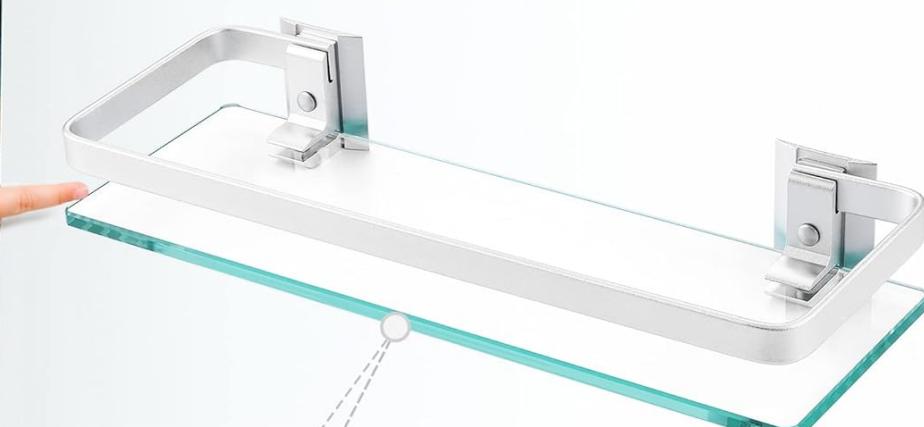

Align the shelf's mounting plates with the installed anchors. Secure the shelf to the wall using the provided screws. Ensure all screws are tightened firmly for maximum stability. If installing multiple shelves, consider securing one side first, then leveling and securing the other side for easier alignment.

TEMPERED GLASS

kid-friendly **safe use** **round edge**

When broken, crumbles into small granular chunks instead of splintering into jagged shards as plate glass does, less likely to cause injury.

① Guardrail (x2) ② Tempered Glass (x2) ③ Short Mounting Plate (x4)
④ Bracket (x4) ⑤ Hardware Pack ⑥ Installation Guide

Image: The 8mm thickness of the tempered glass ensures durability.

CARE AND MAINTENANCE

To maintain the appearance and longevity of your KES Glass Shelves, follow these simple care instructions:

- **Cleaning:** Wipe the glass and aluminum surfaces with a dry, soft cloth. For stubborn marks, a mild glass cleaner can be used on the glass, followed by a dry wipe. Avoid abrasive cleaners or scouring pads, as they may scratch the finish.
- **Rust Prevention:** The aluminum frame and stainless steel screws are designed to be rust-resistant. However, regular cleaning in humid environments like bathrooms will help prevent mineral buildup and maintain their pristine condition.
- **Inspection:** Periodically check the mounting screws to ensure they remain tight and secure.

Rustproof Aluminum

- Anti-corrosion
- Rustproof

TROUBLESHOOTING

Shelf Appears Uneven After Installation:

If the shelf appears uneven, it is likely due to inaccurate leveling during installation. Re-check the level of the shelf and adjust the mounting points as necessary. It is crucial to use a reliable level during the marking and drilling stages.

Shelf Feels Flimsy Before Mounting:

The shelf assembly may feel less rigid before it is fully secured to the wall. This is normal. Once all screws are tightened and the unit is properly mounted, it will become stable and secure.

Glass Breakage:

The shelves are made from 8mm extra-thick tempered glass. In the rare event of breakage, tempered glass is designed to shatter into small, granular pieces rather than sharp shards, significantly reducing the risk of injury. This is a safety feature.
