COOSPIDER 4.2L, 380ml/hr

COOSPIDER Reptile Fogger Humidifier Mister

Model: 4.2L, 380ml/hr

INTRODUCTION

This instruction manual provides important information for the safe and efficient operation of your COOSPIDER Reptile Fogger Humidifier Mister. This device is designed to create a humid habitat environment for various reptiles and amphibians, including lizards, snakes, turtles, pythons, tortoises, boas, iguanas, chameleons, frogs, toads, and hermit crabs.

Please read this manual thoroughly before initial use and retain it for future reference.

PRODUCT FEATURES

- **Large 4.2L Tank:** Provides extended operation without frequent refills.
- **Top-Fill Design:** Simplifies water refilling and cleaning processes.
- **Dry-Run Protection:** Automatically stops operation when water levels are low, indicated by a red light.
- **Adjustable Misting:** Rotary knob allows for precise control of fog output level.
- **Ultra-Quiet Operation:** Designed to operate with minimal noise, ensuring a comfortable environment for your pets.
- **6.6 Ft Extension Hose:** Includes a flexible hose for directing fog, with suction cups for secure placement.

SETUP INSTRUCTIONS

1. **Unpack Components:** Carefully remove all parts from the packaging. Ensure you have the humidifier base, water tank, lid, extension hose, and suction cups.
2. **Remove Protection Foam:** Before adding water, locate and remove the protection foam from the basin inside the humidifier base. Failure to do so will cause the base to flood with water.

Image: A hand removing a white foam piece from the humidifier's internal basin. This foam must be removed before operation.

3. **Fill Water Tank:** The humidifier features a top-fill design. Remove the lid and pour clean, distilled water directly into the tank. The tank capacity is 4.2 liters.

Image: A hand pouring water from a glass into the top opening of the humidifier, demonstrating the top-fill feature.

4. **Attach Hose:** Connect the extension hose to the fog outlet on the humidifier lid. Ensure the hose is securely attached.
5. **Position Hose:** Route the hose into your terrarium or enclosure. Use the provided suction cups to fix the hose in place, ensuring it directs the fog effectively.

REPTILE HUMIDIFIER

Perfect for various reptiles and amphibians, such as lizard, python, turtle, chameleon, toad, frog, etc.

Image: A diagram illustrating the length of the fog output hose (up to 1.9 meters / 6.3 feet) and two suction cup feet for securing the hose.

6. **Avoid Bending the Hose:** When installing, do not bend the fog outlet pipe sharply. Bending can cause fog to condense into water, blocking the pipe and preventing proper misting. Ensure a smooth, unobstructed path for the fog.

Top Fill Mist Humidifier

Makes refilling & cleaning easier
Reduces the risk of water splashing & tank breakage

Image: Two diagrams. The top diagram shows an incorrectly bent hose where fog collects as water. The bottom diagram shows a correctly installed, straight hose producing fog in a terrarium.

OPERATING INSTRUCTIONS

1. **Connect Power:** Plug the power cord into a suitable electrical outlet.
2. **Power On:** Locate the power switch on the base of the unit and turn it to the 'On' position.

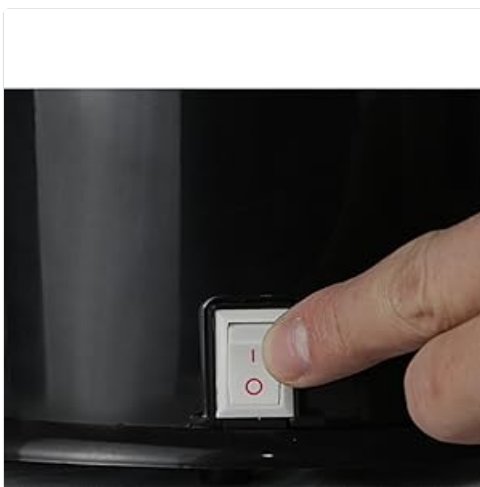

Image: A finger pressing the white rectangular power switch located on the side of the humidifier base.

3. **Adjust Fog Output:** Use the rotary knob on the front of the humidifier to adjust the misting level. Turn clockwise to increase fog output and counter-clockwise to decrease it.

Image: A close-up view of the humidifier's rotary dial with 'Min' and 'Max' indicators, used to adjust the fog output.

MAINTENANCE

- **Regular Cleaning:** To prevent mineral buildup and ensure optimal performance, clean the reptile fogger regularly, at least once a month.
- **Descaling:** If mineral deposits accumulate, use a descaling solution suitable for humidifiers or a mixture of white vinegar and water. Follow the instructions for the descaling solution or soak affected parts in the vinegar solution, then rinse thoroughly.
- **Water Quality:** Always use distilled water to minimize mineral buildup and extend the life of the unit.

TROUBLESHOOTING

Problem: Humidifier stops working and indicator light turns red.

Solution: This indicates the dry-run protection has activated because the water tank is empty. Refill the water tank.

Image: A close-up of the humidifier base showing a red indicator light, signifying that the water tank is empty.

Problem: No fog comes out from the hose.

Solution: Check if the hose is bent or kinked. A bent hose can cause fog to condense into water, blocking the flow. Ensure the hose is straight and unobstructed. Also, check if the unit is stuck or if there's any blockage in the fog outlet. Refer to the setup instructions for correct hose positioning.

Problem: Humidifier doesn't turn on.

Solution: Ensure the power cord is securely plugged into a working electrical outlet and the power switch is in the 'On' position. Check if the protection foam was removed from the basin during setup. If not, remove it and try again.

SPECIFICATIONS

Specification	Detail
Brand	COOSPIDER
Model	4.2L, 380ml/hr
Tank Capacity	4.2 Liters
Item Weight	3.39 pounds
Package Dimensions	13.11 x 12.64 x 8.07 inches
Hose Length	6.6 feet (approx. 1.9 meters)
Color	White

WARRANTY AND SUPPORT

The COOSPIDER Reptile Fogger Humidifier Mister typically comes with a 1-year warranty from the date of purchase. For warranty claims, technical support, or any product-related inquiries, please contact COOSPIDER customer service through the retailer where the product was purchased or visit the official COOSPIDER website for contact information.

Please retain your proof of purchase for warranty validation.
