

Onforu BDB55G-3

Onforu 55W 5000 LM LED Motion Sensor Floodlight BDB55G-3 User Manual

Model: BDB55G-3

1. INTRODUCTION

Thank you for choosing the Onforu 55W 5000 LM LED Motion Sensor Floodlight. This manual provides essential information for the safe installation, operation, and maintenance of your floodlight. Please read these instructions carefully before installation and retain them for future reference.

Front view of the Onforu 3-head LED motion sensor floodlight.

2. SAFETY INFORMATION

- **Electrical Safety:** Installation must be performed by a qualified electrician in accordance with all local and national electrical codes. Ensure the power supply is disconnected before installation or maintenance.
- **Grounding:** This product must be properly grounded to prevent electric shock.
- **Voltage:** Ensure the supply voltage matches the floodlight's requirements (230 Volts).
- **Mounting:** Mount the floodlight securely on a stable surface. Do not install on unstable or vibrating surfaces.
- **Operating Temperature:** Do not operate the floodlight outside its specified temperature range.
- **Water Resistance:** The floodlight is IP65 rated, suitable for outdoor use in rain, hail, and snow. However, do not submerge the unit in water. The sensor is IP44 rated.
- **Light Source:** Do not stare directly into the LED light source when illuminated, as it may cause eye strain or damage.

3. PRODUCT OVERVIEW

The Onforu 55W LED Motion Sensor Floodlight features a robust design with three adjustable heads and an integrated PIR motion sensor. It is designed for outdoor security lighting, providing bright, cool white illumination.

Key Features:

- **High Brightness:** 5000 Lumens output with 120 LED beads.
- **Energy Efficient:** 55W power consumption, saving up to 80% energy.
- **Adjustable Heads:** Three light heads can be adjusted vertically (90°) and side heads horizontally (270°) for wide coverage.
- **Motion Sensor (PIR):** Detects movement with adjustable sensitivity, lighting duration, and ambient light settings.
- **Durable & Waterproof:** IP65 rated aluminum housing and tempered glass for outdoor use.
- **Efficient Heat Dissipation:** Die-cast aluminum construction ensures extended lifespan.

4. SPECIFICATIONS

Feature	Specification
Brand	Onforu
Model Number	BDB55G-3
Power Consumption	55 Watts
Luminous Flux	5000 Lumens
Color Temperature	6500 Kelvin (Cool White)
Voltage	230 Volts
Material	Die-cast Aluminum, Tempered Glass
Ingress Protection (IP) Rating	IP65 (Floodlight), IP44 (Sensor)
Motion Sensor Detection Angle	180°
Motion Sensor Detection Distance	6-12 meters (adjustable)

EU Energy Label. For more details, scan the QR code or visit eprel.ec.europa.eu/qr/2366865.

5. INSTALLATION

Before beginning installation, ensure the main power supply is turned off at the circuit breaker to prevent electric shock.

5.1 Mounting Location

- Choose a mounting location that provides the desired coverage area and is within reach of the electrical wiring.
- The ideal mounting height is between 3 to 5 meters (9.84 ft - 16.4 ft) for optimal motion detection and light distribution.
- Avoid mounting near heat sources or objects that could cause false triggers for the motion sensor.

Luminous Flux: 5500LM

Color Temperature: 6500K

Ideal mounting height and light coverage.

5.2 Wiring Instructions

The floodlight comes with pre-stripped wires for connection. Follow the standard electrical wiring color codes:

- **Brown Wire:** Live (L)
- **Blue Wire:** Neutral (N)
- **Green/Yellow Wire:** Ground ()

Connect these wires to your household electrical circuit accordingly. Ensure all connections are secure and insulated. It is recommended to use a waterproof junction box for outdoor connections.

Wiring diagram and product dimensions.

5.3 Mounting Steps

1. Mark the drilling points on the wall or eave using the mounting bracket as a template.
2. Drill holes and insert appropriate wall plugs (if necessary).
3. Secure the mounting bracket to the surface with screws.
4. Connect the electrical wires as described in Section 5.2.
5. Attach the floodlight fixture to the mounting bracket and secure it.
6. Adjust the angle of the light heads and the motion sensor to cover the desired areas.

Wall and eave mounting options.

6. OPERATION

The floodlight features a PIR motion sensor with three adjustable settings: TIME, LUX, and SENS.

Adjust PIR Motion Distance Range: 16.4ft-32.8ft

TIME

Adjust Lighting Time
After Induction;
Duration: 10s-7min

The shortest time is
closed after 10 seconds

Closed after a maximum
of 7 minute

LUX

Adjust the brightness
that the sensor works
with for automatic

Motion sensor adjustment knobs for TIME, LUX, and SENS.

6.1 Adjusting Light Heads

The three light heads can be independently adjusted to direct light where needed:

- The central head can be moved vertically up or down (90°).
- The two side heads can be moved vertically up or down (90°) and rotated horizontally left or right (270°).

6.2 Motion Sensor Settings

Use the three rotary knobs on the motion sensor to configure its behavior:

- **TIME (Lighting Duration):** Adjusts how long the light stays on after motion is detected. The duration can be set from 10 seconds to 7 minutes. Rotate the knob clockwise to increase the duration and counter-clockwise to decrease it.
- **LUX (Ambient Light Sensitivity):** Determines the ambient light level at which the sensor becomes active.
 - Rotate towards the 'sun' symbol for 24-hour operation (day and night).
 - Rotate towards the 'moon' symbol for night-only operation (activates only in darkness).
- **SENS (Detection Sensitivity):** Adjusts the motion detection distance. Rotate the knob to increase or decrease the detection range, typically from 6 to 12 meters.

Motion sensor detection range (180°) and distance (6-12m).

6.3 Application Examples

The floodlight effectively illuminates outdoor areas such as driveways and entrances.

7. MAINTENANCE

- **Cleaning:** Periodically clean the floodlight's surface and sensor lens with a soft, damp cloth. Do not use abrasive cleaners or solvents. Ensure the power is off before cleaning.
- **Inspection:** Regularly check for any signs of damage to the housing, wiring, or mounting. If damage is found, disconnect power and have it inspected by a qualified technician.
- **No User-Serviceable Parts:** The LED light source is not replaceable. Do not attempt to open or repair the floodlight yourself.

Robust metal housing with heat sink fins for durability.

Efficient heat dissipation mechanism.

8. TROUBLESHOOTING

Problem	Possible Cause	Solution
Light does not turn on.	No power supply; LUX setting too low; Sensor not detecting motion.	Check power connection; Adjust LUX setting towards 'sun' for testing; Verify sensor is aimed correctly and SENS is adequate.
Light stays on continuously.	Continuous motion detected; LUX setting too high (always 'sun'); Wiring error.	Check for obstructions or constant movement in detection zone; Adjust LUX setting towards 'moon'; Consult an electrician to check wiring.
Light turns on during the day.	LUX setting too high (towards 'sun').	Adjust LUX setting towards 'moon' to activate only in darkness.
Light turns off too quickly/slowly.	TIME setting incorrect.	Adjust TIME knob to desired duration (10 seconds to 7 minutes).

Problem	Possible Cause	Solution
Motion sensor range is too short/long.	SENS setting incorrect.	Adjust SENS knob to increase or decrease detection distance.
Light flickers.	Unstable power supply; Loose wiring connection.	Check power source stability; Ensure all wiring connections are tight.

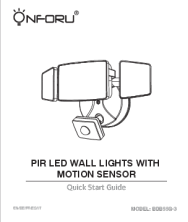

9. WARRANTY AND SUPPORT

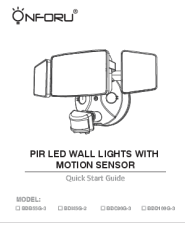

Onforu products are manufactured to high-quality standards. For warranty information, please refer to the terms and conditions provided at the time of purchase or contact Onforu customer support.

For technical assistance or inquiries, please contact Onforu customer service through their official website or the retailer where the product was purchased.
