- 1 x User Manual (this document)

SETUP

1. Battery Installation

The DIGIQUEST Universal Easy Plus remote control requires 2 x 1.5V LR03 - AAA batteries (not included).

1. Locate the battery compartment on the back of the remote control.
2. Slide open the battery cover.
3. Insert two AAA batteries, ensuring the correct polarity (+ and -) as indicated inside the compartment.
4. Close the battery cover securely.

2. Programming the Remote Control

The remote offers four simple methods to configure it quickly with your TV. Choose the method that best suits your needs.

1. **Direct Code Entry:**

   Enter the corresponding code for your TV brand directly. A list of over 10,000 available codes is typically provided in the included code booklet (if applicable) or can be found online on the DIGIQUEST support website.

2. **Automatic Search:**

   The remote can automatically search for the correct code for your TV. Follow the instructions in the code booklet for initiating an automatic search. This process typically involves holding down a specific button until the TV responds.

3. **Manual Search:**

   If automatic search is unsuccessful, you can perform a manual search. This involves cycling through codes one by one until your TV responds. Refer to the code booklet for detailed steps.

4. **Learning Function (from original remote):**

   If you have your original TV remote control, the Easy Plus remote can learn functions directly from it. This method allows you to customize button assignments. Place the two remotes face-to-face and follow the learning procedure outlined in the code booklet.

Maintenance

Cleaning

To clean the remote control, use a soft, dry cloth. Do not use abrasive cleaners, solvents, or alcohol, as these may damage the surface or internal components.

Battery Replacement

Replace batteries when the remote control's response becomes sluggish or stops working. Always replace both batteries at the same time with new AAA batteries. Do not mix old and new batteries, or different types of batteries.

Troubleshooting

- **Remote not working:**

    - Check if the batteries are inserted correctly with the correct polarity.
    - Replace old batteries with new ones.
    - Ensure there are no obstructions between the remote control and the TV's infrared receiver.
    - Re-program the remote control using one of the methods described in the "Programming the Remote Control" section.

- **Some buttons not working:**

    - The remote might not be fully compatible with all functions of your specific TV model. Try the learning function if available.
    - Ensure the remote is correctly programmed for your TV. Try re-programming with a different code if available for your TV brand.

- **Remote range is poor:**

    - Replace the batteries.
    - Ensure you are within the maximum operating range (up to 10 meters) and have a clear line of sight to the TV.
