## SETUP

---

1. **Unpack the Charger:** Carefully remove the vhw replacement charger from its packaging.
2. **Inspect the Charger:** Ensure the charger and its cable are free from any visible damage.
3. **Connect to Power:** Plug the charger's AC adapter into a standard 100V-240V wall outlet.
4. **Connect to Device:** Insert the barrel connector end of the charger cable firmly into the charging port of your compatible Philips Norelco grooming system or beard trimmer.

Video: This video demonstrates the general process of connecting a charger to a Philips Norelco trimmer. Please note that the specific trimmer model shown in the video may differ from your device, but the charging connection method is illustrative.

## OPERATING INSTRUCTIONS

Once properly connected, your Philips Norelco device should begin charging. The charger is designed to provide a stable 1.6V DC output at 80mA. A full charge typically provides approximately 90 minutes of cordless operation for compatible devices. No oiling is required for the trimmer blades, simplifying maintenance.

## SAFETY FEATURES

The vhw charger is equipped with multiple safety mechanisms to protect your device and ensure safe operation:

- **Over Current Protection:** Prevents damage from excessive current flow.
- **Over Voltage Protection:** Safeguards against voltage spikes.
- **Short Circuit Protection:** Automatically cuts power in case of a short circuit.
- **Over Temperature Protection:** Monitors and regulates the charger's temperature to prevent overheating.

These features ensure a safe charging experience for your Philips Norelco grooming device. The charger is CE/FCC/RoHS listed, confirming its adherence to international safety standards.

## TROUBLESHOOTING

---

- **Device not charging:**
  - Ensure the charger is securely plugged into a working wall outlet.
  - Verify that the charger's barrel connector is fully inserted into your device's charging port.
  - Confirm your device is listed under the compatible models.
  - Check for any visible damage to the charger cable or connector.
- **Charger feels hot:**
  - A slight warmth during charging is normal. If the charger becomes excessively hot, unplug it immediately.
  - Ensure adequate ventilation around the charger and device during charging.
- **Device not holding a charge:**
  - This may indicate an issue with your device's battery rather than the charger. Consult your device's manual or manufacturer for battery replacement options.

## WARRANTY AND SUPPORT

---

For any questions, concerns, or warranty claims regarding your vhbw replacement charger, please contact the manufacturer or the seller directly. Keep your purchase receipt as proof of purchase.
