Veehoo Outdoor Elevated Dog Bed Instruction Manual

Model: CWC1803CPUS01 | Brand: Veehoo

1. INTRODUCTION

Thank you for choosing the Veehoo Outdoor Elevated Dog Bed. This manual provides essential information for the proper assembly, use, maintenance, and troubleshooting of your new pet bed. Designed for comfort and durability, this elevated bed offers a breathable and stable resting surface for your dog, suitable for both indoor and outdoor environments.

2. SETUP AND ASSEMBLY

The Veehoo Elevated Dog Bed features a simple, tool-free plug-in design for quick and hassle-free assembly. Please follow the steps below:

1. Unpack all components from the box. Verify that all parts are present according to the included parts list.
2. Lay the fabric cover flat on a clean surface. Identify the channels along the edges of the fabric.
3. Insert the longer metal bars into the side channels of the fabric cover.
4. Insert the shorter metal bars into the end channels of the fabric cover.
5. Connect the metal bars using the three-way plastic connectors at each corner. Ensure a snug fit.
6. Attach the non-slip feet to the bottom of the corner connectors.
7. For the final connection, secure the last bar by stretching the fabric slightly and attaching the Velcro straps to ensure the fabric is taut. This may require some effort to achieve proper tension.

HOW TO ASSEMBLE YOUR VEEHOO PET BED

SIZE : S / M / L

Installation Suggestion:

1. As there is nearly no stretch of the fabric cover, it may need some muscle to fix the last screw. Work together with friend or family if needed for stable assembling.
2. Before sticking the Velcro of the mattress, please make sure that all the pipe are tightly connected.

3. OPERATING INSTRUCTIONS

Once assembled, your Veehoo Elevated Dog Bed is ready for use. Place the bed in your desired indoor or outdoor location. The elevated design and breathable Teslin fabric provide several benefits for your pet:

- **Cooling Comfort:** The mesh fabric allows for increased airflow, keeping your pet cool, especially in warmer weather.
- **Joint Support:** The elevated surface reduces pressure on joints and keeps your pet off hard, cold, or damp floors, which can be beneficial for pets with arthritis or joint issues.
- **Stability:** The three-way connector structure and non-slip feet ensure the bed remains stable on various surfaces, preventing sliding or tipping.
- **Training Aid:** Elevated beds are often used as a designated 'place' for dog training, providing a clear boundary for your pet.

4. MAINTENANCE AND CLEANING

Maintaining your Veehoo Elevated Dog Bed is simple, ensuring a hygienic environment for your pet:

- **Regular Cleaning:** The Teslin fabric is designed for easy cleaning. For minor messes, simply wipe the surface with a damp cloth.
- **Deep Cleaning:** For more thorough cleaning, the fabric cover can be hosed off with water or machine washed. Ensure the cover is completely dry before reassembling to prevent mildew.
- **Frame Care:** The powder-coated steel frame can be wiped clean with a damp cloth as needed.
- **Replaceable Parts:** The fabric mattress is replaceable, extending the overall lifespan of the product. Replacement covers may be available from the manufacturer.

5. TROUBLESHOOTING

If you encounter any issues with your Veehoo Elevated Dog Bed, please refer to the following common solutions:

- **Difficulty Assembling the Last Bar:** The fabric is designed to be taut for optimal support. If the last bar is difficult to connect, ensure all other connections are secure and try applying firm, even pressure. Working with another person can also make this step easier.
- **Bed Instability:** Check that all metal bars are fully inserted into the connectors and that the non-slip feet are properly attached and flat on the ground. Ensure the bed is placed on a level surface.
- **Fabric Sagging:** Over time, some minor stretching of the fabric may occur. Ensure the Velcro straps are tightly secured. If sagging persists or the fabric is damaged, consider purchasing a replacement cover.
- **Pet Not Using the Bed:** Introduce the bed gradually. Place familiar toys or treats on it. Positive reinforcement can encourage your pet to use their new bed.
