## SETUP AND ASSEMBLY

This Yaheetech cabinet requires assembly. Please follow the detailed instructions provided in the official Installation Manual. It is highly recommended to have two people for assembly to ensure safety and ease of construction.

### General Assembly Steps:

1. **Unpack and Verify:** Carefully unpack all components and hardware. Compare them against the parts list in the manual to ensure nothing is missing or damaged.
2. **Prepare Workspace:** Choose a clean, flat, and spacious area for assembly. Lay down a soft cloth or cardboard to protect the cabinet parts from scratches.
3. **Follow Instructions:** Adhere strictly to the step-by-step instructions and diagrams in the provided Installation Manual. Do not overtighten screws unless specified.
4. **Secure Connections:** Ensure all connections are firm and stable before moving or loading the cabinet.

For detailed, step-by-step assembly instructions, please refer to the official [Installation Manual \(PDF\)](#).

## OPERATING INSTRUCTIONS

The Yaheetech Bathroom Cabinet is designed for simple and efficient use.

- **Using the Drawer:** Gently pull the metal knobs to open the top drawer. Push it back in until it is flush with the cabinet front to close. The metal roller slides ensure smooth operation.
- **Opening and Closing Doors:** Pull the sleek metal knobs on the doors to open. Push the doors firmly to close; the strong magnetic catches will secure them in place.
- **Adjusting Shelves:** To adjust the height of the inner shelf, first empty the shelf. Carefully lift the shelf and remove the four shelf pins from their current holes. Reinsert the pins into the desired new height holes,

ensuring they are level, then place the shelf back onto the pins. There are three possible height settings.

## MAINTENANCE AND CARE

Proper care will extend the life and maintain the appearance of your Yaheetech cabinet.

- **Cleaning:** Wipe the cabinet surfaces with a soft, damp cloth. For stubborn marks, a mild soap solution can be used, followed by wiping with a clean, dry cloth. Avoid abrasive cleaners, harsh chemicals, or solvents, as these can damage the finish.
- **Spills:** Immediately wipe up any spills, especially water, to prevent moisture damage to the MDF material.
- **Hardware:** Periodically check all screws and fasteners to ensure they are tight. Retighten if necessary, but do not overtighten.
- **Placement:** Avoid placing the cabinet in direct sunlight or near heat sources, which can cause fading or warping over time.

## TROUBLESHOOTING

If you encounter any issues with your cabinet, try these common troubleshooting steps:

- **Cabinet is Wobbly:**
  - Ensure the cabinet is on a flat, level surface.
  - Check all assembly screws and connections. Tighten any loose fasteners.
- **Doors Not Closing Properly:**
  - Verify that the magnetic catches are properly aligned and securely attached.
  - Check if any items inside the cabinet are obstructing the doors from closing fully.
  - Ensure the cabinet itself is not warped or unevenly assembled.
- **Drawer is Sticking or Hard to Open/Close:**
  - Check the metal roller slides for any obstructions or debris.
  - Ensure the drawer is correctly seated on the slides.
  - Verify that the drawer assembly screws are not overtightened or loose.

If problems persist, please contact Yaheetech customer support for further assistance.
