7. TROUBLESHOOTING

If you encounter issues with your Canton DM 76 Soundbar, please refer to the following common problems and solutions:

Problem	Possible Cause / Solution
No power	Ensure the power cord is securely connected to both the soundbar and the wall outlet. Check if the wall outlet is functioning (test with another device). Press the ON/STANDBY button on the remote or soundbar.

Problem	Possible Cause / Solution
No sound	Verify the correct input source is selected (Optical, Coaxial, Analog, Bluetooth). Increase the volume on both the soundbar and the connected audio source. Ensure the soundbar is not muted. Check audio cables for secure connection and damage. If using digital input, ensure your TV/source audio output is set to PCM (not Bitstream/Dolby Digital) if experiencing issues.
Bluetooth pairing issues	Ensure the soundbar is in Bluetooth pairing mode. Move your Bluetooth device closer to the soundbar. Clear the Bluetooth device list on your mobile device and try pairing again. Restart both the soundbar and your Bluetooth device.
Remote control not working	Check and replace the remote control batteries. Ensure there are no obstructions between the remote and the soundbar's sensor. Point the remote directly at the soundbar.
