## 6. MAINTENANCE

### 6.1 Cleaning the Screen

To clean the screen, gently wipe it with a soft, lint-free cloth. For stubborn marks, lightly dampen the cloth with water or a mild, non-abrasive screen cleaner. Never spray liquid directly onto the screen.

### 6.2 Cleaning the Casing

Use a soft, dry cloth to clean the monitor casing. Avoid using strong detergents or abrasive cleaners, as they may damage the surface.

## 7. TROUBLESHOOTING

### 7.1 No Image on Screen

- Ensure the power cable is securely connected to both the monitor and the power outlet.
- Verify that the video cable (HDMI, DisplayPort, Mini DisplayPort) is firmly connected to both the monitor and your computer.
- Check if the correct input source is selected in the OSD menu.
- Confirm your computer is powered on and not in sleep mode.

## 7.2 Image is Blurry or Distorted

- Adjust the display resolution on your computer to the monitor's native resolution (3840x2160).
- Check the video cable for any damage or loose connections.
- Reset the monitor to factory default settings via the OSD menu.

## 7.3 No Sound from Speakers

- Ensure the volume on the monitor and your computer is not muted and is set to an audible level.
- Verify that the audio output is correctly configured on your computer to use the monitor's speakers.
- If using an external audio device, ensure it is properly connected to the Audio Out port.
