MANBA MA1008

MANBA Ice Shaver and Snow Cone Machine (Model MA1008) User Manual

Your guide to refreshing shaved ice treats.

INTRODUCTION

Welcome to the MANBA Ice Shaver and Snow Cone Machine user manual. This manual provides essential information for the safe and effective operation, maintenance, and care of your new ice shaver. Designed for ease of use, this manual hand-cranked device allows you to create fluffy, snow-like ice for a variety of beverages and desserts without the need for electricity.

The MANBA Ice Shaver can be used to prepare a variety of cold treats, including snow cones, slushies, margaritas, and other refreshing drinks.

IMPORTANT SAFETY INFORMATION

- Always keep hands and fingers away from the blades during operation and cleaning. The blades are sharp.
- Ensure the unit is stable on a flat, non-slip surface before use.
- Do not allow children to operate the ice shaver unsupervised.
- Use only ice cubes as recommended. Do not attempt to shave other frozen items.
- Disassemble the unit completely before cleaning.
- Store the ice shaver in a safe place, out of reach of children.

PACKAGE CONTENTS

Your MANBA Ice Shaver and Snow Cone Machine package includes the following items:

- 1 x MANBA Ice Crusher Unit
- 1 x Silicone Ice Cube Tray (15-cavity)

Package :

1 x Ice Shaver

1 x Ice Cube Tray

The package includes the main ice shaver unit and a flexible silicone ice cube tray.

SETUP

1. **Unpack:** Carefully remove all components from the packaging.
2. **Wash:** Before first use, wash all removable parts (top cover, plunger, handle, ice container, and ice cube tray) with warm, soapy water. Rinse thoroughly and dry completely.
3. **Assemble:** Place the clear ice container onto a stable surface. Insert the blade assembly (part of the top unit) into the container. Ensure the handle is securely attached to the side of the top unit.
4. **Prepare Ice:** Use the included silicone ice cube tray to freeze 15 perfect-sized ice blocks. Alternatively, use standard ice cubes from your freezer.

OPERATING INSTRUCTIONS

1. **Load Ice:** Remove the plunger from the top unit. Place ice cubes into the top opening of the ice shaver. Do not overfill.
2. **Secure Plunger:** Place the plunger back into the top opening, ensuring it rests on top of the ice cubes.
3. **Shave Ice:** Apply gentle downward pressure on the plunger with one hand while rotating the hand crank clockwise with the other hand. The sharp 18/8 stainless steel blades will shave the ice into fine, fluffy snow, which collects in the clear container below.
4. **Continue Shaving:** Continue cranking until all the ice is shaved to your desired consistency.
5. **Retrieve Shaved Ice:** Once finished, remove the top unit by lifting it off the container. The shaved ice is now ready for serving.

The manual hand crank operation makes it easy to produce shaved ice quickly.

Official video demonstrating the MANBA Manual & Portable Snow Cone Machine in use, showing the process of adding ice and cranking the handle to produce shaved ice.

MAINTENANCE AND CLEANING

1. **Disassembly:** Separate the top unit (with blades and handle) from the clear ice container. The plunger can also be removed from the top unit.
2. **Washing:** Wash all disassembled parts with warm, soapy water. Use a brush to carefully clean around the blades. Exercise extreme caution as blades are sharp.

3. **Rinsing:** Rinse all parts thoroughly with clean water to remove any soap residue.
4. **Drying:** Allow all parts to air dry completely before reassembling or storing to prevent water spots and ensure hygiene.
5. **Storage:** Store the clean, dry unit in a cool, dry place. The compact design allows for easy storage.

**S/S Blades
Shaving Faster**

The unit features three 18/8 stainless steel blades for efficient ice shaving. Handle with care during cleaning.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Ice is not shaving or is difficult to shave.	Ice cubes are too large or too hard. Insufficient downward pressure.	Ensure ice cubes fit properly. Apply firm, consistent downward pressure on the plunger while cranking. Allow very hard ice to soften slightly.
Shaved ice is chunky, not fluffy.	Not enough downward pressure or inconsistent cranking.	Increase downward pressure and maintain a steady, continuous cranking motion.
Handle is stiff or difficult to turn.	Ice is jammed or unit is not properly assembled.	Disassemble, check for ice jams, and reassemble ensuring all parts are correctly aligned.

SPECIFICATIONS

- **Brand:** MANBA
- **Model Name:** MA1008
- **Product Dimensions:** 5.31"D x 7.28"W x 8.27"H
- **Capacity:** 1 Liters
- **Material:** Plastic (BPA Free), 18/8 Stainless Steel Blades
- **Item Weight:** 1.7 pounds
- **Operation:** Manual Hand Crank
