## Moen 9025BN

# Moen Belfield 9025BN Freestanding Tub Filler with Handshower Instruction Manual

## INTRODUCTION

---

This manual provides detailed instructions for the installation, operation, and maintenance of your Moen 9025BN Belfield One-Handle Freestanding Floor Mount Tub Filler with Handshower in Brushed Nickel. Please read all instructions carefully before beginning installation and retain this manual for future reference. Proper installation and care will ensure optimal performance and longevity of your product.

## PRODUCT FEATURES

---

- **Longstanding Flexibility:** Built on the Moen M-PACT common valve system, allowing for future style updates without replacing plumbing.
- **Coordinating Collection:** Designed to coordinate with other faucets and accessories within the Belfield Collection.
- **Warm and Inviting Finish:** Features a Brushed Nickel finish, providing a lightly brushed warm-gray metallic appearance.
- **Eco-Performance Handshower:** Includes a handshower with a 1.75 gallons per minute (gpm) flow rate.
- **ADA Compliant:** Complies with Americans with Disabilities Act (ADA) specifications for accessibility.
- **Durable Construction:** Backed by Moen's Warranty for long-term reliability.

## INSTALLATION REQUIREMENTS

---

This tub filler requires a specific Moen single riser floor mounting kit for installation. The compatible kits are

model TS50100 or TS50110, which must be purchased separately. Ensure you have the correct mounting kit before proceeding with installation.

## INSTALLATION OVERVIEW

---

The Moen Belfield tub filler is designed for floor-mount installation, offering a sleek and modern aesthetic. The M-CORE valve system provides versatility and ease of installation, allowing for precise positioning and simplified maintenance.

Your browser does not support the video tag.

Video: This video provides an overview of Moen Wall Mount Tub Fillers, demonstrating the M-CORE installation benefits, including valve rotation for versatility, simplified cartridge installation, and high flow rates. While this product is freestanding, the M-CORE valve system principles for installation and serviceability are similar.

Key aspects of the M-CORE installation system include:

- **Valve Versatility:** The valve rotates 180 degrees, and the spout manifold rotates 360 degrees, providing flexibility for installation in tight spaces.
- **Serviceability:** Quarter-turn shut-off stops are included for convenient servicing.
- **Simplified Cartridge:** Features a 1215 High Flow Cartridge designed for easy installation and delivering an 8 GPM flow rate.

## OPERATING INSTRUCTIONS

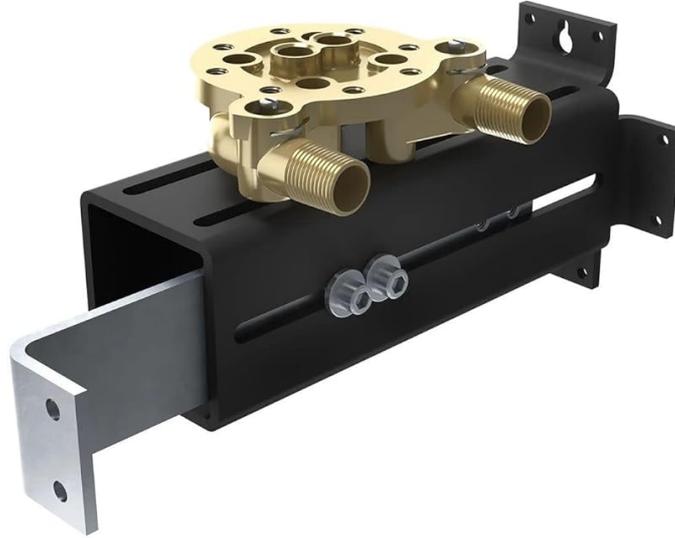

---

### Using the Tub Filler

1. **Turn On/Off:** Rotate the single handle to turn the water on or off.
2. **Adjust Temperature:** Rotate the handle left for hotter water and right for colder water.
3. **Adjust Flow:** Push the handle up to increase water flow and pull down to decrease it.

### Using the Handshower

1. **Activate Handshower:** Locate the diverter on the tub filler body. Pull or push the diverter to switch water flow from the main spout to the handshower.
2. **Return to Spout:** Push or pull the diverter back to its original position to return water flow to the main tub spout.

REQUIRED VALVE SOLD SEPARATELY

## CARE AND MAINTENANCE

To maintain the beauty and performance of your Brushed Nickel finish, follow these guidelines:

- **Regular Cleaning:** Clean regularly with a soft cloth and warm, soapy water.
- **Avoid Harsh Cleaners:** Do not use abrasive cleaners, harsh chemicals, or polishes, as these can damage the finish.
- **Dry After Use:** Wipe the faucet dry after each use to prevent water spots and mineral buildup.
- **Handshower Nozzles:** Periodically clean the handshower nozzles by gently rubbing them to remove any mineral deposits.

## TROUBLESHOOTING

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Low Water Flow	Aerator or handshower nozzles clogged with mineral deposits.	Clean or replace the aerator. Clean handshower nozzles.
Leaks from Handle/Spout	Worn cartridge or loose connections.	Tighten connections. Replace the cartridge (refer to Moen's website for specific cartridge replacement instructions).
Water Temperature Issues	Cartridge malfunction or water heater settings.	Check water heater settings. Replace the cartridge if necessary.

If you encounter issues not listed here or require further assistance, please contact Moen customer support.

## SPECIFICATIONS
