- **Do Not Dishwash:** To preserve the material and functionality, hand washing is recommended.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Opener slips on jar lid.	Incorrect size selected, lid or opener is wet/greasy, insufficient grip.	Ensure lid and opener are dry. Select the tightest fitting gripper. Apply firm, even pressure.
Difficulty opening stubborn lids.	Vacuum seal is strong, lid is overtightened.	Tap the lid gently on a counter to break the vacuum seal. Try twisting with more consistent force.
Can tab is difficult to lift.	Tab is stuck or bent.	Ensure the hook is fully under the tab. Apply steady, upward pressure.
