# eeco Smart LED Bulb Speaker Instruction Manual

Model: d99daf94-da14-4c0b-aa1f-2416c4d5a1fe

## INTRODUCTION

---

Thank you for purchasing the eeco Smart LED Bulb Speaker. This innovative product combines a dimmable RGB multicolor LED light bulb with a Bluetooth speaker, offering both illumination and audio playback. It features Bluetooth 4.2 connectivity, a USB port for music playback, and is controlled via an infrared remote. This manual provides detailed instructions for setup, operation, and maintenance to ensure optimal performance.

## SETUP

1. **Install the Bulb:** Carefully screw the eecoo Smart LED Bulb Speaker into any standard E26/E27 light socket. Ensure the power is off before installation.
2. **Power On:** Turn on the light switch. The bulb will illuminate and indicate it is ready for connection.
3. **Bluetooth Connection:**
  - On your smartphone or tablet, enable Bluetooth.
  - Search for available devices and select the device named 'YJ-BT003'.
  - Once connected, you can play audio from your device through the bulb's speaker.
4. **USB Port Music Playback:**
  - Insert a USB flash drive containing MP3 audio files into the USB port located on the side of the bulb.
  - Use the remote control to switch to USB playback mode (refer to the 'Operating' section for remote functions).

### Steps of connection the light bulb

After installing the light bulb, open the Bluetooth device, connect to speaker then you can play music from the light bulb.

After installing the light bulb, you can install a USB flash disk in the USB port, then choose the music by the remote.

## MAINTENANCE

---

To ensure the longevity and proper functioning of your eecoo Smart LED Bulb Speaker, follow these maintenance guidelines:

- **Cleaning:** Disconnect power before cleaning. Use a soft, dry cloth to wipe the bulb. Do not use liquid cleaners or abrasive materials.
- **Storage:** Store the bulb in a cool, dry place when not in use for extended periods.
- **Avoid Water:** This product is designed for indoor use only. Avoid exposure to water or high humidity.
- **Handle with Care:** The bulb contains electronic components. Avoid dropping or subjecting it to strong impacts.

## TROUBLESHOOTING

---

If you encounter issues with your eecoo Smart LED Bulb Speaker, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
---------	----------------	----------

<b>Problem</b>	<b>Possible Cause</b>	<b>Solution</b>
Light does not turn on.	No power, loose connection, or faulty bulb.	Check the light switch and power source. Ensure the bulb is screwed in securely. Test the bulb in another working socket.
No sound from the speaker.	Bluetooth not connected, volume too low, or incorrect input mode.	Verify Bluetooth connection on your device. Increase volume on both your device and the remote. Ensure the remote is set to BT or USB mode as appropriate.
Remote control not working.	Battery depleted, obstruction, or remote out of range.	Replace the remote control battery. Ensure there are no obstructions between the remote and the bulb. Operate the remote within its effective range (approx. 10 meters).
Cannot change light color or brightness.	Remote control issue or bulb malfunction.	Check remote battery and line of sight. If the issue persists, try resetting the bulb by turning it off and on at the main switch.
USB music not playing.	USB drive not inserted correctly, unsupported file format, or remote in Bluetooth mode.	Ensure the USB drive is fully inserted. Confirm audio files are in MP3 format. Use the remote to switch to USB input mode.
