Easyricambi FERROLI SMILE 7-9-12 PC7 PC10

User Manual

EASYRICAMBI AIR CONDITIONER FILTERS

For FERROLI SMILE 7 9 12 PC7 PC10 Models

PRODUCT OVERVIEW

This manual provides essential information for the installation, maintenance, and proper use of your Easyricambi replacement air conditioner filters. These filters are specifically designed to be compatible with FERROLI SMILE 7-9-12 PC7 PC10 air conditioning units.

The package contains two types of filters: one Electrostatic filter and one Catalyzed deodorizing filter, working together to improve air quality.

IMPORTANT SAFETY INFORMATION

- Always disconnect power to the air conditioning unit before attempting any installation or maintenance.
- Ensure the filters are installed correctly to prevent damage to the unit or ineffective filtration.
- Keep filters out of reach of children and pets.
- Do not attempt to wash or reuse the filters if they are designed for single use.

SETUP AND INSTALLATION

Before installing the new filters, it is crucial to verify that their dimensions match the filters you are replacing. The specified dimensions for these filters are 60 x 245mm (6 x 24.5 cm).

Figure 1: The two types of replacement filters. The darker filter is the Catalyzed deodorizing filter, and the lighter, pleated filter is the Electrostatic filter. Both are designed for air purification in compatible air conditioning units.

Installation Steps:

1. **Power Off:** Ensure the air conditioning unit is completely turned off and disconnected from the power supply before proceeding.
2. **Locate Filter Compartment:** Open the front panel or access cover of your FERROLI SMILE air conditioner to locate the existing filter compartment.
3. **Remove Old Filters:** Carefully remove the old, dirty filters. Note their orientation and position for correct installation of the new ones.
4. **Insert New Filters:** Insert the new Easyricambi filters into the designated slots. Ensure they are seated properly and securely. The package contains one Electrostatic filter and one Catalyzed deodorizing filter; install them according to your unit's design.
5. **Close Compartment:** Close the front panel or access cover of the air conditioning unit.
6. **Restore Power:** Reconnect the power supply to the air conditioning unit.

MAINTENANCE

Air conditioner filters require regular replacement to maintain optimal air quality and unit efficiency. The frequency of replacement depends on usage, environmental conditions, and the presence of pets or allergens.

Replacement Frequency:

- It is generally recommended to check your filters monthly.
- Replace filters every 3-6 months under normal conditions.
- In homes with pets, smokers, or high levels of dust/pollen, more frequent replacement (e.g., every 1-3 months) may be necessary.

Refer to the "Setup and Installation" section for detailed steps on how to replace the filters.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Filter does not fit	Incorrect filter size or model compatibility.	Double-check the filter dimensions (60 x 245mm) against your existing filters and ensure your air conditioner model is FERROLI SMILE 7-9-12 PC7 PC10.
Reduced airflow after replacement	Filters not installed correctly or unit requires further maintenance.	Ensure filters are fully seated and not obstructing airflow. Check for any other blockages in the unit.
Air quality not improving	Filters may be saturated quickly due to high pollution, or other issues with the AC unit.	Consider more frequent filter replacement. Consult an AC technician if the problem persists.

SPECIFICATIONS

- **Brand:** Easyricambi
- **Compatible Models:** FERROLI SMILE 7-9-12 PC7 PC10
- **Dimensions:** 60 x 245mm (6 x 24.5 cm)
- **Package Contents:** 2 pieces (1 Electrostatic filter, 1 Catalyzed deodorizing filter)
- **Product Type:** Air Conditioner Replacement Filters
