Oleo-phobic Coating

Oleo-phobic coating: protect against sweat and reduce fingerprints

Image: The oleophobic coating protects against sweat and reduces fingerprints, keeping the screen clear.

SETUP & INSTALLATION

Follow these steps carefully for optimal installation of your screen protector.

1. **Clean the Screen:** Use the included alcohol prep pad to thoroughly clean your Garmin Forerunner 245/245 Music screen. Wipe it dry with the microfiber cleaning cloth. Ensure no dust or smudges remain.
2. **Remove Dust:** Use the dust removal sticker to pick up any remaining dust particles from the screen.
3. **Align the Protector:** Carefully peel off the protective layer (usually marked #1) from the adhesive side of the tempered glass. Align the screen protector precisely over your watch screen. Use guide stickers if necessary for perfect alignment.
4. **Apply and Secure:** Gently lower the screen protector onto the watch screen. Once it makes contact, press down lightly in the center and allow the adhesive to spread.
5. **Remove Bubbles:** Use the squeegee card to push out any noticeable air bubbles towards the edges of the screen.
6. **Final Polish:** Peel off the top protective layer (usually marked #2 or #3) if present, and then use the microfiber cloth to gently polish the screen protector.

USAGE & CARE

To ensure the longevity and effectiveness of your Supershieldz screen protector, follow these care guidelines:

- Avoid exposing your device to extreme temperatures or harsh chemicals.
- Clean the screen protector regularly with a soft, lint-free cloth to remove fingerprints and smudges.
- While the protector is highly durable, avoid direct sharp impacts to prevent damage.

TROUBLESHOOTING

Air Bubbles After Installation

If small air bubbles remain after installation, they often disappear naturally within 24-48 hours. For larger bubbles, gently lift the nearest edge of the protector and re-apply, pushing the bubble out with the squeegee card.

Dust Under the Protector

If dust particles are trapped, carefully lift the protector from the nearest corner using a piece of tape. Use another piece of tape to gently dab and remove the dust from both the screen and the adhesive side of the protector. Re-apply the protector as per the installation steps.
