

## Vidalido MT-001

# Vidalido 12'x10'x8' Dome Camping Tent (Model MT-001) Instruction Manual

Brand: Vidalido | Model: MT-001

## 1. INTRODUCTION

This manual provides comprehensive instructions for the assembly, use, and care of your Vidalido 12'x10'x8' Dome Camping Tent. This tent is designed for 5-6 persons and is suitable for 4-season use, featuring double layers for enhanced weather protection, waterproof materials, anti-UV properties, and wind resistance. Proper adherence to these instructions will ensure optimal performance and longevity of your tent.

## 2. PACKAGE CONTENTS

Please verify that all components listed below are present in your package:

- Tent Body (Inner and Outer Layers)
- Central Support Pole
- Stakes (Steel)
- Guy Ropes
- Adjustable Tarp Poles (for awning setup)
- Carrying Bag

### 3. SETUP INSTRUCTIONS

The Vidalido Dome Camping Tent is designed for quick and straightforward assembly. Follow these steps for proper setup:

1. **Prepare the Area:** Choose a flat, clear area for your tent. Remove any sharp objects or debris.
2. **Unfold the Tent Body:** Lay the tent body flat on the ground, spreading out the base. Ensure the doors are facing the desired direction.
3. **Assemble the Central Pole:** Connect the sections of the central support pole.
4. **Insert the Central Pole:** Position the assembled central pole vertically in the center of the tent. Secure the top of the pole to the designated attachment point inside the tent's peak.
5. **Secure the Base:** Taut each corner of the tent and insert the stakes firmly into the ground. Ensure the tent base is stretched evenly.
6. **Attach the Rain Fly:** Drape the rain fly over the inner tent, aligning it with the tent's structure. Secure the rain

fly to the tent body and stake down any additional guy ropes for stability, especially in windy conditions.

7. **Awning Setup (Optional):** If using the awning, assemble the adjustable tarp poles and position them to support the awning flap. Secure with additional guy ropes and stakes.

## Installation method

First of all, link the ring frame well. Buckle the top button of the outside tent.

Second, flat the inner tent on the ground and insert nails in six corners.

Third, the outside tent is draped over the inner tent, and the stand bar is inserted into the inner tent to support it.

Finally, the six corners of the outside tent are fixed with nails.

## 4. OPERATION AND FEATURES

Your Vidalido Dome Camping Tent offers several features designed for comfort and versatility:

- **Spacious Interior:** The conical design provides ample internal space and height, allowing occupants to stand upright without restriction. The tent comfortably accommodates 5-6 people.
- **Dual Layer Design:** The tent features an outer waterproof layer and an inner mesh layer. The outer layer provides protection from elements, while the inner mesh layer offers ventilation and insect protection.
- **Multi-function Use:** The external account can be removed for separate installation, allowing the outer shell to be used as a temporary dressing room, bathroom, or toilet area. The inner mesh tent can also be used independently in fair weather.
- **Ventilation:** Both doors and windows are equipped with 2000D PU 3000MM high-density mesh, ensuring

excellent airflow and clear views while keeping insects out.

- **Weather Protection:** Constructed from anti-tear 190T patterned polyester and 150D Oxford fabric, with stitching taping and caulking treatment, the tent is waterproof (3000mm water resistance), windproof, and offers UV protection (UPF 45).

## 5. CARE AND MAINTENANCE

Proper care will extend the life of your tent:

- **Cleaning:** Hand wash the tent with mild soap and water. Do not use harsh detergents or bleach.
- **Drying:** Always ensure the tent is completely dry before packing it away to prevent mold and mildew. Air dry in a shaded area.
- **Storage:** Store the tent in its carrying bag in a cool, dry place, away from direct sunlight and extreme temperatures.
- **Inspection:** Regularly inspect poles, stakes, zippers, and fabric for any damage. Repair small tears promptly to prevent them from worsening.

## 6. TROUBLESHOOTING

Here are solutions to common issues you might encounter:

- **Difficulty with Setup:** If you find assembly challenging, review the steps in Section 3. Ensure the central pole is fully extended and correctly positioned before staking the tent. It may be helpful to have a second person assist with the initial setup, especially when placing the rain fly.
- **Tent Instability:** Ensure all stakes are firmly driven into the ground and all guy ropes are properly tensioned and secured. In very windy conditions, consider using additional stakes or anchoring the tent to heavy objects.
- **Water Leakage:** While the tent is waterproof, prolonged exposure to heavy rain or improper setup can sometimes lead to minor leaks. Verify that all zippers are fully closed, and the rain fly is correctly positioned and taut. Check for any small tears or worn seams that may require repair.
- **Condensation Inside:** Condensation can occur due to temperature differences and humidity. Ensure adequate ventilation by keeping mesh windows or doors partially open when weather permits.

## 7. TECHNICAL SPECIFICATIONS

Feature	Specification
Brand	Vidalido
Model Number	MT-001
Occupancy	5-6 Person
Seasons	4 Season
Dimensions (L x W x H)	12' x 10' x 8' (120 x 96 x 144 inches)
Floor Length	12.5 Feet
Floor Width	10.5 Feet
Maximum Height	94.8 Inches
Floor Area	25 Square Feet
Material	190T Patterned Polyester, 150D Oxford Fabric (Floor)
Water Resistance Technology	3000 millimeters
Ultraviolet Light Protection	UPF 45
