Nine West NW/2346GPTN

Nine West Women's Strap Watch NW/2346GPTN User Manual

Model: NW/2346GPTN

1. PRODUCT OVERVIEW

The Nine West Women's Strap Watch, model NW/2346GPTN, features a scratch-resistant mineral crystal lens and Japanese quartz movement. This timepiece is designed for everyday wear with a classic aesthetic.

Image 1.2: Back view of the Nine West Women's Strap Watch, showing the case back and strap buckle.

Image 1.3: Side view of the Nine West Women's Strap Watch, highlighting the crown.

2. SETUP

2.1 Setting the Time

1. Pull the crown (the small knob on the side of the watch case) outwards to the first position.
2. Rotate the crown clockwise or counter-clockwise to adjust the hour and minute hands to the correct time.
3. Once the time is set, push the crown back into its original position to start the watch movement.

2.2 Adjusting the Strap

The watch features a faux leather strap with a buckle closure. To adjust the strap, simply insert the buckle pin into the desired hole on the strap to achieve a comfortable and secure fit on your wrist.

3. OPERATING INSTRUCTIONS

This watch is designed for simple operation. Once the time is set, the Japanese quartz movement will keep accurate time. The watch is intended for time display only, with no additional complications.

4. MAINTENANCE

4.1 Cleaning

To maintain the appearance of your watch, wipe the case and crystal with a soft, dry cloth. For the faux leather strap, use a slightly damp cloth and mild soap if necessary, then wipe dry immediately. Avoid harsh chemicals or abrasive materials.

4.2 Water Resistance

This watch is rated as 'Water Resistant'. This generally means it can withstand splashes or brief immersion in water, such as washing hands or light rain. It is **not** suitable for swimming, showering, or diving. Avoid prolonged exposure to water to prevent damage to the movement and strap.

4.3 Battery Replacement

The watch is powered by a battery. When the watch stops running, the battery may need to be replaced. It is recommended to have the battery replaced by a qualified watch technician to ensure proper sealing and function.

5. TROUBLESHOOTING

- **Watch not running:** Ensure the crown is fully pushed in. If the watch still does not run, the battery may need replacement.
- **Time inaccuracy:** If the watch is consistently fast or slow, the movement may require servicing. Consult a watch technician.
- **Strap discomfort:** Adjust the buckle to a different hole for a more comfortable fit. If the strap causes irritation, discontinue use and consult a healthcare professional.
