

Saeco ROYAL OTC V2

Saeco Royal One Touch Cappuccino Automatic Coffee Machine User Manual

Model: ROYAL OTC V2

INTRODUCTION

Welcome to the user manual for your new Saeco Royal One Touch Cappuccino Automatic Coffee Machine. This guide provides essential information for setting up, operating, maintaining, and troubleshooting your appliance to ensure optimal performance and longevity. Please read this manual thoroughly before first use and keep it for future reference.

1. SETUP AND FIRST USE

1.1 Unpacking and Placement

Carefully remove all packaging materials. Place the machine on a stable, level surface, away from heat sources and direct sunlight. Ensure adequate ventilation around the appliance.

1.2 Initial Cleaning

Before first use, clean the water tank, drip tray, and coffee grounds container with warm water and a mild detergent. Rinse thoroughly.

1.3 Filling the Water Tank and Bean Hopper

Fill the water tank with fresh, cold water up to the MAX level. Open the bean hopper lid and fill it with whole coffee beans. The machine features a coffee grinder with conical steel discs for optimal grinding.

Figure 1: Saeco Royal One Touch Cappuccino Machine. This image shows the overall design of the machine, including the bean hopper at the top, the control panel, and a glass of latte macchiato being dispensed, highlighting its automatic milk frothing capability.

1.4 Power Connection

Connect the power cord to the machine and then to a grounded electrical outlet. The machine operates at 110 Volts and has a power consumption of 1400 Watts.

2. OPERATING INSTRUCTIONS

2.1 One Touch Cappuccino and Latte Macchiato

The Saeco Royal features a "One Touch Cappuccino" function. Simply place your cup under the adjustable coffee spout, select your desired drink (e.g., Cappuccino or Latte Macchiato), and the machine will automatically dispense coffee and frothed milk via its integrated milk supply tube and automatic Cappuccinatore milk frother.

2.2 Coffee Preparation

- **Espresso/Coffee:** Select your preferred coffee strength and volume. The machine allows for simultaneous

preparation of two cups of coffee or espresso.

- **Grinding Adjustment:** You can adjust the grinding quantity to fine-tune the coffee strength and flavor. Refer to the on-screen menu for this setting.
- **Pre-brewing (Saeco Aroma System):** This function pre-wets the coffee grounds before brewing, enhancing the aroma and flavor extraction.
- **Pre-ground Coffee:** A dedicated powder tray is available for using pre-ground coffee, allowing for a second type of coffee.

2.3 Hot Water and Steam Function

Use the hot water/steam nozzle for dispensing hot water for tea or other beverages, or for manual milk frothing if preferred. The rapid steam function ensures quick availability.

2.4 Cup Warming Tray

The integrated cup warming tray helps keep your cups warm, ensuring your coffee stays at the optimal temperature longer.

3. MAINTENANCE AND CLEANING

3.1 Automatic Rinsing and Cleaning Programs

The machine features automatic rinsing and cleaning programs. Follow the on-screen prompts for these cycles. Regular execution of these programs is crucial for maintaining hygiene and performance.

3.2 Daily Cleaning

- **Drip Tray and Coffee Grounds Container:** Empty and clean daily.
- **Milk System:** After each milk-based drink, run a quick rinse cycle for the Cappuccinatore. Regularly disassemble and clean the milk frother components with warm water and a mild detergent.
- **Water Tank:** Rinse daily and refill with fresh water.

3.3 Descaling

The machine will prompt you when descaling is required. Use a Saeco-approved descaling solution and follow the instructions provided by the machine's display.

3.4 Brew Group Maintenance

The brew group should be rinsed with lukewarm water weekly. Refer to the full manual for instructions on removing and reinserting the brew group.

4. TROUBLESHOOTING

This section addresses common issues you might encounter. For more detailed troubleshooting, please consult the full product manual or contact customer support.

Problem	Possible Cause	Solution
No coffee dispensed	Water tank empty; coffee beans empty; brew group clogged.	Refill water tank; refill bean hopper; clean brew group.

Problem	Possible Cause	Solution
Milk not frothing properly	Milk system clogged; milk type unsuitable; milk too warm.	Clean milk frother components; use cold, fresh milk (e.g., semi-skimmed); ensure milk is chilled.
Machine displays "Descale"	Limescale buildup.	Perform descaling cycle as prompted by the machine.
