INTRODUCTION

The Apple iPhone XR offers a spacious 6.1-inch Liquid Retina LCD display, powered by Apple's A12 Bionic processor for efficient performance. This renewed device has undergone a full diagnostic test to ensure like-new functionality and removal of prior-user information. It is guaranteed to have a minimum battery capacity of 80% and minimal cosmetic damage not noticeable at arm's length.

This device is locked to Verizon only and is not compatible with any other carrier. It does not include headphones or a SIM card, but comes with a generic (MFi certified) charger and charging cable.
