OPERATING INSTRUCTIONS

Frothing Milk

1. Pour your desired amount of milk (dairy or non-dairy) into a cup or pitcher. For best results, use cold milk for thicker froth or warm milk for a lighter foam.
2. Submerge the whisk end of the frother into the milk, ensuring the whisk is fully covered but not touching the bottom of the container.
3. Press and hold the power button located on the top of the frother.
4. Move the frother up and down gently in the milk for approximately 15-20 seconds, or until the desired froth consistency is achieved.
5. Release the power button to turn off the frother.
6. Carefully remove the frother from the frothed milk.
