ReadyWired USB Charging Cable Cord

ReadyWired USB Charging Cable Cord for Borofone BE16 Bone Conduction Headphones User Manual

INTRODUCTION

This manual provides essential instructions for the proper use, setup, and maintenance of your ReadyWired USB Charging Cable Cord. This cable is specifically designed for charging Borofone BE16 Bone Conduction Headphones. Please read this manual thoroughly to ensure optimal performance and longevity of your product.

PRODUCT OVERVIEW

The ReadyWired USB Charging Cable Cord is a 3-foot (approximately 0.91 meters) cable designed for reliable power delivery. It features a standard USB Type-A connector on one end and a Micro USB connector on the other, ensuring compatibility with the specified Borofone BE16 Bone Conduction Headphones.

Figure 1: ReadyWired USB Charging Cable Cord. This image displays the full length of the black USB charging cable, coiled for storage, showing both the USB-A and Micro USB connectors.

Figure 2: USB-A and Micro USB Connectors. A close-up view of the two connectors on the ReadyWired USB charging cable. The USB-A connector is on the left, and the Micro USB connector is on the right, both black with standard USB symbols.

SETUP

Setting up the ReadyWired USB Charging Cable Cord for use is straightforward:

- Identify Connectors:** Locate the standard USB Type-A connector (the larger, rectangular end) and the Micro USB connector (the smaller, trapezoidal end) on the cable.
- Connect to Power Source:** Insert the USB Type-A connector into a compatible USB power source, such as a wall adapter, computer USB port, or power bank. Ensure the power source is active.
- Connect to Device:** Carefully insert the Micro USB connector into the charging port of your Borofone BE16 Bone Conduction Headphones. Ensure the connector is oriented correctly to avoid damage. Do not force the connector.

OPERATING INSTRUCTIONS: CHARGING

Once the cable is properly connected, your Borofone BE16 Bone Conduction Headphones should begin charging. Observe the charging indicator on your headphones (refer to your headphone's manual for specific indicator behavior).

- Charging Time:** Charging time will vary depending on the battery level of your headphones and the output of your USB power source.
- Disconnection:** Once charging is complete, gently disconnect the Micro USB connector from your headphones, then disconnect the USB Type-A connector from the power source.
- Safety:** Always use the cable in a dry environment. Avoid exposing the cable to extreme temperatures or direct sunlight.

MAINTENANCE

Proper care will extend the life of your charging cable:

- Cleaning:** Use a soft, dry cloth to clean the cable and connectors. Do not use liquid cleaners or solvents.
- Storage:** Store the cable in a cool, dry place away from direct sunlight and extreme temperatures. Avoid tightly coiling or bending the cable sharply, as this can damage the internal wires.
- Handling:** Always grasp the connector housing when plugging or unplugging the cable. Do not pull on the cable itself, as this can strain the connections and lead to damage.

TROUBLESHOOTING

If you encounter issues with your ReadyWired USB Charging Cable Cord, consider the following:

Problem	Possible Solution
Headphones not charging.	Ensure both ends of the cable are securely connected. Try a different USB power source or a different USB port. Verify that your Borofone BE16 headphones are functioning correctly.
Slow charging.	Ensure the USB power source provides sufficient output (e.g., a wall adapter typically charges faster than a computer USB port). Avoid using the headphones while charging.
Cable appears damaged.	Discontinue use immediately. A damaged cable can pose a safety risk. Replace the cable if there are visible signs of wear, fraying, or bent connectors.

SPECIFICATIONS

Brand	ReadyWired
Model	USB Charging Cable Cord
Connector Type (Source)	USB Type A
Connector Type (Device)	Micro USB
Cable Type	USB
Compatible Devices	Borofone BE16 Bone Conduction Headphones
Length	3 Feet (approx. 0.91 meters)
