5.2 Battery Replacement

Replace batteries when the remote control's response becomes sluggish or stops working. Always replace both batteries at the same time with new AAA alkaline batteries. Do not mix old and new batteries, or

different types of batteries, as this can lead to leakage or malfunction.

- **Remote not responding:**
 - Check if the batteries are inserted correctly with the correct polarity.
 - Replace old batteries with new ones.
 - Ensure there are no obstructions between the remote and the TV's infrared sensor.
 - Confirm the remote is pointed directly at the TV.
- **Specific buttons not working:**
 - Clean the remote's surface, especially around the unresponsive buttons, to remove any dirt or debris.
 - If only certain buttons are affected, it might indicate internal damage. Consider replacing the remote.
- **TV not turning on/off:**
 - Verify the TV is plugged into a power source and is not in standby mode due to a power outage.
 - Test the remote with another compatible Sony TV if available, to determine if the issue is with the remote or the TV.
