

Master Lock 5400D

Master Lock 5400D Portable Lock Box User Manual

Model: 5400D

INTRODUCTION

This manual provides comprehensive instructions for the Master Lock 5400D Set Your Own Combination Portable Lock Box. Please read this manual carefully before using the product to ensure proper operation and longevity.

The Master Lock 5400D is designed to securely store keys, offering convenient access through a customizable combination. Its portable design allows for versatile use in various settings.

SAFETY INFORMATION

- Do not force the lock mechanism. If it is difficult to open or close, recheck the combination.
- Keep the combination confidential and store it in a safe, memorable place, separate from the lock box.
- Ensure the lock box is securely closed and the shackle is properly engaged after each use.
- This product is designed for key storage. Do not store hazardous materials or items of extreme value that require higher security measures.

SETUP

Setting Your Own Combination

The lock box comes preset to 0-0-0-0. Follow these steps to set your personal combination:

1. Open the key storage compartment. Inside, locate the reset lever on the back of the door.
2. Move the reset lever from position A to position B (usually to the right or up).
3. Rotate the dials to your desired new 4-digit combination. Make sure the numbers are aligned with the indicators.
4. Move the reset lever back to position A (its original position).
5. Close the key storage compartment and scramble the dials to lock the box.

6. **Important:** Test your new combination before closing the door completely and scrambling the dials. If the combination is not set correctly, you may be locked out.

Image: Four Master Lock 5400D portable lock boxes. Each box is black with a grey front panel featuring four combination dials and the "Master Lock" logo at the bottom. The shackle is visible at the top of each box.

Mounting the Lock Box (if applicable)

The portable design allows for attachment to various fixtures. Ensure the shackle is securely fastened to a stable object that cannot be easily removed or cut. The shackle opens by pressing the release button located on the side of the lock box once the correct combination is entered.

OPERATING INSTRUCTIONS

Opening the Lock Box

1. Rotate the combination dials to your preset 4-digit combination, ensuring each number aligns precisely with the indicator marks.
2. Press the black release button located on the side of the lock box. The front door of the key storage compartment should spring open.
3. To open the shackle, press the shackle release button (usually located on the opposite side or near the shackle base) while the front door is open.

Closing the Lock Box

1. Place keys or other items inside the compartment.
2. Close the front door firmly until it clicks shut.
3. Scramble the combination dials to a random set of numbers to secure the lock box and prevent unauthorized access.
4. Ensure the shackle is also securely closed if it was opened.

MAINTENANCE

- **Cleaning:** Wipe the exterior of the lock box with a soft, damp cloth. Avoid abrasive cleaners or solvents that could damage the finish or internal mechanisms.
- **Lubrication:** Periodically, a small amount of silicone-based lubricant can be applied to the combination dials and shackle mechanism to ensure smooth operation. Do not use oil-based lubricants.
- **Storage:** When not in use, store the lock box in a dry environment to prevent corrosion.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Lock box will not open with combination.	Incorrect combination entered; dials not aligned; reset lever not fully returned to position A.	Double-check the combination and ensure numbers are perfectly aligned. Verify the reset lever is in position A. If you forgot the combination, there is no master key or override. You may need to contact Master Lock support with proof of purchase for assistance, or consider replacement.

Problem	Possible Cause	Solution
Dials are stiff or difficult to turn.	Dirt/debris; lack of lubrication; extreme temperatures.	Clean the dials and surrounding area. Apply a small amount of silicone-based lubricant to the dials. Move the lock box to a moderate temperature environment.
Door or shackle will not close properly.	Obstruction; mechanism misalignment.	Check for any items blocking the door or shackle path. Ensure the internal mechanism is clear of debris. Gently try to realign the door/shackle. Do not force.

SPECIFICATIONS

- **Model:** 5400D
- **Lock Type:** Combination Lock
- **Color:** Black
- **Special Feature:** Portable
- **Key Capacity:** 5 keys (approximate, depending on key size)
- **Material:** Durable metal construction
- **Dimensions:** (Refer to product packaging for exact dimensions)

WARRANTY AND SUPPORT

Master Lock products are manufactured to high quality standards. For warranty information, product registration, or technical support, please visit the official Master Lock website or contact their customer service department directly.

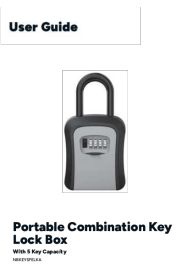

Master Lock Official Website: www.masterlock.com

Please have your product model number (5400D) and proof of purchase available when contacting support.

MASTER LOCK REMINDS FAMILIES TO FALL BACK INTO SAFETY AND ESTABLISH HOME SECURITY HABITS

Second Shift an Ideal Time to Refresh Family Safety Strategies

MEWAUKEE (Sept. 12, 2012) – As students settle into school schedules, new activities begin and day-light hours dwindle, Master Lock reminds families and parents to evaluate and refresh their family safety plans. Regular statistics show that fall and winter months are more home theft occurrences than any other time of the year – so now is the ideal time to review safety practices.

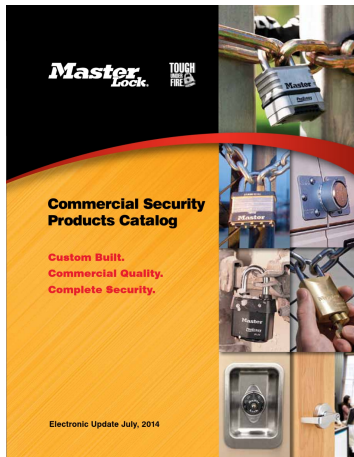

"With fewer daylight hours and busier schedules, fall is a prime time for families to update a home security and family safety check-list," said Rebecca Smith, vice president, marketing for Master Lock. "While safety and security should always be top-of-mind, scheduling time throughout the year to address specific topics such as home alarm systems, children's car seats, and property setbacks will help ensure that families continue to improve their security year-round."

With that in mind, Master Lock created a series of tips to remember seasonal safety and security tips to help you prepare and protect your home and family from potential risks.

- Inspect to Perfection.** Home improvement projects are a popular fall activity as families perform necessary maintenance to prepare their homes for long winter months. Take advantage of this time to conduct a visual home inspection to ensure your household basics are functioning. Make sure the batteries in your smoke and carbon monoxide detectors are fully charged, and verify your fire extinguisher has not expired.
- Lock-Up for a Touchdown.** From football tailgates and apple-picking to study groups and fall sports, families tend to be very active during the fall months, often entertaining guests in the home. With everyone coming and going more frequently, be sure that all points of entry to the home are secured, including windows, entryways and garages. Master Lock has a few products that can help.
 - Cable locks like the 5127TH licensed after family's pack are ideal for securing items that may be stored outside such as storage sheds, grills, tools, lawn equipment, and bikes that won't be used again until spring.
 - The 260D disc security bar is perfect for adding extra resistance against forced entry to a sliding glass or windowed length door.
 - A key safe such as the 5400D or 5401D is a convenient way to always have a spare key securely stored where you need it. This way your own contribution to home safety is up to five keys and can be easily offered to the doorman or something permanent nearby, ensuring keys are always readily available. A key safe is a great solution for kids who may be coming home to an empty house after school or activities.
- A Breeze of Safety.** In an emergency, police should be able to clearly see your home and identify your home number from the street. Regularly prune landscaping around your doors, windows and emergency, and consider
