AVENT SCF190/41

Philips Avent Soothie Orthodontic Baby Pacifiers User Manual

Model: SCF190/41 | Brand: AVENT

PRODUCT OVERVIEW

The Philips Avent Soothie one-piece newborn pacifiers are specifically designed for babies aged 0-3 months. These pacifiers adhere to the American Academy of Pediatrics guidelines, ensuring safety and proper oral development. Each set includes 4 green pacifiers, crafted from hospital-grade, BPA-free, and latex-free silicone for optimal comfort and durability. The symmetrical, collapsible nipple supports natural suckling and healthy oral development. A unique finger-held design allows parents and caregivers to place a finger in the nipple, facilitating bonding and connection with the baby. This design also simplifies cleaning and prevents water from becoming trapped within the nipple. Philips Avent Soothie pacifiers are widely distributed in hospitals nationwide and are trusted by a high percentage of mothers for their newborns.

SETUP AND INITIAL PREPARATION

Before first use, and for ongoing hygiene, it is essential to properly clean and sterilize the pacifiers.

Initial Cleaning and Sterilization:

1. **Wash:** Thoroughly wash each pacifier with warm water and mild soap. Ensure all surfaces are cleaned.
2. **Rinse:** Rinse thoroughly under clean running water to remove any soap residue.
3. **Sterilize:**
 - **Boiling Water Method:** Submerge the pacifiers in boiling water for 5 minutes. Ensure they do not touch the bottom or sides of the pot to prevent damage.
 - **Sterilizer Method:** Use a dedicated sterilizer (steam sterilizer, microwave sterilizer, or UV sterilizer) according to the manufacturer's instructions.
4. **Cool and Dry:** Allow the pacifiers to cool completely before handling. Store them in a clean, dry container.

**Easy-to-clean
design, compatible
with sterilizers**

Image: Philips Avent Soothie pacifiers are designed for easy cleaning and are compatible with sterilizers, as shown here with two pacifiers being placed into a sterilizer unit.

OPERATING INSTRUCTIONS

Using the Philips Avent Soothie pacifier is straightforward, designed for both baby's comfort and parent's ease of use.

How to Offer the Pacifier:

- **Check Condition:** Always inspect the pacifier for any signs of wear, tears, or damage before each use. Discard immediately if any damage is observed.
- **Positioning:** Gently place the nipple of the pacifier into your baby's mouth. The symmetrical shape ensures proper orientation regardless of how it is inserted.
- **Finger-Held Design:** Utilize the unique finger-held design by placing your finger into the opening of the nipple. This allows for a more interactive soothing experience and can help your baby latch onto the pacifier more easily, promoting bonding.

- **Observe Baby's Response:** Allow your baby to suckle naturally. The collapsible nipple is designed to support their natural oral development.

Fingerheld solution
promotes bonding

Image: The unique finger-held design of the Philips Avent Soothie pacifier allows a parent to gently hold the pacifier and interact with the baby, promoting bonding during use.

Compatibility:

Philips Avent Soothie pacifiers are compatible with Soothie Snuggle pacifier holders, which are soft animal plush toys designed to help babies find and hold their pacifiers. The pacifier and plush toy can be detached for separate cleaning.

Compatible with Snuggle, a friendly companion for baby

Image: The Philips Avent Soothie pacifier can be easily attached to or detached from a Soothie Snuggle plush toy, providing a comforting companion for the baby.

MAINTENANCE AND CARE

Proper maintenance ensures the longevity and hygiene of your Philips Avent Soothie pacifiers.

Daily Cleaning:

- After each use, wash the pacifier thoroughly with warm water and mild soap.
- Rinse well to remove all soap residue. The design of the pacifier helps prevent water from getting trapped inside the nipple.

Sterilization:

Sterilize the pacifiers regularly, especially for newborns, using one of the methods described in the "Setup and Initial Preparation" section.

Replacement:

For hygiene reasons, it is recommended to replace Soothie pacifiers after 4 weeks of use, or sooner if any signs of wear or damage are observed.

TROUBLESHOOTING AND SAFETY INFORMATION

Adhering to safety guidelines is crucial for your baby's well-being.

Safety Warnings:

- **Inspect Regularly:** Always check the pacifier regularly for any signs of wear and tear, such as cracks, tears, stickiness, or discoloration.
- **Discard Damaged Pacifiers:** If the pacifier shows any cracks, tears, or damage, dispose of it immediately to prevent a choking hazard.

- **Do Not Tie Around Neck:** Never attach ribbons or cords to a pacifier, as they can pose a strangulation risk.
- **Not a Teether:** While made of durable silicone, pacifiers are not designed to be teethers. If your baby is actively teething, consider a dedicated teether.

Common Concerns:

- **Baby Not Accepting Pacifier:** Some babies may take time to accept a pacifier. Try offering it during calm moments or when they are drowsy. The finger-held design can assist in initial acceptance.
- **Pacifier Falling Out:** For very young infants, the pacifier may fall out frequently. This is normal. Ensure the pacifier is correctly positioned.

**Distributed
in hospitals
nationwide**

Image: Philips Avent Soothie pacifiers are widely distributed in hospitals nationwide, trusted by medical professionals for calming newborns, as depicted in this hospital scene.

PRODUCT SPECIFICATIONS
