4. GETTING STARTED

4.1. Initial Charging

Before first use, fully charge the camera's built-in lithium battery. Connect the Micro USB cable to the

camera's charging port and the other end to a 5V power adapter (not included) or a computer's USB port. The red indicator light will turn off once charging is complete.

4.2. Inserting the TF Card

The camera comes with a 16GB TF card for storage. If not pre-installed, locate the TF card slot on the side of the camera. Gently insert the TF card with the metal contacts facing down until it clicks into place. To remove, push the card in slightly until it springs out.

4.3. Attaching the Lanyard

Thread the included lanyard through the designated loop on the camera body. This helps prevent accidental drops and makes the camera easier for children to carry.

5. BASIC OPERATION

5.1. Power On/Off

Press and hold the **Power Button** for a few seconds to turn the camera on or off.

5.2. Taking Photos

1. Turn on the camera.
2. Frame your subject using the display screen.
3. Press the **Shutter Button** to capture a photo.

5.3. Recording Videos

1. Turn on the camera.
2. Navigate to video mode using the navigation buttons (if applicable, or it may be a dedicated button).
3. Press the **Shutter Button** once to start recording. A timer will appear on the screen.
4. Press the **Shutter Button** again to stop recording.

5.4. Using the Flash

The camera features a built-in flash for low-light conditions. The flash can be activated or set to automatic via the camera's settings menu. When active, the flash will illuminate your subject for clearer photos.
