Cafopgrill 6L Portable Car Mini Refrigerator - Cooler and Warmer

Instruction Manual

1. Product Overview

The Cafopgrill 6L Portable Car Mini Refrigerator is a versatile appliance designed for cooling and warming items on the go. Ideal for use in cars, trucks, boats, or during camping, it operates on a 12V DC power supply. This unit allows you to keep beverages and snacks cool or maintain the warmth of food, offering convenience for various travel and outdoor activities.

Safety Information

- Read all instructions before using the appliance.
- Ensure the power supply matches the unit's requirements (12V DC).
- Do not immerse the unit in water or expose it to rain.
- Keep ventilation openings clear of obstructions.
- Unplug the unit when not in use or before cleaning.
- Do not use the appliance if the power cord is damaged.
- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.

2. Package Contents

Please check the package for the following items:

- 1 x Cafopgrill 6L Portable Car Mini Refrigerator

- 1 x 12V DC Power Cable
- 1 x Instruction Manual

3. Setup

Follow these steps to set up your portable mini refrigerator:

1. **Placement:** Place the refrigerator on a stable, flat surface. Ensure there is adequate ventilation around the unit, especially at the rear where the fan is located.
2. **Power Connection:** Locate the 12V DC input port on the back of the unit.
3. Insert the 12V DC power cable into the unit's input port.
4. Plug the other end of the 12V DC power cable into your vehicle's cigarette lighter socket or a compatible 12V DC power outlet.
5. Ensure the connection is secure.

Image 3.1: Detail of the control panel, showing the 12V DC input and the mode selection switch.

4. Operating Instructions

The Cafopgrill mini refrigerator features a simple control panel for selecting cooling or warming functions.

1. **Power On:** Once connected to a 12V DC power source, the unit is ready for operation.
2. **Select Mode:** Use the switch located on the control panel to select your desired mode:
    - **COLD:** Slide the switch to the 'COLD' position to activate the cooling function. A green indicator light will illuminate.
    - **HOT:** Slide the switch to the 'HOT' position to activate the warming function. A red indicator light will illuminate.
    - **OFF:** Slide the switch to the 'OFF' position to turn off the unit. No indicator light will be on.
3. **Loading Contents:** For best results, pre-chill or pre-heat items before placing them inside the unit. Ensure the lid is securely closed after loading to maintain temperature.
4. **Cooling/Warming Performance:** The unit typically cools to approximately 15-20°C below ambient temperature and warms to approximately 50-65°C. Performance may vary based on ambient temperature and ventilation.

Image 4.2: The interior of the refrigerator with the lid open, demonstrating its capacity for beverages.

5. Maintenance

Proper maintenance ensures the longevity and optimal performance of your mini refrigerator.

- **Cleaning:** Clean the exterior of the unit with a damp cloth. Do not use abrasive cleaners or immerse the unit in water. For the interior, wipe with a mild detergent solution and a damp cloth, then dry thoroughly.
- **Ventilation:** Regularly check and clean the ventilation grille at the back of the unit to prevent dust and debris buildup, which can impair cooling/warming efficiency.
- **Storage:** When not in use, ensure the unit is clean and dry. Store it in a dry place away from direct sunlight and extreme temperatures.
- **Power Cord:** Inspect the power cord periodically for any signs of damage. If damaged, discontinue use and contact customer support.

6. Troubleshooting

If you encounter issues with your mini refrigerator, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Unit does not power on.	No power from 12V outlet; loose connection; blown fuse in vehicle.	Check 12V power source; ensure cable is securely plugged in; check vehicle's fuse box.
Unit is not cooling/warming effectively.	Lid not closed properly; ventilation blocked; ambient temperature too high/low; items not pre-chilled/pre-heated.	Ensure lid is sealed; clear ventilation openings; pre-chill/pre-heat contents; allow more time for temperature change.
Excessive noise from fan.	Fan obstruction; unit on an uneven surface.	Check for and remove any obstructions from the fan; place unit on a stable, flat surface.

7. Specifications

Model Number	Cafopgrillaoxcg5t4d6
Capacity	6 Litres
Power Input	12V DC
Cooling Temperature	Cools to 15-20°C below ambient temperature
Warming Temperature	Warms to 50-65°C
Dimensions (L x W x H)	34 x 30 x 21 cm (13.4 x 11.8 x 8.3 inches)
Weight	2.01 kg (4.43 lbs)
Special Feature	Portable
