Bestway Power Steel Rectangular Above Ground Pool Set User Manual

Model: 56475-2

IMPORTANT SAFETY INFORMATION

WARNING! PLEASE READ THE INSTRUCTION MANUAL CAREFULLY AND STORE IT FOR FUTURE REFERENCES.

This manual contains vital information regarding the assembly, operation, and maintenance of your Bestway Power Steel Rectangular Above Ground Pool Set. To ensure safe and enjoyable use, please read all instructions thoroughly before installation and retain this manual for future reference. Failure to follow these instructions can result in serious injury or property damage.

PRODUCT OVERVIEW

The Bestway Power Steel Rectangular Above Ground Pool Set is designed for durable and enjoyable outdoor swimming. Featuring a robust steel frame and Trittech construction, this pool offers a reliable and spacious swimming area for your family and friends.

- **Dimensions:** 732 x 366 x 132 cm (288.19"L x 144.09"W x 51.97"H)
- **Capacity:** 30,045 Liters (7,937 gallons)
- **Construction:** Trittech material for enhanced durability and puncture resistance.
- **Included Components:** 1 swimming pool, 1 filter pump (5,678 L/h), 1 safety ladder, 1 pool cover, 1 ChemConnect dispenser.

SETUP AND INSTALLATION

Proper site preparation and assembly are crucial for the stability and longevity of your pool. Follow these steps carefully:

1. **Site Selection:** Choose a firm, level surface free of sharp objects, debris, and overhead power lines. The ground must be able to support the weight of the filled pool (approximately 30,045 kg or 66,238 lbs). Ensure adequate drainage.
2. **Ground Cloth Placement:** Unfold the included ground cloth (if applicable) or a suitable protective tarp on the prepared site.
3. **Frame Assembly:** Lay out all frame components according to the instruction manual provided in the box. Connect the horizontal beams and vertical legs, ensuring all connections are secure. Refer to the specific diagrams in your physical manual for detailed assembly steps.
4. **Liner Installation:** Carefully spread the pool liner inside the assembled frame. Ensure the drain valve is positioned correctly. Smooth out any wrinkles from the center outwards.
5. **Filling the Pool:** Begin filling the pool with water. As the water level rises, continue to smooth out wrinkles from the bottom and sides. Stop filling when the water reaches the recommended fill line, typically indicated on the liner.
6. **Pump and Ladder Setup:** Install the filter pump according to its separate instructions, connecting it to the pool's inlet and outlet fittings. Assemble and place the safety ladder securely.

Figure 4: The included safety ladder provides secure entry and exit from the pool.

OPERATING INSTRUCTIONS

Once your pool is set up, follow these guidelines for safe and effective operation:

- **Filter Pump Operation:** The included 5,678 L/h filter pump is essential for maintaining water clarity. Operate the pump daily for several hours, typically 8-12 hours, depending on usage and water conditions. Consult the pump's specific manual for detailed operating instructions and filter cleaning/replacement schedules.
- **ChemConnect Dispenser:** Use the ChemConnect dispenser to distribute chemical tablets (not included) evenly throughout the pool water. This helps maintain proper chemical balance and sanitation. Always follow the chemical manufacturer's instructions for dosage and safe handling.
- **Water Level:** Maintain the water level between the minimum and maximum fill lines to ensure proper pump operation and structural integrity.
- **Safety Ladder:** Always use the safety ladder for entering and exiting the pool. Supervise children at all times when they are in or around the pool.

MAINTENANCE

Regular maintenance is key to extending the life of your pool and ensuring clean, safe swimming water.

- **Water Testing:** Regularly test your pool water for pH, chlorine, and alkalinity levels. Adjust chemicals as needed to maintain optimal balance.
- **Filter Cleaning/Replacement:** Clean or replace the filter cartridge in your pump regularly, typically every 1-2 weeks, or more frequently with heavy use. A dirty filter reduces pump efficiency.
- **Pool Cleaning:** Skim debris from the surface daily. Vacuum the pool bottom as needed to remove settled dirt and debris.
- **Pool Cover:** Use the included pool cover when the pool is not in use to prevent debris from entering and to reduce water evaporation.
- **Liner and Frame Inspection:** Periodically inspect the pool liner for any tears or punctures and the steel frame for rust or damage. Address any issues promptly.
- **Winterization:** For colder climates, the pool should be properly drained, cleaned, and disassembled for storage during winter months to prevent damage from freezing water. Refer to the full manual for detailed winterization steps.

TROUBLESHOOTING

This section addresses common issues you might encounter with your Bestway Power Steel Pool.

| Problem | Possible Cause | Solution |
|----------------------|---|---|
| Cloudy Water | Insufficient filtration, improper chemical balance, high bather load. | Run filter pump longer, clean/replace filter cartridge, test and adjust water chemistry (chlorine, pH), shock treat the pool. |
| Pump Not Running | Power supply issue, clogged impeller, air lock. | Check power connection and circuit breaker, unplug and inspect impeller for debris, prime the pump by bleeding air. |
| Water Leaking | Puncture in liner, loose hose connection, faulty O-ring. | Locate and patch liner hole, tighten all hose clamps, inspect and replace O-rings if damaged. |
| Pool Cover Too Small | Incorrect cover size or improper stretching. | Ensure the cover is correctly aligned and stretched evenly. If it consistently appears too small, verify the model number of the cover against your pool model. |

SPECIFICATIONS

| Feature | Detail |
|--------------------------------|--|
| Brand | Bestway |
| Model Number | 56475-2 (1056475XXX20) |
| Product Dimensions (L x W x H) | 732 x 366 x 132 cm (288.19" x 144.09" x 51.97") |
| Capacity | 30,045 Liters (7,937 gallons) |
| Shape | Rectangular |
| Material | Tritech (Polyvinyl Chloride (PVC)), Stainless Steel Frame |
| Included Components | Pool Cover, Ladder, Filter Pump (5,678 L/h), ChemConnect Dispenser |
| Item Weight | 220 pounds (approx. 99.8 kg) |
