## Pronto B07TLZDSWR

# Pronto 100% Acetone Professional Remover User Manual

Brand: Pronto

## 1. INTRODUCTION

The Pronto 100% Acetone Professional Remover is a powerful and effective solution designed for the quick and easy removal of various nail applications. This pure acetone formula is suitable for professional and home use, efficiently dissolving nail polish, gel polish, artificial nails, glitter polish, and nail glue. Its fast-acting nature ensures a smooth removal process, preparing your nails for their next treatment. This product is proudly made in the USA, ensuring high quality and reliability.

## 2. SAFETY INFORMATION

**WARNING: FLAMMABLE - KEEP AWAY FROM HEAT OR OPEN FLAMES. KEEP THIS AND ALL PRODUCTS OUT OF THE REACH OF CHILDREN. CLOSE CONTAINER TIGHTLY.**

**CAUTION: Do not apply to irritated skin or if excessive irritation develops. Avoid getting into eye or on mucous membranes. Do not take internally. In case of accidental ingestion, consult a physician immediately. If irritation develops, discontinue use at once.**

This product is designed for professional use by trained personnel. Manufacturer/Distributor will not be responsible for any loss, injury or damage if cautions are not followed by trained professional personnel.

Always use in a well-ventilated area to minimize inhalation of vapors. Avoid prolonged skin contact, as acetone can cause dryness. It is recommended to moisturize hands and cuticles after use.

### 3. SETUP AND PREPARATION

Before beginning the removal process, ensure you have the following items readily available:

- Pronto 100% Pure Acetone Professional Remover
- Cotton balls or cotton pads
- Nail file (for buffing gel polish or artificial nails)
- Optional: Nail buffer, cuticle pusher, nail clips (for soaking)
- Optional: Hand lotion or cuticle oil for post-removal moisturization

Prepare your workspace by ensuring it is well-ventilated and protected from spills. Place a towel or protective mat on your surface.

### 4. OPERATING INSTRUCTIONS: HOW TO REMOVE NAIL APPLICATIONS

Follow these steps for effective removal of nail polish, gel, acrylic, or dip powder:

1. **Prepare Nails:** If removing gel polish, artificial nails, or dip powder, gently buff the top layer of your nail application with a nail file. This helps break the seal and allows the acetone to penetrate more effectively.
2. **Saturate Cotton:** Moisten a cotton ball or pad with Pronto 100% Pure Acetone. Ensure it is thoroughly saturated but not dripping excessively.
3. **Apply to Nail:** Place the saturated cotton directly onto the nail application.
4. **Soak (Optional for stubborn applications):** For gel, acrylic, or dip, you may need to secure the cotton in place. Wrap each finger with aluminum foil or use specialized nail clips to hold the cotton firmly against the nail. Allow to soak for 10-15 minutes. For regular polish, a quick wipe is usually sufficient.
5. **Remove:** After soaking, firmly massage the nail bed, pressing from the cuticle to the nail tip, and wipe clean. For stubborn residue, gently scrape with a cuticle pusher or re-soak if necessary.
6. **Clean Up:** Use cotton swabs to remove polish from difficult areas around the cuticles or sidewalls.

## 5. MAINTENANCE AND STORAGE

To maintain the quality and safety of your Pronto 100% Acetone Professional Remover:

- Store the bottle in a cool, dry place away from direct sunlight, heat sources, and open flames.
- Ensure the cap is tightly closed after each use to prevent evaporation and maintain product efficacy.
- Keep the product in its original sealed container.
- Always store out of reach of children and pets.

## 6. TROUBLESHOOTING

Problem	Possible Cause	Solution
Nail application not removing completely.	Insufficient soaking time or inadequate buffing of the top coat.	Ensure the top layer is thoroughly buffed. Increase soaking time (e.g., to 15-20 minutes) and re-saturate cotton if needed. Gently scrape softened material.
Skin around nails feels dry or irritated.	Prolonged exposure to acetone or sensitive skin.	Minimize skin contact during removal. Immediately after removal, wash hands and apply a rich hand cream or cuticle oil to rehydrate the skin and nails.
Strong odor during use.	Acetone has a naturally strong odor.	Always use the product in a well-ventilated area, such as near an open window or with a fan running.

## 7. PRODUCT SPECIFICATIONS

- **Brand:** Pronto
- **Item Form:** Liquid
- **Item Volume:** 8 Fl Oz (236.59 Milliliters)
- **Product Dimensions:** 2 x 2 x 6.25 inches
- **Weight:** 8 ounces
- **UPC:** 017502232020
- **ASIN:** B07TLZDSWR
- **Manufacturer:** ETERNAL COSMETICS LLC
- **Country of Origin:** USA
- **Material Feature:** Chemical
- **Material Type Free:** Other Substances Free

# AVAILABLE IN 3 SIZES
